## Expanding Underrepresented Minority Participation

### America's Science and Technology Talent at the Crossroads

**National Academies Press** In order for the United States to maintain the global leadership and competitiveness in science and technology that are critical to achieving national goals, we must invest in research, encourage innovation, and grow a strong and talented science and technology workforce. Expanding Underrepresented Minority Participation explores the role of diversity in the science, technology, engineering and mathematics (STEM) workforce and its value in keeping America innovative and competitive. According to the book, the U.S. labor market is projected to grow faster in science and engineering than in any other sector in the coming years, making minority participation in STEM education at all levels a national priority. Expanding Underrepresented Minority Participation analyzes the rate of change and the challenges the nation currently faces in developing a strong and diverse workforce. Although minorities are the fastest growing segment of the population, they are underrepresented in the fields of science and engineering. Historically, there has been a strong connection between increasing educational attainment in the United States and the growth in and global leadership of the economy. Expanding Underrepresented Minority Participation suggests that the federal government, industry, and post-secondary institutions work collaboratively with K-12 schools and school systems to increase minority access to and demand for post-secondary STEM education and technical training. The book also identifies best practices and offers a comprehensive road map for increasing involvement of underrepresented minorities and improving the quality of their education. It offers recommendations that focus on academic and social support, institutional roles, teacher preparation, affordability and program development.

## All That Is Red

**New Generation Publishing** If you could choose a world without loneliness, without shame, grief, misery, or feeling of any kind, would you, if it also meant that you lost the simple pleasure of a picnic on a sunny day or the joy of falling in love? Would the allure of a comfortable numbness prove too tempting to resist? Could you choose between feeling pain and not feeling anything, ever again? A girl is caught in a world where this choice is fiercely contested. In the cross-fire between the Red and White empires, the feeling and the unfeeling, each bent on the other's destruction, the girl must choose between emotion and oblivion, joining the ranks with the Reds as they fight to resist the Whites, but all the while struggling with her own desperate ambivalence. All That Is Red is a story of survival and a journey through the human condition, revealing how the intimate euphoria of pain can sometimes be all we have to remind us that we are alive. Anna Caltabiano is fifteen years old. She was born in British colonial Hong Kong to a Japanese mother and an Italian-American father, before moving to Palo Alto, California; the mecca of futurism. Her writing explores and exposes an adolescent dystopia in which accepted traditions, religions, cultures and communities have been eroded, resulting in a lost generation consumed by social apathy and self-loathing which has found solace through electronic connections. Unsettling, engaging and surprisingly erudite, All That Is Red is a remarkably assured debut from an ascending literary star.

## Beyond Transparency

## Open Data and the Future of Civic Innovation

The rise of open data in the public sector has sparked innovation, driven efficiency, and fueled economic development. While still emerging, we are seeing evidence of the transformative potential of open data in shaping the future of our civic life, and the opportunity to use open data to reimagine the relationship between residents and government, especially at the local level. As we look ahead, what have we learned so far from open data in practice and how we can apply those lessons to realize a more promising future for America's cities and communities? Edited by Brett Goldstein, former Chief Data Officer for the City of Chicago, with Code for America, this book features essays from over twenty of the world's leading experts in a first-of-its-kind instructive anthology about how open data is changing the face of our public institutions. Contributors include: Michael Flowers, Chief Analytics Officer, New York City Beth Blauer, former director of Maryland StateStat Jonathan Feldman, CIO, City of Asheville Tim O'Reilly, founder & CEO, O'Reilly Media Eric Gordon, Director of Engagement Game Lab, Emerson College Beth Niblock, CIO, Louisville Metro Government Ryan & Mike Alfred, Co-Founders, Brightscope Emer Coleman, former director of the London Datastore Mark Headd, Chief Data Officer, City of Philadelphia "As an essential volume for anyone interested in the future of governance, urban policy, design, data-driven policymaking, journalism, or civic engagement, "Beyond Transparency" combines the inspirational glow and political grit of Profiles in Courage with the clarity of an engineer's calm explanation of how something technical actually works. Here are the detailed how-to stories of many members of the first generation of open government pioneers, written in a generous, accessible style; this compilation presents us with a great deal to admire, ample provocation, and wise guidance from a group of remarkable individuals." -Susan Crawford, author of Captive Audience "Just as he did during his time in my administration, Goldstein has brought together industry leaders to discuss issues of relevance in the open data movement and the practical implications of implementing these policies... This book will help continue the work to make open government a reality across the country." - Mayor Rahm Emanuel, City of Chicago "A must-read for anyone who is passionate about what open data can do to transform city living." - Boris Johnson, Mayor of London

### Volcano Crisis Communication

**Springer** This open access book provides a comprehensive overview of volcanic crisis research, the goal being to establish ways of successfully applying volcanology in practice and to identify areas that need to be addressed for future progress. ## Life Inside My Mind

### 31 Authors Share Their Personal Struggles

**Simon Pulse** “Who better to raise teens’ awareness of mental illness and health than the YA authors they admire?” —Booklist (starred review) “[A] much-needed, enlightening book.” —School Library Journal (starred review) Your favorite YA authors including Ellen Hopkins, Maureen Johnson, and more recount their own experiences with mental health in this raw, real, and powerful collection of essays that explores everything from ADD to PTSD. Have you ever felt like you just couldn’t get out of bed? Not the occasional morning, but every day? Do you find yourself listening to a voice in your head that says “you’re not good enough,” “not good looking enough,” “not thin enough,” or “not smart enough”? Have you ever found yourself unable to do homework or pay attention in class unless everything is “just so” on your desk? Everyone has had days like that, but what if you have them every day? You’re not alone. Millions of people are going through similar things. However issues around mental health still tend to be treated as something shrouded in shame or discussed in whispers. It’s easier to have a broken bone—something tangible that can be “fixed”—than to have a mental illness, and easier to have a discussion about sex than it is to have one about mental health. Life Inside My Mind is an anthology of true-life events from writers of this generation, for this generation. These essays tackle everything from neurodiversity to addiction to OCD to PTSD and much more. The goals of this book range from providing a home to those who are feeling alone, awareness to those who are witnessing a friend or family member struggle, and to open the floodgates to conversation.

