ANCHOR FOR ANGKOR'S CHILDREN

Paragon Publishing **In this sincere, 'bolts and all' account, Peter Keen, a technical support volunteer in Cambodia, draws attention to the work of the Angkor Hospital for Children. There is no safety net or social security in Cambodia. Families and friends are all important when times are tough. Peter Keen's photographs and descriptions give an insight into the work already achieved, and reveal a nation whose people shine out as examples of love and care. This book has been produced with the sole aim of raising sufficient funds to purchase test equipment for the service and repair of the medical equipment at Angkor Hospital for Children and to assist in further training of Biomedical Engineers at the hospital.**

TORT LAW IN NEW ZEALAND

[Kluwer Law International B.V.](#) Derived from the renowned multi-volume International Encyclopaedia of Laws, this book provides ready access to how the legal dimension of prevention against harm and loss allocation is treated in New

Zealand. This traditional branch of law not only tackles questions which concern every lawyer, whatever his legal expertise, but also concerns each person's most fundamental rights on a worldwide scale. Following a general introduction that probes the distinction between tort and crime and the relationship between tort and contract, the monograph describes how the concepts of fault and unlawfulness, and of duty of care and negligence, are dealt with in both the legislature and the courts. The book then proceeds to cover specific cases of liability, such as professional liability, liability of public bodies, abuse of rights, injury to reputation and privacy, vicarious liability, liability of parents and teachers, liability for handicapped persons, product liability, environmental liability, and liability connected with road and traffic accidents. Principles of causation, grounds of justification, limitations on recovery, assessment of damages and compensation, and the role of private insurance and social security are all closely considered. Its succinct yet scholarly nature, as well as the practical quality of the information it provides, make this book a valuable resource for lawyers in New Zealand. Academics and researchers will also welcome this very useful guide, and will appreciate its value not only as a contribution to comparative law but also as a stimulus to harmonization of the rules on tort.

READY FIRE AIM: THE MAINFREIGHT STORY

Penguin Random House New Zealand Limited **The lively, insider story of the rise and rise of New Zealand's most successful logistics company. This is the story of a company built on the belief that with passion anything is possible. As they say at Mainfreight, 'Go anywhere as long as it is forward'. Mainfreight was founded in 1977 by the visionary Bruce Plested, who set out to make the company a family, a team, where everyone has a share in the riches and where the word 'management' is banned. The Mainfreight instruction manual is short: Feel the fear but do it anyway. This is a world where budgets are deemed 'bullshit'. Why spend time preparing figures that are invariably out of date before the ink is dry? Just make more than last year. It's also a world based on generosity: Mainfreight is the backing force behind Books in Homes, and offers tertiary scholarships to the children of all its employees. Did the rise to NZX sharemarket darling all go smoothly? Not for a minute. Initially there would be catastrophic ventures in Australia and America and finally a jaw-dropping moment in Europe when Don Braid and his team made their biggest purchase ever only to see most of the turnover and half the profit walk out the door. This book takes you on a warts-and-all exploration of Mainfreight's journey from small transport company at the bottom of the world to truly successful global logistics company.**

THE MENTAL HEALTH AND SUBSTANCE USE WORKFORCE FOR OLDER ADULTS

IN WHOSE HANDS?

National Academies Press **At least 5.6 million to 8 million--nearly one in five--older adults in America have one or more mental health and substance use conditions, which present unique challenges for their care. With the number of adults age 65 and older projected to soar from 40.3 million in 2010 to 72.1 million by 2030, the aging of America holds profound consequences for the nation. For decades, policymakers have been warned that the nation's health care workforce is ill-equipped to care for a rapidly growing and increasingly diverse population. In the specific disciplines of mental health and substance use, there have been similar warnings about serious workforce shortages, insufficient workforce diversity, and lack of basic competence and core knowledge in key areas. Following its 2008 report highlighting the urgency of expanding and strengthening the geriatric health care workforce, the IOM was asked by the Department of Health and Human Services to undertake a complementary study on the geriatric mental health and substance use workforce. The Mental Health and Substance Use Workforce for Older Adults: In Whose Hands? assesses the needs of this population and the workforce that serves it. The breadth and magnitude of inadequate workforce training and personnel shortages have grown to such proportions, says the committee, that no single approach, nor a few isolated changes in disparate federal agencies or programs, can adequately address the issue. Overcoming these challenges will require focused and coordinated action by all.**

