Financial Accounting with International Financial Reporting Standards

John Wiley & Sons While there is growing interest in IFRS within the US, interest outside the US has exploded. Weygandt's fourth edition of *Financial Accounting: IFRS* highlights the integration of more US GAAP rules, a desired feature as more foreign companies find the United States to be their largest market. The highly anticipated new edition retains each of the key features (e.g. TOC, writing style, pedagogy, robust EOC) on which users of Weygandt Financial have come to rely, while putting the focus on international companies/examples, discussing financial accounting principles and procedures within the context of IFRS, and providing EOC exercises and problems that present students with foreign currency examples instead of solely U.S. dollars.

Trends in managerial and financial accounting

Income determination and financial reporting

Springer Science & Business Media In August, 1976 the research seminar 'Decision-making in business' was organized at Nijenrode, The Netherlands School of Business. More than fifty scientists and practitioners from nine countries presented research papers in one of the six discussion groups. Some of them also presented some of their ideas in front of a large mixed audience at a one-day symposium. Many of the papers presented at Nijenrode were of such a high quality that the decision to publish a selection of them was an easy one. At the same time the new series Nijenrode studies in

business was initiated. All who were involved, the policy committee of the N ijenrode studies, the advisory and editorial board of the series, the publisher, and the organizing committee of the seminar and symposium, acclaimed the idea of publishing three volumes in the new series. A collection of eleven papers could be grouped under the title Trends in managerial and financial accounting. Another collection will be published as volume 2 of this series under the title Trends in financial decision-making, while volume 3 will consist of papers exploring the theme Trends in business ethics. The books are intended for those who are interested in new developments in the decision-making area. They are especially suitable for graduate or advanced undergraduate courses: volume 1 in managerial or financial accounting courses; volume 2 in courses on managerial finance, capital budgeting or decision making; and volume 3 in courses on business ethics or related fields.