## Dynamics of Regulatory Change

### How Globalization Affects National Regulatory Policies

**Univ of California Press** Critics of globalization claim that economic liberalization leads to a lowering of regulatory standards. As capital and corporations move more freely across national boundaries, a race to the bottom results as governments are forced to weaken labor and environmental standards to retain current contracts or attract new business. The essays in this volume argue that, on the contrary, under certain circumstances global economic integration can actually lead to the strengthening of consumer and environmental standards. This volume extends the argument of David Vogel's book Trading Up, which discussed environmental standards, by focusing on the impact of globalization on labor rights, women's rights and capital market regulations.

## Quantile Regression

**Cambridge University Press** Quantile regression is gradually emerging as a unified statistical methodology for estimating models of conditional quantile functions. By complementing the exclusive focus of classical least squares regression on the conditional mean, quantile regression offers a systematic strategy for examining how covariates influence the location, scale and shape of the entire response distribution. This monograph is the first comprehensive treatment of the subject, encompassing models that are linear and nonlinear, parametric and nonparametric. The author has devoted more than 25

years of research to this topic. The methods in the analysis are illustrated with a variety of applications from economics, biology, ecology and finance. The treatment will find its core audiences in econometrics, statistics, and applied mathematics in addition to the disciplines cited above.

## Faces At The Bottom Of The Well

### The Permanence Of Racism

**Basic Books** The classic work on American racism and the struggle for racial justice In *Faces at the Bottom of the Well*, civil rights activist and legal scholar Derrick Bell uses allegory and historical example to argue that racism is an integral and permanent part of American society. African American struggles for equality are doomed to fail so long as the majority of whites do not see their own well-being threatened by the status quo. Bell calls on African Americans to face up to this unhappy truth and abandon a misplaced faith in inevitable progress. Only then will blacks, and those whites who join with them, be in a position to create viable strategies to alleviate the burdens of racism. "Freed of the stifling rigidity of relying unthinkingly on the slogan 'we shall overcome,'" he writes, "we are impelled both to live each day more fully and to examine critically the actual effectiveness of traditional civil rights remedies." *Faces at the Bottom of the Well* is urgent and essential reading on the problem of racism in America.

New insights into the impacts arising from biological invasions are generated through taking an ecosystem services perspective. This work highlights that management of biological invasions is needed not only to sustain biodiversity and the environment, but also to safeguard productive sectors such as agriculture, forestry and fisheries, as well as to preserve human health and well-being.

## Killing Love

**Simon and Schuster** This powerful, unforgettable and uplifting story is one part wrenching family memoir, and one part inspirational journey towards healing and forgiveness – but most of all, it’s an unputdownable journey through one family’s tragedy and how they refused to let it define them. On the day of Rebecca Poulson’s 33rd birthday, her father, niece and nephew were murdered. The murderer had been part of her family; her brother-in-law, Neung, the father of the children. *Killing Love* is Rebecca’s journey through homicide; grief, the police investigations, the media interest, the court cases, the moments of great despair – and the healing. It is a story of individual tragedy and a family’s strength, but it is also a story of a community’s attitude to family violence. As a reluctant warrior for those who cannot speak for themselves, Rebecca talked to the NSW State Premier and politicians, on multiple TV shows and to print journalists in the hope that the mistakes made by the police force, DOCS, the legal system and solicitors will never be made again. Rebecca’s contact with policy makers has been nothing short of history-making, and her story has directly influenced domestic violence laws in the state. Neung left a note for Rebecca’s family; he hoped that he would destroy them. This is the story of how he didn’t.

## The Birdman's Wife

Inspired by letters from Elizabeth found tucked inside her famous husband's research, The Birdman's Wife takes the form of an intimate memoir of a woman whose talent and adventurous spirit led her from the glittering salons of London to the wilds of Van Diemen's land and New South Wales. Artist Elizabeth Gould spent her life capturing the sublime beauty of birds the world had never seen before. But her legacy was eclipsed by the fame of her husband, John Gould. This book at last gives voice to a passionate and adventurous spirit who was so much more than the woman behind the man. Elizabeth was a woman ahead of her time, juggling the demands of her artistic life with her roles as wife, lover, helpmate, and mother to an ever-growing brood of children. In a golden age of discovery, her artistry breathed wondrous life into countless exotic new species, including Charles Darwin's Galapagos finches. In this book, a naïve young girl who falls in love with an ambitious genius comes into her own as a woman, an artist and a bold adventurer who defies convention by embarking on a trailblazing expedition to the colonies to discover Australia's curious birdlife. This is an indelible portrait of an extraordinary woman overlooked by history until now.