SLEEP DISORDERS AND SLEEP DEPRIVATION

AN UNMET PUBLIC HEALTH PROBLEM

National Academies Press **Clinical practice related to sleep problems and sleep disorders has been expanding rapidly in the last few years, but scientific research is not keeping pace. Sleep apnea, insomnia, and restless legs syndrome are three examples of very common disorders for which we have little biological information. This new book cuts across a variety of medical disciplines such as neurology, pulmonology, pediatrics, internal medicine, psychiatry, psychology, otolaryngology, and nursing, as well as other medical practices with an interest in the management of sleep pathology. This area of research is not limited to very young and old patients--sleep disorders reach across all ages and ethnicities. Sleep Disorders and Sleep Deprivation presents a structured analysis that explores the following:** Improving awareness among the general public and health care professionals. Increasing investment in

interdisciplinary somnology and sleep medicine research training and mentoring activities. Validating and developing new and existing technologies for diagnosis and treatment. This book will be of interest to those looking to learn more about the enormous public health burden of sleep disorders and sleep deprivation and the strikingly limited capacity of the health care enterprise to identify and treat the majority of individuals suffering from sleep problems.

MENTAL HEALTH STIGMA IN THE MILITARY

Rand Corporation Despite the efforts of both the U.S. Department of Defense and the Veterans Health Administration to enhance mental health services, many service members are not regularly seeking needed care when they have mental health problems. Without appropriate treatment, these mental health problems can have wide-ranging and negative impacts on the quality of life and the social, emotional, and cognitive functioning of affected service members. The services have been actively engaged in developing policies, programs, and campaigns designed to reduce stigma and increase service members' help-seeking behavior. However, there has been no comprehensive assessment of these efforts' effectiveness and the extent to which they align with service members' needs or evidence-based practices. The goal of this research was to assess DoD's approach to stigma reduction, how well it is working and how it might be

improved. To address these questions, RAND researchers used five complementary methods: (1) literature review, (2) a microsimulation modeling of costs, (3) interviews with program staff, (4) prospective policy analysis, and (5) an expert panel. The priorities outlined in this report identify ways in which program and policy development and research and evaluation can improve understanding of how best to efficiently and effectively provide needed treatment to service members with mental illness.

THE SCRUM GUIDE EXPLAINED

A COMPREHENSIVE ANALYSIS OF THE SCRUM GUIDE

Scrum is by far the most common agile software development framework in the world. It may also be the most misunderstood one. Many myths exist around how to use Scrum; arguably more people and institutions apply Scrum incorrectly than do it right. And this is despite there being a definitive single source of truth: The Scrum Guide. In his book *The Scrum Guide(TM) Explained*, author Moritz Knueppel is going back to the essence of Scrum and takes apart the Scrum Guide sentence by sentence to uncover Scrum's underlying concepts. He illustrates in a detailed manner how Scrum offers a carefully balanced system for continually driving product development of every kind to its maximum potential. Whether you are a software developer starting your first steps in a Scrum environment, a manager in a company employing Scrum wanting to better understand what the people around you are doing, or a seasoned Scrum Master, wishing to deepen your understanding of the core principles of Scrum, this book offers you powerful insights into the what, how and why of Scrum!

SINGLE, SAVED, AND SATISFIED

LIFE LESSONS FOR LIVING SINGLE AND HAPPY

I was born and raised in Eastern North Carolina in a Christian home. My parents belonged to a Pentecostal Holiness Church. Therefore, I really did not get to enjoy certain portions of my childhood due to all the rules of the church. When I was growing up, as it is today, no one wants to be called "the kid from the Holiness Church." With that being said, I started to do things so that I may fit in with my peers. While trying to fit in with my peers and throughout this journey we call life, I have learned some valuable lessons. In this book, I will share those lessons with you. I trust they will bless your life.
