### A Festschrift for Werner Hildenbrand

---

Springer Science & Business Media **Back in the good old days on the fourth floor of the Altbau of Bonn's Ju ridicum, Werner Hildenbrand put an end to a debate about a festschrift in honor of an economist on the occasion of his turning 60 with a laconic: "Much too early." Remembering his position five years ago, we did not dare to think about one for him. But now he has turned 65. If consulted, he would most likely still answer: "Much too early." However, he has to take his official re tirement, and we believe that this is the right moment for such an endeavor. No doubt Werner Hildenbrand will not really retire. As professor emeritus, free from the constraints of a rigid teaching schedule and the burden of com mittee meetings, he will be able to indulge his passions. We expect him to pursue, with undiminished enthusiasm, his research, travel, golfing, the arts, and culinary pleasures - escaping real retirement.**

### IN HONOR OF EMANUEL T. WEILER (1914-1979)

[Purdue University Press](#) This volume honors Emanuel T. Weiler, the founder and first dean of Purdue University's School of Management and of the Krannert Graduate School of Management. Beginning in the mid-1950s, Weiler created a unique academic environment within which innovative and lasting contributions were made to both the teaching and content of economics and management. Members of the original economics faculty recruited by Weiler as well as several of their students wrote this collection of essays. All but one of the papers were prepared expressly for the volume and have not been published previously. The essays cover diverse areas which evolved from Weiler's leadership. The work has four major topical divisions (Economic Theory, Applied Economics, Macroeconomics, and Economics Education) plus a section of four memoirs.

**ESSENTIAL ESSAYS, VOLUME 1****FOUNDATIONS OF CULTURAL STUDIES**

**Duke University Press From his arrival in Britain in the 1950s and involvement in the New Left, to founding the field of cultural studies and examining race and identity in the 1990s and early 2000s, Stuart Hall has been central to shaping many of the cultural and political debates of our time. Essential Essays—a landmark two-volume set—brings together Stuart Hall's most influential and foundational works. Spanning the whole of his career, these volumes reflect the breadth and depth of his intellectual and political projects while demonstrating their continued vitality and importance. Volume 1: Foundations of Cultural Studies focuses on the first half of Hall's career, when he wrestled with questions of culture, class, representation, and politics. This volume's stand-out essays include his field-defining "Cultural Studies and Its Theoretical Legacies"; the prescient "The Great Moving Right Show," which first identified the emergent mode of authoritarian populism in British politics; and "Encoding and Decoding in the Television Discourse," one of his most influential pieces of media criticism. As a whole, Volume 1 provides a panoramic view of Hall's fundamental contributions to cultural studies.**

**ESSAYS IN HONOR OF ROBERT J. AUMANN**

---

---

[American Mathematical Soc.](#) Since the publication of "Theory of Games and Economic Behavior" by von Neumann and Morgenstern, the concept of games has played an increasing role in economics. It also plays a role of growing importance in other sciences, including biology, political science, and psychology. Many scientists have made seminal advances and continue to be leaders in the field, including Harsanyi, Shapley, Shubik, and Selten. Professor Robert Aumann, in addition to his important contributions to game theory and economics, made a number of significant contributions to mathematics. This volume provides a collection of essays in mathematical economics and game theory, including cutting-edge research on noncooperative game theory and its foundations, bargaining theory, and general equilibrium theory. Also included is a reprint of Aumann's classic paper, "Acceptable Points in General Cooperative n-Person Games" and of the oft-cited, yet hard to find, paper by Maschler, "The Worth of a Cooperative Enterprise to Each Member". This book illustrates the wide range of applications of mathematics to economics, game theory, and social choice. The volume is dedicated to Professor Robert J. Aumann, Hebrew University, Jerusalem, Israel, for his contributions in mathematics and social sciences.
