Our Dynamic Planet Geography for the Options of the International Baccalaureate Diploma Geography Course Textbook for IB Diploma Geography covering Standard Level and Higher Level Options for Paper 1 examinations. Geophysical Hazards Minimizing Risk, Maximizing Awareness [Springer Science & Business Media](#) The International Year of Planet Earth (IYPE) was established as a means of raising worldwide public and political awareness of the vast, though frequently under-used, potential the Earth Sciences possess for improving the quality of life of the peoples of the world and safeguarding Earth's rich and diverse environments. The International Year project was jointly initiated in 2000 by the International Union of Geological Sciences (IUGS) and the Earth Science Division of the United Nations Educational, Scientific and Cultural Organisation (UNESCO). IUGS, which is a Non-Governmental Organisation, and UNESCO, an Inter-Governmental Organisation, already shared a long record of productive cooperation in the natural sciences and their application to societal problems, including the International Geoscience Programme (IGCP) now in its fourth decade. With its main goals of raising public awareness of, and enhancing research in the Earth sciences on a global scale in both the developed and less-developed countries of the world, two operational programmes were demanded. In 2002 and 2003, the Series Editors together with Dr. Ted Nield and Dr. Henk Schalke (all four being core members of the Management Team at that time) drew up outlines of a Science and an Outreach Programme. In 2005, following the UN proclamation of 2008 as the United Nations International Year of Planet Earth, the "Year" grew into a triennium (2007-2009). IB Geography Course Book For the IB diploma [OUP Oxford](#) Developed with the IB for the latest syllabus at SL and HL, this comprehensive course book is packed with topical case studies to drive critical thought. Written by an IB

team leader and workshop leader, it integrates the learner profile and includes skills development and fieldwork support, for optimal achievement. The Journal of the Royal Geographical Society ... Making a Living in Europe Human Geographies of Economic Change [Routledge](#) Will 'making a Living' remain a dream for the deprived and excluded? Jobs are one of Europe's most important problems. Employment provides the basic means of distributing wealth in society, in providing for families, and ensuring pensions for the elderly. Yet unemployment, and increasingly 'non-employment', continues at near record levels in the European Union. Making a Living in Europe shows how the culture of work has been transformed in the industrialised nations of the EU. Exploring the relationship between employment change, society and economic restructuring, the shift toward 'flexible' work for women in services, away from traditional industrial jobs for men, is demonstrated within three key sectors: business services, retailing and tourism. The outcome of change is discussed in terms of shifts of people and jobs from urban to rural areas. Europe must be understood in the context of the new Europe, of change in the USA and of global change. Drawing on examples from UK and European Regions and USA, the author challenges long-standing assumptions about changes in economy and society and highlights the need for stronger local and European policies to reduce inequality at large and contribute positively to local people's struggles to make a living in Europe. General Index to the Fourth Ten Volumes of the Journal of the Royal Geographical Society Our Planet's Urban Environments Textbook for IB Diploma Geography covering Standard and Higher Level Option 7 for Paper 1 examinations. Cambridge University Guide to Courses OCR GCSE (9-1) Geography B: Geography for Enquiring Minds [Hachette UK](#) Exam Board: OCR Level: GCSE Subject: Geography First Teaching: September 2016 First Exam: June 2018 An OCR endorsed textbook Build your students' subject knowledge and cross-disciplinary enquiry skills with this modern, topic-based approach, brought to life through clear explanations and skills-focused activities that are tailored to the new assessment requirements; produced by one of the leading Geography publishers and OCR's Publishing Partner for Geography. - Maps the content against the reformed specification, providing an easy-to-follow teaching pathway designed by an author team of experienced teachers and examiners - Equips students with the subject knowledge and up-to-date case study examples they need to maximise their potential, with opportunities to undertake developmental activities for each topic - Offers you a whole-class solution to teaching the non-tiered papers with extension activities to stretch high achievers and scaffolded questions that support lower ability students - Embeds a focus on mathematical and statistical skills throughout by including opportunities to analyse a range of maps, graphs, GIS material and data sources - Prepares students to approach assessment confidently with practice questions of varying difficulty and handy tips for successfully answering enquiry questions - Highlights possible fieldwork projects and
