The Brain: A User's Manual

A simple guide to the world's most complex machine

Short Books "Congratulations on the purchase of this exclusive product, tailor-made just for you. It will provide you with years of continuous existence." So begins The Brain: A User's Manual, Marco Magrini's fascinating guide to the inner workings of one of nature's most miraculous but misunderstood creations: the human brain. This user-friendly manual offers an accessible guide to the machine you use the most, deconstructing the brain into its constituent parts and showing you both how they function and how to maintain them for a longer life. Cutting through the noise of modern pop psychology, The Brain: A User's Manual is a refreshingly factual approach to self-help. Written with a deft style and wry humour, it offers tips on everything from maximising productivity to retaining memory and boosting your mood.

The Startup Owner's Manual

The Step-By-Step Guide for Building a Great Company

John Wiley & Sons More than 100,000 entrepreneurs rely on this book for detailed, step-by-step instructions on building successful, scalable, profitable startups. The National Science Foundation pays hundreds of startup teams each year to follow the process outlined in the book, and it's taught at Stanford, Berkeley, Columbia and more than 100 other leading universities worldwide. Why? The Startup Owner's Manual guides you, step-by-step, as you put the Customer Development process to work. This method was created by renowned Silicon Valley startup expert Steve Blank, co-creator with Eric Ries of the "Lean Startup" movement and tested and refined by him for more than a decade. This 608-page how-to guide includes over 100 charts, graphs, and diagrams, plus 77 valuable checklists that guide you as you drive your company toward profitability. It will help you:

- Avoid the 9 deadly sins that destroy startups' chances for success
- Use the Customer Development method to bring your business idea to life
- Incorporate the Business Model Canvas as the organizing principle for startup hypotheses
- Identify your customers and determine how to "get, keep and grow" customers profitably
- Compute how you'll drive your startup to repeatable, scalable profits.

The Startup Owner's Manual was originally published by K&S Ranch Publishing Inc. and is now available from Wiley. The cover, design, and content are the same as the prior release and should not be considered a new or updated product.

Life A User's Manual

David R. Godine Publisher Over twenty years ago, Godine published the first English translation of Georges Perec's masterpiece, Life A User's Manual, hailed by the Times Literary Supplement, Boston Globe, and others as "one of the great novels of the century." We are now proud to announce a newly revised twentieth anniversary edition of Life. Carefully prepared, with many corrections, this edition of Life A User's Manual will be the preferred reference edition for the future. Life is an unclassified masterpiece, a sprawling compendium as encyclopedic as Dante's Commedia and Chaucer's Canterbury Tales and, in its break with tradition, as inspiring as Joyce's Ulysses. Structured around a single

moment in time — 8:00 p.m. on June 23, 1975 — Perec's spellbinding puzzle begins in an apartment block in the XVIIth arrondissement of Paris where, chapter by chapter, room by room, like an onion being peeled, an extraordinary rich cast of characters is revealed in a series of tales that are bizarre, unlikely, moving, funny, or (sometimes) quite ordinary. From the confessions of a racing cyclist to the plans of an avenging murderer, from a young ethnographer obsessed with a Sumatran tribe to the death of a trapeze artist, from the fears of an ex-croupier to the dreams of a sex-change pop star to an eccentric English millionaire who has devised the ultimate pastime, *Life* is a manual of human irony, portraying the mixed marriages of fortunes, passions and despairs, betrayals and bereavements, of hundreds of lives in Paris and around the world. But the novel is more than an extraordinary range of fictions; it is a closely observed account of life and experience. The apartment block's one hundred rooms are arranged in a magic square, and the book as a whole is peppered with a staggering range of literary puzzles and allusions, acrostics, problems of chess and logic, crosswords, and mathematical formula. All are there for the reader to solve in the best tradition of the detective novel.

