in Youth Improving the Science, Changing the Culture National Academies Press *In the past decade, few subjects at the intersection of medicine and sports have generated as much public interest as sports-related concussions - especially among youth. Despite growing awareness of sports-related concussions and campaigns to educate athletes, coaches, physicians, and parents of young athletes about concussion recognition and management, confusion and controversy persist in many areas. Currently, diagnosis is based primarily on the symptoms reported by the individual rather than on objective diagnostic markers, and there is little empirical evidence for the optimal degree and duration of physical rest needed to promote recovery or the best timing and approach for returning to full physical activity. Sports-Related Concussions in Youth: Improving the Science, Changing the Culture reviews the science of sports-related concussions in youth from elementary school through young adulthood, as well as in military personnel and their dependents. This report recommends actions that can be taken by a range of audiences - including research funding agencies, legislatures, state and school superintendents and athletic directors, military organizations, and equipment manufacturers, as well as youth who participate in sports and their parents - to improve what is known about concussions and to reduce their occurrence. Sports-Related Concussions in Youth finds that while some studies provide useful information, much remains unknown about the extent of concussions in youth; how to diagnose, manage, and prevent concussions; and the short- and long-term consequences of concussions as well as repetitive head impacts that do not result in concussion symptoms. The culture of sports negatively influences athletes' self-reporting of concussion symptoms and their adherence to return-to-play guidance. Athletes, their teammates, and, in some cases, coaches and parents may not fully appreciate the health threats posed by concussions. Similarly, military recruits are immersed in a culture that includes devotion to duty and service before self, and the*

critical nature of concussions may often go unheeded. According to *Sports-Related Concussions in Youth*, if the youth sports community can adopt the belief that concussions are serious injuries and emphasize care for players with concussions until they are fully recovered, then the culture in which these athletes perform and compete will become much safer. Improving understanding of the extent, causes, effects, and prevention of sports-related concussions is vitally important for the health and well-being of youth athletes. The findings and recommendations in this report set a direction for research to reach this goal. **FTCE**

Prekindergarten/Primary PK-3 *Xamonline Incorporated Ready to teach? Don't let a certification exam stand between you and your career--get an XAMonline and get results! Take the 125-question pre-test then work your way through the guide, which covers the major competencies including: child growth and development; early childhood (P-K3) foundations; research, standards, and trends; effective practices; issues and strategies for family and community involvement; developmentally appropriate curriculum; diverse needs of children and their families; diagnosis, assessment, and evaluation; and child guidance and classroom behavioral management. Cirrus Test Prep's study materials ensure that new educators feel prepared on test day and beyond. **Deliberate Coaching A***

Toolbox for Accelerating Teacher Performance Forget the old concept of "behavior consequences" as either good or bad, or that rewards and reinforcement are the same thing. According to Gavoni and Weatherly, there is a much bigger picture we're missing. Deliberate Coaching introduces the science of human behavior, or Applied Behavior Analysis (ABA). This powerful technique is based in scientific research on learning and performance, and works within any field to accelerate achievement and performance for all outcomes. CEOs of Fortune 500 companies have used it to realize fiscal growth and positive culture change, while school leaders have re-energized failing schools. Deliberate Coaching is a toolbox of behavioral techniques for educators and leaders who are looking to move their coaching from haphazard to deliberate. Leaders will understand:

- How teachers can efficiently improve instructional performance
- How to encourage children with disabilities to communicate
- How to achieve measurable goals in school improvement plans
- How to move from reactive to proactive leadership
- How to make significant impacts on the performance of teachers and students by starting small and working smart

FTCE Professional Education Test Prep FTCE Professional Education Test Study Guide and Practice Test Questions Cirrus Test Prep
Florence Nightingale: The Crimean War Collected Works of Florence Nightingale Wilfrid Laurier Univ. Press Florence Nightingale is famous as the "lady with the lamp" in the Crimean War, 1854–56. There is a massive amount of literature on this work, but, as editor Lynn McDonald shows, it is often erroneous, and films and press reporting on it have been even less accurate. The Crimean War reports on Nightingale's correspondence from the war hospitals and on the staggering amount of work she did post-war to ensure that the appalling death rate from disease (higher than that from bullets) did not recur. This volume contains much on Nightingale's efforts to achieve real reforms. Her well-known, and relatively "sanitized", evidence to the royal commission on the war is compared with her confidential, much franker, and very thorough Notes on the Health of the British Army, where the full horrors of disease and neglect are laid out, with the names of those responsible.
