Pre-Incident Indicators of Terrorist Incidents

The Identification of Behavioral, Geographic and Temporal Patterns of Preparatory Conduct

DIANE Publishing This is a print on demand edition of a hard to find publication. Explores whether sufficient data exists to examine the temporal and spatial relationships that existed in terrorist group planning, and if so, could patterns of preparatory conduct be identified? About one-half of the terrorists resided, planned, and prepared for terrorism relatively close to their eventual target. The terrorist groups existed for 1,205 days from the first planning meeting to the date of the actual/planned terrorist incident. The planning process for specific acts began 2-3 months prior to the terrorist incident. This study examined selected terrorist groups/incidents in the U.S. from 1980-2002. It provides for the potential to identify patterns of conduct that might lead to intervention prior to the commission of the actual terrorist incidents. Illustrations.

Olympia Provisions

Cured Meats and Tales from an American Charcuterie [A Cookbook]

Ten Speed Press A rigorous exploration of what American charcuterie is today from Portland's top-notch meat company, featuring in-depth techniques for crafting cured meats, recipes from the company's two restaurants, and essays revealing the history and personalities behind the brand. Portland's Olympia Provisions began as Oregon's first USDA-certified salumeria, but it has grown into a mini-empire, with two bustling restaurants and charcuterie shipping out daily to all fifty states. In his debut cookbook, salumist and co-owner Elias Cairo dives deep into his distinctly American charcuterie, offering step-by-step recipes for confits, pâtés, sausages, salami, and more. But that is only the beginning. Writer Meredith Erickson takes you beyond cured meat, exploring how Cairo's proud Greek-American upbringing, Swiss cooking adventures, and intense love affair with the outdoors have all contributed to Olympia Provisions' singular—and delicious—point of view. With recipes from the restaurants, as well as extensive wine notes and nineteen frankfurter variations, Olympia Provisions redefines what American charcuterie can be.

Irishness and Womanhood in Nineteenth-century British Writing

*Ashgate Publishing, Ltd. Using Lady Morgan's *The Wild Irish Girl* as his point of departure, Thomas J. Tracy argues that nineteenth-century debates over what constitutes British national identity often revolved around representations of Irishness, especially Irish womanhood. He maps the genealogy of this development in fiction, political discourse, and the popular press, from Edgeworth's *Castle Rackrent* through Trollope's Irish novels, focusing on the pivotal period from 1806 through the 1870s.*

Materials Selection in Mechanical Design

Pergamon New materials enable advances in engineering design. This book describes a procedure for material selection in mechanical design, allowing the most suitable materials for a given application to be identified from the full range of materials and section shapes available. A novel approach is adopted not found elsewhere. Materials are introduced through their properties; materials selection charts (a new development) capture the important features of all materials, allowing rapid retrieval of information and application of selection techniques. Merit indices, combined with charts, allow optimisation of the materials selection process. Sources of material property data are reviewed and approaches to their use are given. Material processing and its influence on the design are discussed. The book closes with chapters on aesthetics and industrial design. Case studies are developed as a method of illustrating the procedure and as a way of developing the ideas further.