Solar Panel Installation Guide and User's Manual

Solar Electrical Energy

Memory Book: Smaran Shakti A Simple Practical Guide to Solar Energy Designing and Installing Photovoltaic Solar Electric Systems The Solar Electricity Handbook is a practical and straightforward guide to using electric solar panels. Assuming no previous knowledge, the book explains how solar panels work, how they can be used and explains the steps you need to take to successfully design and install a solar photovoltaic system from scratch. This books contains all basic knowledge for exmple: 1. Selection Solar panel 2. Calculation of requirement of battery, inverter etc 3. Various Types Solar Connectors 4. Solar Power Charge Controllers, 5. Wire and cables and connections 6. Junction Box and connection 7. Safety Measures 8. Government subsidy Rules 9. List of Sppliers and manufacturers in India for Solar panel, battery and other Equipments 10 Clculation of size of solar cables 11. Price list of Panels and other resourses. 12 Roof Installation 13. Ground Installation. 14 Pole installation 15. Different type of solar cell technology 16. Solar accessories and equipments and much more.

The Engineering Handbook of Smart Technology for Aging, Disability, and Independence

John Wiley & Sons An advanced look at smart technology to promote the independence of the elderly and disabled Ongoing research and advancements in technology are essential for the continuing independence of elderly and disabled persons. The Engineering Handbook of Smart Technology for Aging, Disability, and Independence provides a thorough analysis of these technologies and the needs of the elderly and disabled, including a breakdown of demographics, government spending, growth rate, and much more. Each chapter is written by an expert in his or her respective field, and gives readers unparalleled insight into the research and developments in a multitude of important areas, including: User-need analyses, classifications, and policies Assistive devices and systems for people with motor disabilities Assistive devices and systems for people with visual and hearing impairments Human-machine interaction and virtual reality Assistive robotics Technology for user mobility and object manipulation Smart homes as assistant environments A discussion of emerging standards and guidelines to build accessible devices, tools, and environments This book is an indispensable resource for researchers and professionals in computer science, rehabilitation science, and clinical engineering. It also serves as a valuable textbook for graduate students in the aforementioned fields.

Research into Design for a Connected World

Proceedings of ICoRD 2019 Volume 2

Springer This book showcases cutting-edge research papers from the 7th International Conference on Research into Design (ICoRD 2019) - the largest in India in this area - written by eminent researchers from across the world on design processes, technologies, methods and tools, and their impact on innovation, for supporting design for a connected world. The theme of ICoRD'19 has been "Design for a Connected World". While Design traditionally focused on developing products that worked on their own, an emerging trend is to have products with a smart layer that makes them context aware and responsive, individually and collectively, through collaboration with other physical and digital objects with which these are connected. The papers in this volume explore these themes, and their key focus is connectivity: how do products and their development change in a connected world? The volume will be of interest to researchers, professionals and entrepreneurs working in the areas on industrial design, manufacturing, consumer goods, and industrial management who are interested in the use of emerging technologies such as IOT, IIOT, Digital Twins, I4.0 etc. as well as new and emerging methods and tools to design new products, systems and services.

Circuits and Systems for Wireless Communications

Springer Science & Business Media This book contains revised contributions by the speakers of the 1st IEEE Workshop on Wireless Communication Circuits and Systems, held in Lucerne, Switzerland, from June 22-24, 1998. The aim of the workshop was to demonstrate the vast expertise of the CAS Society in the area of circuit and system design to the rapidly growing field of wireless communications. The workshop combined presentations by invited experts from academia and industry with panel and informal discussions. The following topics were covered: RF System Integration (single-chip systems, CMOS RF circuits), RF Front-End Circuits (CMOS RF oscillators, broadband design techniques), Wideband Conversion for Software Radio (A/D conversion issues, wideband sub-sampling, low-spurious A/D conversion), Process Technologies for Future RF Systems (Si, SiGe, GaAs, CMOS, packaging technologies), DSP for Wireless Communications (DSP algorithms, fixed-point systems, DSP for baseband applications), Blind Channel Equalization (adaptive interference suppression, design techniques, channel estimation). A carefully selected combination of tutorial-like papers as well as papers on specialized and advanced topics is included. Thus, newcomers to the field of wireless communications will benefit from the overview of emerging technologies in circuits and systems, and specialists will benefit from the thought-provoking details presented in this book.

Russia's Visionaries

Direct Speech

Cambridge Scholars Publishing This book examines the latest thinking regarding Russia's present position and its anticipated future by leading Russian philosophers, political scientists, economists, and cultural figures, to whom the author refers as "visionaries." These thinkers position Russia as a global protector of fairness and a safeguard against any single nation's world hegemony. Despite Russians' abiding tendency to underestimate and undervalue their achievements, they are increasingly coming to realize that Russia's historical record is, on the whole, outstanding. The book's 17 chapters, including many original translations of spoken discussions, argue that Russia has all the prerequisites for, and is, in fact, already well on the way toward, becoming a global Noah's Ark of Western civilization.

