Over time, REDD+ initiatives have promoted changes in Brazilian political articulation, funding possibilities and mobilization of civil society, and brought more visibility to the importance of combating deforestation and forest degradation within the country. In terms of practical implementation, the national REDD+ framework is still quite limited. Further development of the national REDD+ strategy is a considerable challenge for Brazil, as it is becoming clearer that the current national political rhetoric does not consider fighting and controlling deforestation and climate change as government priorities. Several major challenges exist because weak forest resource governance, poor enforcement of the environmental legislation, social inequalities, land use conflicts, and lack of political commitment remain in the country's profile. However, international pressure on Brazil to stop deforestation might provide an opportunity for those actors who until now had little presence in the REDD+ political arena. **Essentials of Forensic Accounting** John Wiley & Sons The highly experienced authors of the Essentials of Forensic Accounting define and explain the disciplined approaches to forensic accounting that lead to a thorough knowledge of the varied specialties within forensic accounting. It serves as an international forum for scholarly and state-of-the-art research and development into all aspects of Business Education and Training. This new volume deals with several aspects of the challenge to design learning in and for a changing world. The first part concerns program development. How to build curricula that are future-proof? Principles to innovate our curricula are identified. It answers the question how we can incorporate the need for change in our thinking about curriculum-development and identify the necessary elements to incorporate in our curricula. The second part focuses on the increasing diversity of students and employees within our schools and organizations, in terms of culture, language, and perception of ability, gifts, and talents. This offers a range of opportunities, but at the same time can possibly jeopardize some processes that are taken for granted. Chapters in this part analyze the processes that play a crucial role in dealing with this diversity and identify educational practices that can help to harvest the potential that lies within this diversity. The third part of this book digs further into the possibilities that are opened up by the implementation of ICT-support in our learning environments. E-learning provides tools to adapt these environments to the needs of an increasingly diverse student-population. In the last part we focus specifically on the workplace and how learning can be designed in such a way that employees are equipped for a shifting workplace. On the one hand it is looked how training can affect performance in the workplace. Does learning transfer to the work environment? On the other hand it is questioned how one can design affordances to trigger learning in the workplace. **Jacob the Liar** Arcade Publishing Cut off from all news of the war along with thousands of fellow prisoners, Jacob Heym accidentally overhears a radio broadcast that reveals the Red Army's advancement and is forced to tell a series of lies in order to explain his knowledge. **Right to Financial Privacy Act Hearings Before the Subcommittee on Financial Institutions of the Committee on Banking, Housing and Urban Affairs, United States Senate, Ninety-fourth Congress, Second Session, on S. 1343 ...
