## On the Track of the Books

## Scribes, Libraries and Textual Transmission

**Walter de Gruyter GmbH & Co KG** This book offers the hint for a new reflection on ancient textual transmission and editorial practices in Antiquity. In the first section, it retraces the first steps of the process of ancient writing and editing. The reader will discover how the book is both a material object and a metaphorical personification, material or immaterial. The second section will focus on corpora of Greek texts, their formation, and their paratextual apparatus. Readers will explore various issues dealing with the mechanisms that are at the basis of the assembling of ancient Greek texts, but great attention will also be given to the role of ancient scholarly work. The third section shows how texts have two levels of authorship: the author of the text, and the scribe who copies the text. The scribe is not a medium, but plays a crucial role in changing the text. This section will focus on the protagonists of some interesting cases of textual transmission, but also on the books they manufactured or kept in the libraries, and on the words they engraved on stones. Therefore, the fresh voices of the contributors of this book, offer new perspectives on established research fields dealing with textual criticism.

## Happy Sexy Millionaire

## Unexpected Truths about Fulfilment, Love and Success

**Yellow Kite** THE SUNDAY TIMES BESTSELLER We are losing ourselves. We're chasing the wrong things, asking the wrong questions, and polluting our minds. It's time to stop, it's time to resist and it's time to rethink the fundamental social blueprint that our lives are built upon. 'As an 18-year-old, black, broke, lonely, insecure, university drop-out, from a bankrupt family, I wrote in my diary that I wanted to be a 'Happy Sexy Millionaire' by the age of 25. By 25 I was a multi-millionaire having created a business worth over \$300m dollars. Ironically, in achieving everything I set out to, I learnt that I was wrong about almost everything... The world had lied to me. It lied to me about how you attain fulfilment, love and success, why those things matter, and what those words actually mean. In this book, I'll dismantle the most popular, unaddressed lies about happiness that we've been led to believe. I'll expose the source of these lies, examine the incentives that fuel them and replace them with a practical set of scientifically proven and unconventional ideas that will help you to live a truly fulfilled life, a life full of the love you seek and the success you deserve.' ## Empire of Eloquence

## The Classical Rhetorical Tradition in Colonial Latin America and the Iberian World

**Cambridge University Press** The global reach of the Spanish and Portuguese empires prompted a remarkable flourishing of the classical rhetorical tradition in various parts of the early modern world. Empire of Eloquence is the first study to examine this tradition as part of a wider global renaissance in Europe, the Americas, Asia and Africa, with a particular focus on the Iberian world. Spanning the sixteenth to the early nineteenth centuries, the book argues that the classical rhetorical tradition contributed to the ideological coherence and equilibrium of this early modern Iberian world, providing important occasions for persuasion, legitimation and eventual (and perhaps inevitable) confrontation. Drawing on archival collections in thirteen countries, Stuart M. McManus places these developments in the context of civic, religious and institutional rituals attended by the multi-ethnic population of the Iberian world and beyond, and shows how they influenced public speaking in non-European languages, such as Konkani and Chinese.

## Translating Style

### A Literary Approach to Translation - A Translation Approach to Literature

**Routledge** Arising from a dissatisfaction with blandly general or abstrusely theoretical approaches to translation, this book sets out to show, through detailed and lively analysis, what it really means to translate literary style. Combining linguistic and lit crit approaches, it proceeds through a series of interconnected chapters to analyse translations of the works of D.H. Lawrence, Virginia Woolf, James Joyce, Samuel Beckett, Henry Green and Barbara Pym. Each chapter thus becomes an illuminating critical essay on the author concerned, showing how divergences between original and translation tend to be of a different kind for each author depending on the nature of his or her inspiration. This new and thoroughly revised edition introduces a system of 'back translation' that now makes Tim Parks' highly-praised book reader friendly even for those with little or no Italian. An entirely new final chapter considers the profound effects that globalization and the search for an immediate international readership is having on both literary translation and literature itself.

## Cost, Effectiveness, and Deployment of Fuel Economy Technologies for Light-Duty Vehicles

**National Academies Press** The light-duty vehicle fleet is expected to undergo substantial technological changes over the next several decades. New powertrain designs, alternative fuels, advanced materials and significant changes to the vehicle body are being driven by increasingly stringent fuel economy and greenhouse gas emission standards. By the end of the next decade, cars and light-duty trucks will be more fuel efficient, weigh less, emit less air pollutants, have more safety features, and will be more expensive to purchase relative to current vehicles. Though the gasoline-powered spark ignition engine will continue to be the dominant powertrain configuration even through 2030, such vehicles will be equipped with advanced technologies, materials, electronics and controls, and aerodynamics. And by 2030, the deployment of alternative methods to propel and fuel vehicles and alternative modes of transportation, including autonomous vehicles, will be well underway. What are these new technologies - how will they work, and will some technologies be more effective than others? Written to inform The United States Department of Transportation's National Highway Traffic Safety Administration (NHTSA) and Environmental Protection Agency (EPA) Corporate Average Fuel Economy (CAFE) and greenhouse gas (GHG) emission standards, this new report from the National Research Council is a technical evaluation of costs, benefits, and implementation issues of fuel reduction technologies for next-generation light-duty vehicles. Cost, Effectiveness, and Deployment of Fuel Economy Technologies for Light-Duty Vehicles estimates the cost, potential efficiency improvements, and barriers to commercial deployment of technologies that might be employed from 2020 to 2030. This report describes these promising technologies and makes recommendations for their inclusion on the list of technologies applicable for the 2017-2025 CAFE standards.

## The Jesuit Order As a Synagogue of Jews

## Jesuits of Jewish Ancestry and Purity-of-Blood Laws in the Early Society of Jesus

**BRILL** In "The Jesuit Order as a Synagogue of Jews" the author explains how Christians with Jewish family backgrounds went within less than forty years from having a leading role in the foundation of the Society of Jesus to being prohibited from membership in it. The author works at the intersection to two important historical topics, each of which attracts considerable scholarly attention but that have never received sustained and careful attention together, namely, the early modern histories of the Jesuit order and of Iberian purity of blood concerns. An analysis of the pro- and anti-converso texts in this book (both in terms of what they are claiming and what their limits are) advance our understanding of early modern, institutional Catholicism at the intersection of early modern religious reform and the new racism developing in Spain and spreading outwards.

## States of Emergency

### Cultures of Revolt in Italy from 1968 to 1978

**Verso Books** The student protests of 1968, followed by the Hot Autumn factory strikes of 1969, shook the foundations of the Italian Republic. They also prepared the way for a whole decade of intense and widespread social conflict—a decade in which militant social movements arose with new aspirations, centered on protagonists such as women, young people and the unemployed. States of Emergency provides a vivid reconstruction of the events and movements of that period—from the students of 1968 to the Autonomists of 1977. The book's title evokes both the emergence of new social subjects and the crises they provoked in the social order. But Lumley also looks at the paradoxes and contradictions of the movements, their creative potential and ultimate failure. The political debates which they initiated soon became part of the agenda of the Left internationally. Drawing on the work of theorists such as Umberto Eco, Alberto Melucci, Norberto Bobbio and Antonio Negri, States of Emergency is a vital contribution not only to Italy's social history but to contemporary political discussion.
