FORTY PHOTOGRAPHERS ON PRACTICE AND PROCESS

Curator and lecturer Sasha Wolf was inspired to seek out and assemble responses to these questions after hearing from countless young photographers about how they often feel adrift in their own practice, wondering if they are doing it the "right" way. The responses, from both established and newly emerging photographers, reveal there is no single path.

Ilex Press With amazing low-light capabilities, incredible definition, intelligent autofocus and a host of other features, digital cameras have now become so powerful that they have left their users behind. One hundred of Gordon's beautiful photos are given with his own expert commentary; full settings and camera details are included, and a host of tips and tricks let photographers of any level learn something from every example. The shots are taken with a wide range of cameras, and the emphasis is on getting results by improving your own skills, not wasting money on expensive equipment.

AARON SISKIND

Aaron Siskind was an artist of great originality, unprecedented in American photography. In this book the authors examine the artist's journey from one aesthetic to another, situating the work of the 1930s in the context of the Great Depression and the politicised Photo League, through to the 1940s and Siskind's attraction to vernacular and architectural photography. They explore his trajectory, while teaching at the New Bauhaus in Chicago then at the Rhode Island School of Design, towards a photography of controlled abstraction ultimately rooted in a photorealism that he never repudiated but utilised as a different way of photographing.

IT'S NOT ABOUT THE F-STOP

New Riders Jay Maisel has been hailed as one of the most brilliant and gifted photographers of all time. But he is also much more than that—he is a mentor, teacher, and trailblazer to many photographers, and a hero to those who feel Jay's teaching has changed the way they see and create their own photography. He is a living legend whose work is studied around the world, and whose teaching style and presentation garner standing ovations and critical acclaim every time he takes the stage. In his first educational book, *Light, Gesture, and Color*, Jay put his amazing insights and learning moments from a lifetime behind the lens into a book that communicated the three most important aspects of street photography: light, gesture, and color. Here, in *It's Not About the F-Stop*, Jay builds on that success to take you beyond the buttons and dials on your camera to continue to teach you how to "see" like a photographer, and how to capture the world around you in a way that

delights, intrigues, and challenges the viewer. Each page unveils something new and inspires you to rethink everything you know about the bigger picture of photography. This isn't a book about f-stops or ISOs. It's about seeing. And nobody communicates this, visually or through the written word, like Jay Maisel.