If It's Broke, Fix It

How To Mend Everyday Stuff

Michael O'Mara Books In this disposable age it's always refreshing to be able to fix things yourself. This is not a guide to complex DIY, rather it is handy guide for men and women to refer to when the hairdryer stops working; a strap on an irreplaceable shoulderbag has broken or your favourite jumper has shrunk in the wash. Packed with tips and tricks of the trade - for example, how to get burn marks off your pans and fix a pin on a much-loved brooch - and details on tools, materials and methods - from quick fixes to permanent solutions. The perfect book for anyone who hates our throwaway society and would much rather do it for themselves, whether it's moth-eaten holes in clothes, fixing a microwave oven, mending a leaking dishwasher or fixing your bicycle, you'll be amazed just how many things can be mended with a few tools, a little bit of patience and If It's Broke, Fix It.

Parentology

Everything You Wanted to Know about the Science of Raising Children but Were Too Exhausted to Ask

Simon and Schuster An award-winning scientist offers his unorthodox approach to childrearing: "Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions" (Amy Chua, author of Battle Hymn of the Tiger Mother). If you're like many parents, you might ask family and friends for advice

when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In *Parentology*, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley’s sassy kids show him the limits of his profession. *Parentology* teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You’ll be laughing and learning at the same time.

Springer Handbook of Automation

Springer Science & Business Media This handbook incorporates new developments in automation. It also presents a widespread and well-structured conglomeration of new emerging application areas, such as medical systems and health, transportation, security and maintenance, service, construction and retail as well as production or logistics. The handbook is not only an ideal resource for automation experts but also for people new to this expanding field.

Close Your Open Door Policy

The Contrarian Wisdom of Truly Great Leaders

Rodale Books As a serial entrepreneur, Kevin Kruse has seen time and again that the leadership practices that actually work are the opposite of what is commonly taught and implemented. *Close Your Open Door Policy* shows how a contrarian approach can be a better, faster, and easier way to succeed as a leader. Chapter by chapter, Kruse focuses on a piece of popular wisdom, then shows with real-world case studies and quantitative research that the opposite approach will lead to better results, encouraging leaders to play favorites, stay out of meetings, and, of course, close their open doors.

LEED® for Homes-- Pilot Study

Evaluation for Use in Army Family Housing

Army participation in the LEED(registered name) for Homes Pilot Program is intended to facilitate preparations and transition from SPiRiT to LEED for Homes as soon as it is ready for adoption. The pilot program will coincide with U.S. Green Building Council (USGBC) development of the LEED for Homes evaluation tool. The Office of the Assistant Chief of Staff (Installation Management) Housing Division has overall responsibility for the transition and has selected Norfolk District, Center of Standardization for Family Housing to facilitate and coordinate participation in the LEED for Homes Pilot Program. A team consisting of Army personnel experienced in Army Family Housing (AFH) and/or sustainability conducted site visits to AFH at Fort Lee, VA and Fort Huachuca, AZ. Both installations have a history of successful AFH projects and current projects under construction that used SPiRiT as a sustainability rating tool. LEED for Homes was applied to each AFH project. Further, each credit was evaluated for applicability to Army projects and its ease of application using current design guidelines. Where appropriate, feedback was provided to the USGBC regarding issues, concerns, or clarifications on particular credits. The team also defined several Innovation and Design credits that could universally apply to AFH projects.

