SELECTED PAPERS FROM IIKII 2019 CONFERENCES IN SYMMETRY

MDPI The International Institute of Knowledge Innovation and Invention (IIKII, <http://www.iikii.org>) promotes the exchange of innovations and inventions and establishes a communication platform for international innovations and research. In

2019, IIKII cooperates with the IEEE Tainan Section Sensors Council to hold IEEE conferences, such as IEEE ICIASE 2019, IEEE ECBIOS 2019, IEEE ICKII 2019, ICUSA-GAME 2019, and IEEE ECICE 2019. This Special Issue, entitled "Selected Papers from IIKII 2019 conferences", aims to showcase outstanding papers from IIKII 2019 conferences, including symmetry in physics, chemistry, biology, mathematics, and computer science, etc. It selected 21 outstanding papers from 750 papers presented in IIKII 2019 conferences on the topic of symmetry. The main goals of this Special Issue are to encourage scientists to publish their experimental and theoretical results in as much detail as possible, and to discover new scientific knowledge relevant to the topic of symmetry.

HEALTH INEQUALITIES

CRITICAL PERSPECTIVES

Oxford University Press *Informed by a wealth of available research, between 1997 and 2010, the UK Labour government introduced a raft of policies to reduce health inequalities. Despite this, by most measures, the UK's health inequalities have continued to widen. This failure has prompted calls for new approaches to health inequalities research and some consensus that public health researchers ought to be more actively involved in 'public health advocacy'. Yet there is currently no agreement as to what these new research agendas should be and despite multiple commentaries reflecting on recent UK efforts to reduce health inequalities, there has so far been little attempt to map future directions for research or to examine what more egalitarian policies means in practical terms. Health Inequalities: Critical Perspectives addresses these concerns. It takes stock of the UK's experiences of health inequalities research and policy to date, reflecting on the lessons that have been learnt from these experiences, both within the UK and internationally. The book identifies emergent research and policy topics, exploring the perspectives of actors working in a range of professional settings on these agendas. Finally, the book considers potential ways of improving the links between health inequalities research, policy and practice, including via advocacy. With contributions from established, international health inequalities experts and newer, up-and-coming researchers in the field, as well as individuals working on health inequalities in policy, practice and civil society settings, Health Inequalities: Critical Perspectives is a 'must buy' for researchers, postgraduate students, policymakers, practitioners, and research funders.*

PRIVATISING THE PUBLIC UNIVERSITY

Routledge *Privatising the Public University: The Case of Law is the first full-length critical study examining the impact of the dramatic reforms that have swept through universities over the last two decades.*

INFORMATION TECHNOLOGY LAW

Routledge *This fourth edition of Information Technology Law has been completely revised in the light of developments within the field since publication of the first*

edition in 1997. Now dedicated to a more detailed analysis of and commentary on the latest developments within this burgeoning field of law, this new edition is an essential read for all those interested in the interface between law and technology and the effect of new technological developments on the law. New additions to the fourth edition include: analysis of regulatory issues and jurisdictional questions specific consideration of intermediary liability developments in privacy and data protection extension of computer crime laws developments in software patents open source software and the legal implications.

A free CD-ROM contains all 1,600 questions from the book plus 1,400 additional questions.

EU LAW IN THE UK

Oxford University Press, USA The first new textbook to publish since Brexit, *EU Law in the UK* tackles EU law with a post-Brexit perspective interwoven throughout. It takes a uniquely contextual approach designed to enliven the learning experience, support understanding, and help students appreciate the relevance and impact of EU law. Written in a concise and accessible style, and supported by lively academic analysis, the author carefully guides students through key complexities, issues, and debates. *EU Law in the UK* not only supports students to understand the core elements of EU institutional and substantive law, but also to critically examine the implications on UK law of the UK's decision to leave the EU. The book's unique contextual approach offers a highly practical and engaging way to learn about EU law. The context is set at the start of each chapter by way of scenarios including real quotes from politicians, parliamentary reports, and fictional situations. Throughout the chapters, students are then invited to apply legal principles to these scenarios. This approach serves to reinforce and enliven students' learning.

NATIONAL CENTRAL LIBRARY NEWSLETTER

CROWDFUNDING

LESSONS FROM JAPAN'S APPROACH

Springer This book discusses the concepts, types, models, and patterns of crowdfunding to provide a comprehensive portrait of this newly developed market-

based financial tool. In addition, it examines a number of economic theories to help readers understand the proliferation of crowdfunding, reviews empirical works to find gaps in the literature, and outlines future research directions. A unique feature of this book is that it discusses Japan's crowdfunding approach, which is somewhat different from that of the Western countries, by highlighting a specific crowdfunding platform (Music Securities) and a crowdfund-backed firm (SABAR restaurant). Further, it explores the suitability of Japan's crowdfunding approach for addressing the financial needs of SMEs in developing countries, using Bangladesh as a representative case. Finally, the book identifies some lessons learned from crowd funding so as to advance research into this phenomenon, and to make it efficient and sustainable. As such, the book will benefit novices, academics, researchers, and policymakers interested in crowdfunding technology.

LIFE WITHOUT DIABETES

THE DEFINITIVE GUIDE TO UNDERSTANDING AND REVERSING TYPE 2 DIABETES

[HarperCollins](https://www.harpercollins.com) *THE US EDITION OF THE INTERNATIONAL BESTSELLER* A momentous medical breakthrough—a scientifically proven program for managing and reversing Type 2 Diabetes at any stage of health. The fastest growing disease in the world, Type 2 diabetes has long been regarded as an incurable, lifelong condition that becomes progressively worse over time, resulting in pain, loss of vision, amputation, and even premature death. But there is hope. For more than four decades, Dr. Roy Taylor has been studying the causes of diabetes. In 2017, he had a breakthrough: he found scientific proof that Type 2 diabetes is not only reversible, but that anyone following a simple regimen can prevent and cure it. Dr. Taylor's research shows that Type 2 diabetes is caused by too much fat in the liver and pancreas, which interferes with both organs' normal functioning. By losing less than 1 gram of fat, the liver and organ can begin to perform as they were designed to once again—thus beginning the reversal process. The most efficient way to shed fat from the liver and pancreas is to lose weight as quickly as possible. *Life Without Diabetes* makes it easy for people to cut back on their daily calorie intake and avoid the two big problems of dieting—hunger and choice—and lose up to 35 pounds in just eight weeks. Thanks to Dr. Taylor, we can now fundamentally change how we treat and prevent this debilitating and all-too-common disease forever.

INNOVATIVE TECHNOLOGIES AND LEARNING

FIRST INTERNATIONAL CONFERENCE, ICITL 2018, PORTOROZ, SLOVENIA, AUGUST 27-30, 2018, PROCEEDINGS

Springer This book constitutes the refereed proceedings of the First International Conference on Innovative Technologies and Learning, ICITL 2018, held in Portoroz, Slovenia, in August 2018. The 66 revised full papers presented together with 4 short papers were carefully reviewed and selected from 160 submissions. The papers are organized in the following topical sections: Augmented and Virtual Reality in Education; Collaborative Learning; Design and Framework of Learning Systems; Instructional Strategies; Learning Analytics and Education Data Mining; Mind, Brain and Education; Pedagogies to Innovative Technologies; Personalized and Adaptive Learning; Social Media and Online Learning; Technologies Enhanced Language Learning; Application and Design of Innovative Learning Software; Educational Data Analytics Techniques and Adaptive Learning Applications; and Innovative Thinking Education and Future Trend Development.

MODERN POWER ELECTRONIC DEVICES

PHYSICS, APPLICATIONS, AND RELIABILITY

Energy Engineering Power devices are key to modern power systems, performing functions such as inverting and changing voltages, buffering and switching. Following a device-centric approach, this book covers power electronic applications, semiconductor physics, materials science, application engineering, and key technologies such as MOSFET, IGBT and WBG.

TEACHING LEGAL EDUCATION IN THE DIGITAL AGE

PEDAGOGICAL PRACTICES TO DIGITALLY EMPOWER LAW GRADUATES

Taylor & Francis Teaching Legal Education in the Digital Age explores how legal pedagogy and curriculum design should be modernised to ensure that law students have a realistic view of the future of the legal profession. Using future readiness and digital empowerment as central themes, chapters discuss the use of technology to enhance the design and delivery of the curriculum and argue the need for the curriculum to be developed to prepare students for the use of technology in the workplace. The volume draws together a range of contributions to consider the impact of digital pedagogies in legal education and propose how technology can be used in the law curriculum to enhance student learning in law schools and lead excellence in teaching. Throughout, the authors consider what it means to be future-ready and what we can do as law academics to facilitate the knowledge, skills and dispositions needed by future-ready graduates. Part of Routledge's series on Legal Pedagogy, this book will be of great interest to academics, post-graduate students, teachers and researchers of evidence law, as well as those with a wider interest in legal pedagogy or legal practice.

MARKETS AND MALTHUS

POPULATION, GENDER AND HEALTH IN NEO-LIBERAL TIMES

SAGE Publishing India *Markets and Malthus: Population, Gender, and Health in Neo-liberal Times* explores the ideas and institutions that were framed at the 1994 United Nations population conference in Cairo and traces their trajectories sixteen years down the line. Why were Third World feminists profoundly critical of the Cairo consensus and process? How has the health of people around the world been affected by neo-liberal economic policies? What have these meant for women's rights, including reproductive rights? The book presents detailed case studies from various countries ranging from India and China, to Egypt, Tanzania, Uganda, and across Africa to Argentina, Peru, and throughout Latin America, as well as overarching themed essays. From the politics of abortion and immigration to rising levels of fundamentalist violence and sex selective abortions, the volume explores a range of issues from several vantage points. It offers startling new insights into these issues by linking them to neo-liberal economic policies that have profoundly shaped health policies globally. This book is essential reading for students of gender studies, public health, and demography, as well as policy-makers and activists.