The Immunoassay Handbook

Theory and Applications of Ligand Binding, ELISA and Related Techniques

Newnes The fourth edition of *The Immunoassay Handbook* provides an excellent, thoroughly updated guide to the science, technology and applications of ELISA and other immunoassays, including a wealth of practical advice. It encompasses a wide range of methods and gives an insight into the latest developments and applications in clinical and veterinary practice and in pharmaceutical and life science research. Highly illustrated and clearly written, this award-winning reference work provides an excellent guide to this fast-growing field. Revised and extensively updated, with over 30% new material and 77 chapters, it reveals the underlying common principles and simplifies an abundance of innovation. The *Immunoassay Handbook* reviews a wide range of topics, now including lateral flow, microsphere multiplex assays, immunohistochemistry, practical ELISA development, assay interferences, pharmaceutical applications, qualitative immunoassays, antibody detection and lab-on-a-chip. This handbook is a must-read for all who use immunoassay as a tool, including clinicians, clinical and veterinary chemists, biochemists, food technologists, environmental scientists, and students and researchers in medicine, immunology and proteomics. It is an essential reference for the immunoassay industry. Provides an excellent revised guide to this commercially highly successful technology in diagnostics and research, from consumer home pregnancy kits to AIDS testing. www.immunoassayhandbook.com is a great resource that we put a lot of effort into. The content is designed to encourage purchases of single chapters or the entire book. David Wild is a healthcare industry veteran, with experience in biotechnology, pharmaceuticals, medical devices and immunodiagnostics, which remains his passion. He worked for Amersham, Eastman-Kodak, Johnson & Johnson, and Bristol-Myers Squibb, and consulted for diagnostics and biotechnology companies. He led research and development programs, design and construction of chemical and biotechnology plants, and integration of acquired companies. Director-level positions included Research and Development, Design Engineering, Operations and Strategy, for billion dollar businesses. He retired from full-time work in 2012 to focus on his role as Editor of *The Immunoassay Handbook*, and advises on product development, manufacturing and marketing. Provides a unique mix of theory, practical advice and applications, with numerous examples Offers explanations of technologies under development and practical insider tips that are sometimes omitted from scientific papers Includes a comprehensive troubleshooting guide, useful for solving problems and improving assay performance Provides valuable chapter updates, now available on www.immunoassayhandbook.com

This guide will help you to quickly feel comfortable using your camera so that you can achieve excellent results. Topics covered include: -Menu shortcuts -Long exposures -Firmware upgrades -Hybrid autofocus system -Auto and manual focusing -Face detection -ISOless sensor -Dynamic Range expansion -Film simulations -Custom settings -RAW conversion -Movies -Self-timer -Flash -Adapted lenses -Taking Videos -And much more...

Life Cycle Tribology

31st Leeds-Lyon Tribology Symposium

Elsevier The 31st Leeds-Lyon Symposium on Tribology was held at Trinity and All Saints College in Leeds under the title "Life Cycle Tribology" from Tuesday 7th September until Friday 10th September 2004. Over the three days of presentations that followed, life cycle tribology was explored across a range of areas including automotive tribology, bearings, bio-degradability and sustainability, bio-tribology, coatings, condition monitoring, contact mechanics, debris effects, elastohydrodynamic lubrication, lubricants, machine systems,

nanotribology, rolling contact fatigue, transmissions, tribochemistry and wear and failure. Invited talks in these fields were presented by leading international researchers and practitioners, namely C.J. Hooke, J.A. Williams, R.J.K. Wood, G. Isaac, S.C. Tung, D. Price, I. Sherrington, M. Hadfield, K. Kato, R.I. Taylor, H.P. Evans, R.S. Dwyer-Joyce and H. Rahnejat.

Indian guide book: Pre and postnatal care in the USA

Clever Fox Publishing An Indian middle-aged woman goes to a foreign country to help her young daughter deliver her first baby. She narrates interesting tales of her experience preparing for this 'big event' of childbirth and then actually going through it! The book talks about Indian traditional methods of using herbs with medicinal values and authentic recipes used during pregnancy and after delivery to help heal new moms and babies to thrive. The world has become a global village and young generations are crossing their country's boundaries to settle down away from their own roots to create a home away from home. The book will be a perfect reference book for new parents who desire to use traditional age-old methods to nurturer their new baby with simple daily massage/bathing techniques or for a grandma who wishes to try her hand at basic sewing techniques for her beloved grandbabies.

Clouds in a Summer Sky

Prelude Books Welcome to Batch Magna, a place where anything might happen. And often does... Life in an old steam boat deep in the Welsh Borders holds numerous charms, but the Commander's wife Priny is suffering from arthritis, a condition not at all improved by their water-based lifestyle. The couple take up an offer from Humphrey, the squire of Batch Hall, of a straight swap: their boat, the Batch Castle, for one of the Masters' Cottages facing their beloved river. The Castle is restored to river-worthiness and starts plying successfully as the Cluny Steamboat Company to Shrewsbury and back. As a result it takes a good deal of profit away from a taxi firm in a local border town, much to the displeasure of the firm's English owner, Sidney Acton. Enlisting the aid of two corrupt Welsh councillors, Acton plots against the new venture. Only time will tell if his sabotage attempts will bear fruit or blow up in his face... What readers are saying about The Batch Magna Chronicles series: "An enchanting mixture of The Wind in The Willows and The Darling Buds of May. An England that doesn't exist but surely should." "Reading this book was like sitting down for a nice long chat with an old friend. I loved reading the Welsh village descriptions; it felt like coming home. ... I eagerly await the next instalment of the Batch Magna crew!" "I first got this book out of the local library, and then brought a copy - I wanted to read it again and again. It's a treasure, a smashing read, funny and beautifully written." "These books are such fun, darkly comic and full of great characters. ... Batch Magna is a place I would love to find, and the river sounds idyllic." "Hurrah for Batch Magna, Humphrey and friends." "I loved this book. It's lyrical and very amusing, with all the charm of an old Ealing comedy. ... More please Mr Maughan!" "What an amazing writer! I have never found any descriptive writing that has gripped me so much before." "A thoroughly enjoyable read. ... Is there another Batch Magna book on the way, please? Such a wonderfully descriptive bucolic and warmly 'human' story with echoes of the Darling Buds of May." "A wonderful, funny, well-crafted escape from everyday life. If you love writing that absorbs you into the landscape you will love this book. Every sense was satisfied with the author's beautiful descriptions of the Marches. Escape from the tarmac, concrete and relentlessness of life with this stunning book. Thank you Mr Maughan." "I absolutely loved this book and all the characters became so real to me, I just couldn't put it down."

Solar

All About

Xlibris Corporation It is the first volume about solar. Easy to follow study guide with discussions, examples and explanations on how solar works. The first section deals with how solar panels work, and how to do design systems based on individual requirements. The book explains how to establish the correct size charge controller, and its uses. Then batteries are discussed; how to do battery designs based on requirements. In terms of inverters, explanations and discussions of how inverters work, and how to determine the size of the inverter for your specific requirements is also a critical aspect within solar. There are also discussions on battery chargers. Extensive information on this section is also covered. There are energy saving tips and information on solar refrigeration, freezers, solar pumps and solar geysers. The whole book is easy to follow sequence with applied everyday examples to improve understanding, bringing theory and practise closer together. Also underlying aspects of climate change is highlighted and how to combat it. I hope everyone that reads this book will enjoy it. Enter the world of knowledge thoroughly.

Cook90

The 30-Day Plan for Faster, Healthier, Happier Meals

Little, Brown Challenge yourself to cook 90 simple meals in a month, and reboot the way you eat, cook, and feel--from the editors of Epicurious, the web's most trusted recipe site. Can you COOK90? It's easier than you think. For 30 days, challenge yourself to cook every meal--and you'll transform the way you eat and feel. The 150,000+ people who take the COOK90 challenge every year know that cooking for yourself is one of the most satisfying, effective, and easy ways to improve your wellbeing. With expert support from the editors of Epicurious, the web's most trusted recipe site, you'll say goodbye to pricey takeout, crummy pizza delivery, and fast food that's no good for you. And you'll say hello to all the benefits of home cooking: healthier and more delicious meals, a fatter wallet, a clearer mind, and sharper skills. With more than 100 recipes, strategies, and four weeks of meal plans for every way of eating, you can save time, money, and sanity with a simple promise: I will not rely on restaurants, roommates, Cups o'Noodles, or my family to feed myself. Instead, enjoy meals like: Baked Feta with Chickpeas and Greens Steak Soba Salad Braised Rotisserie Chicken with Bacon, Tomatoes, and Kale Start your day with Perfect 7-Minute Eggs or Cocoa Oats with Yogurt, Honey, and Hazelnuts And end it with a Cinnamon-Chocolate Chunk Skillet Cookie or Salted Almond Apple Crisp. And you'll do it all without upending your life. By repurposing leftovers and planning ahead, you make cooking work for your schedule, not the other way around. Take the COOK90 challenge, and become a better, faster, healthier, happier cook.