POLITICAL CAMPAIGNING, ELECTIONS AND THE INTERNET

COMPARING THE US, UK, FRANCE AND GERMANY

Routledge *The Internet* first played a minor role in the 1992 U.S. Presidential election, and has gradually increased in importance so that it is central to election campaign strategy. However, election campaigners have, until very recently, focused on Web 1.0: websites and email. This book offers an in-depth, comparative analysis of how interactive Web 2.0 tools are utilised by candidates and parties.

QUESTIONS & ANSWERS IN MAGNETIC RESONANCE IMAGING

Mosby Incorporated *The popular QUESTIONS AND ANSWERS IN MAGNETIC RESONANCE IMAGING* is thoroughly revised and updated to reflect the latest advances in MRI technology. Four new chapters explain recent developments in the field in the traditional question and short answer format. This clear, concise and informative text discusses hundreds of the most common questions about MRI, as well as some challenging questions for seasoned MRI specialists.

NETWORKED COLLABORATIVE LEARNING

SOCIAL INTERACTION AND ACTIVE LEARNING

Elsevier *The sustainability of Networked Collaborative Learning (NCL)* is a key topic of discussion amongst the institutions where it has been or may potentially be introduced. In order to determine the extent of NCL's sustainability, the added value university education may yield by adopting collaborative learning strategies must be quantified. In turn, an understanding of the implications NCL produces in terms of design and management is gained. After comparing NCL with other Technology

Enhanced Learning (TEL) approaches and discussing the possible reasons for adopting it, a multidimensional model for the sustainability of NCL is proposed. The model is characterized by four dimensions: pedagogical approaches, e-teacher professional development, instructional design models and valuation/assessment approaches. Each of these dimensions is examined on the basis of the author's direct experience gained through applying NCL to his university teaching. Delineates a framework for NCL sustainability Provides an instructional design model for NC Describes an original approach to the evaluation of collaborative learning processes

MEDICAL EDUCATION IN THE MILLENNIUM

Oxford Medical Publications As the 21st century approaches, what will be the roles and responsibilities of a doctor in the next century and how can we prepare young doctors for the future in a world which is rapidly changing? Medical education has entered a new era at all levels, led the way by changes in the undergraduate curricula, and medical educators are asking what change is necessary to prepare future physicians for practice in the 21st century. This book charts recent developments in medical education that are withstanding the test of time and establishes a baseline for development in the next century. It deals with many important issues in medical education covering the new developments at the prequalification stage of medical training. Specific examples of successful models and ideas for basic clinical training are included, and there are chapters on curriculum design, use of the internet, assessment, and clinical teaching and aims for the year 2000. Written by current leaders and researchers in the field, it is an invaluable reference and guide for all those interested in medical education.

Features: *300 medications plus their common names and drug families *Side effects *Nursing considerations

SIGNAL AND TELECOMMUNICATION

YOUTH COMPETITION TIMES DFCCIL Executive Signal and Telecommunication Solved Papers & Practice Book

THE MOLECULAR BASIS OF CANCER

Springer Science & Business Media This book aims to describe the current state of

knowledge and possible future developments in a number of major areas of research into the nature, causes and treatment of cancer. The contributing authors have been encouraged to discuss their subjects at the molecular level. It will become apparent to the reader that considerable developments in the understanding of the fundamental nature of cancer, in molecular terms, are constantly being made. This is particularly the case in the area of oncogene research where differences between tumour and normal cells can now be defined in terms of altered expression of DNA sequences. An understanding of the methods available for detecting cancer, of the process of carcinogenesis and of the means available for treating cancer can only be achieved with a precise knowledge of the basic biochemical and molecular processes involved. Since it is all too easy for the research scientist to become totally absorbed within the specialised area of research in which he is involved, the first chapter is an attempt to encourage a broader field of vision by introducing the clinician's view of the cancer problem, which illustrates the broad spectrum of basic problems that need to be solved by the cancer researcher.

SHORTCUTS IN QUANTITATIVE APTITUDE FOR COMPETITIVE EXAMS

Disha Publications Shortcuts in Quantitative Aptitude is the MOST COST EFFECTIVE QUALITY BOOK ever built for Competitive Exams. This book is an attempt of Disha Publication to provide Quality Material to aspirants at a throwaway price. The book will help in learning the various tips and tricks of Quantitative Aptitude. The book emphasizes on the short cut methods through which one can solve any problem before time. Thus, the book not only enhances your efficiency but also helps you to master the subject. Each chapter covers basic theory followed by shortcut approaches and formula. The book is supported by ample practice material through E-books which covers: • Chapter-wise Solved Examples • Chapter-wise Practice Exercises with Hints and Solutions • Chapter-wise Tests • Past Solved Papers (IBPS PO/Clerk, SBI PO/Clerk, SSC, CDS exams etc) The book will prove to be an asset for all competitive examinations like UPSC(IAS Prelim), Banking, SSC, Insurance, Railway Recruitment Board Examinations, CDS, CBI, MBA, Sub-Inspectors of Police, CPO and various other competitive examinations.