Sustainable Reverse Logistics Network

Engineering and Management

John Wiley & Sons Traditional logistical chains have enabled us to respond efficiently to the needs of customers in terms of services and products. However, the returns, rejects and by-products of these activities have been eliminated or ignored. Reverse logistics aims at valuing these products using a value creation network integrating recovery, processing, recycling, distribution or clean removal processes. In the context of sustainable development, integrating economic, social and environmental factors, these activities raise questions concerning the design of products, processes and logistic networks. Taking these considerations into account involves significant changes that affect business models as well as consumer habits. New working methods and a long-term vision are the new bases for sustainable logistic networks. The objective of this book is to supply an educational tool for engineering schools, as well as a management tool for the efficient implementation of the reverse logistics function. It brings together the knowledge acquired by the scientific community. Even if reverse logistics has been the subject of several books over the past few years, very few theories have been developed and the subject is far from being exhausted. This book proposes generic concepts and processes that can be adapted to all businesses producing goods and services and which aim to integrate reverse logistics. These processes will enable us to shed light on their complexity and to take into account all the important variables. Contents 1. Logistics Challenge. 2. Reverse Logistics Engineering. 3. Ecodesign. 4. Value Loops.

Tribology in Environmental Design 2003

John Wiley & Sons Tribology in Environmental Design is an indispensable collection of chapters exploring the life cycle of all stages of tribological issues for product design. The contributors for this edition are from a wide range of disciplines and countries ensuring a comprehensive overview of Tribology in Environment Design. This well-renowned second international conference explores the role of tribology in the context of product design and how this influences environmental, as well as product life cycle, consequences. Topics covered include: Sustainable Design Life-oriented Products Life-cycle Assessment for Optimized Products Surface Engineering Lubricants Test Methods Advanced Materials Analytical Studies

The Boat Maintenance Bible

Refit, Improve and Repair with the Experts

A&C Black The Boat Maintenance Bible is the most up to date, user-friendly and hands-on manual for boat owners of all skill levels wishing to keep their boat seaworthy and safe. Packed with detailed, exploded diagrams, helpful step-by-step photographs and detailed guidance, it provides a wealth of maintenance expertise and advice to enable anyone to maintain or repair a yacht, motorboat or a dinghy. From hull and deck maintenance, engine repairs, plumbing problems, gas leaks, sail repair, battery and wiring defects, to interior refurbishment, dinghy and trailer repair, hauling out and winterisation, it's all here. The Boat Maintenance Bible will equip everyone with the knowledge required to prevent onboard problems, carry out specialised tasks and tackle both short-term troubleshooting as well as long-term boat care. With this book to hand, you'll never need to call in the experts!

Appropriate for students of electrical engineering, computer engineering, and computer science, the book is suitable for undergraduate and graduate courses and provides balanced coverage of both theory and practical applications.

The Throwback List

Disney Electronic Content Welcome to Sandy Point, Oregon: a sleepy beach town that's home to a giant anchor statue, a sometimes-karaoke-bar, and Frosty's questionably legendary Sunday Sundae Surprise. A town Jo, Autumn, and Bianca thought they'd left far behind when they graduated high school, finally moving on to greener pastures than the midway point for tourists heading to the Goonies house. But life seldom goes according to plan. Bianca Boria-Birdy, former prom queen and valedictorian, has always been an overachiever. As she juggles managing the family tattoo parlor, caring for her grandmother, and adjusting to a new marriage, Bianca's schedule becomes stricter than ever, with no room for disruption. What she really needs is a vacation, but not even Bianca Boria-Birdy can achieve the impossible. Autumn Kelly used to be an actress. Now she teaches drama at Sandy Point High. She may have had to kiss her movie-star dreams goodbye, but molding the next generation of performers has given her life meaning in a whole new way. Until the sudden reappearance of her ex-best friend throws everything off-balance. Jo Freeman has it all together. With a cool job in Silicon Valley, connections at the trendiest fitness studios, and a down payment on her dream condo, she's well on her way to reaching every one of her goals before thirty. Or she was, before she got fired and landed right back home with her parents and teenage sister. When Jo finds an old bucket list in her childhood bedroom, it sets the three women on a path that brings them closer to one another with each task. And it just might lead to a life none of them could have planned.
