## Globalization and Labour in the Twenty-First Century (Open Access)

Routledge The Open Access version of this book, available at <http://www.tandfebooks.com>, has been made available under a Creative Commons Attribution-Non Commercial-No Derivatives 3.0 license. Globalization has adversely affected working-class organization and mobilization, increasing inequality by redistribution upwards from labour to capital. However, workers around the world are challenging their increased exploitation by globalizing corporations. In developed countries, many unions are transforming themselves to confront employer power in ways more appropriate to contemporary circumstances; in developing countries, militant new labour movements are emerging. Drawing upon insights in anti-determinist Marxian perspectives, Verity Burgmann shows how working-class resistance is not futile, as protagonists of globalization often claim. She identifies eight characteristics of globalization harmful to workers and describes and analyses how they have responded collectively to these problems since 1990 and especially this century. With case studies from around the world, including Greece since 2008, she pays particular attention to new types of labour movement organization and mobilization that are not simply defensive reactions but are offensive and innovative responses that compel corporations or political institutions to change. Aging and less agile manifestations of the labour movement decline while new expressions of working-class organization and mobilization arise to better battle with corporate globalization. This book will be of interest to students and scholars of labour studies, globalization, political economy, Marxism and sociology of work.

## To Sell Is Human

# The Surprising Truth About Moving Others

Penguin Look out for Daniel Pink's new book, When: The Scientific Secrets of Perfect Timing #1 New York Times Business Bestseller #1 Wall Street Journal Business Bestseller #1 Washington Post bestseller  
From the bestselling author of Drive and A Whole New Mind, and teacher of the popular MasterClass on Sales and Persuasion, comes a surprising--and surprisingly useful--new book that explores the power of selling in our lives.  
According to the U.S. Bureau of Labor Statistics, one in nine Americans works in sales. Every day more than fifteen million people earn their keep by persuading someone else to make a purchase. But dig deeper and a startling truth emerges: Yes, one in nine Americans works in sales. But so do the other eight. Whether we're employees pitching colleagues on a new idea, entrepreneurs enticing funders to invest, or parents and teachers cajoling children to study, we spend our days trying to move others. Like it or not, we're all in sales now. To Sell Is Human offers a fresh look at the art and science of selling. As he did in Drive and A Whole New Mind, Daniel H. Pink draws on a rich trove of social science for his counterintuitive insights. He reveals the new ABCs of moving others (it's no longer "Always Be Closing"), explains why extraverts don't make the best salespeople, and shows how giving people an "off-ramp" for their actions can matter more than actually changing their minds. Along the way, Pink describes the six successors to the elevator pitch, the three rules for understanding another's perspective, the five frames that can make your message clearer and more persuasive, and much more. The result is a perceptive and practical book--one that will change how you see the world and transform what you do at work, at school, and at home.

## JFK

# Coming of Age in the American Century, 1917-1956

Random House Trade Paperbacks A NEW YORK TIMES NOTABLE BOOK OF THE YEAR • A Pulitzer Prize-winning historian takes us as close as we have ever been to the real John F. Kennedy in this revelatory biography of the iconic, yet still elusive, thirty-fifth president. "An utterly incandescent study of one of the most consequential figures of the twentieth century."—Jill Lepore, author of These Truths: A History of the United States WINNER OF THE ELIZABETH LONGFORD PRIZE • NAMED BIOGRAPHY OF THE YEAR BY The Times (London) • NAMED ONE OF THE BEST BOOKS OF THE YEAR BY The Sunday Times (London) • New Statesman • The Daily Telegraph • Kirkus Reviews By the time of his assassination in 1963, John F. Kennedy stood at the helm of the greatest power the world had ever seen, a booming American nation that he had steered through some of the most perilous diplomatic standoffs of the Cold War. Born in 1917 to a striving Irish American family that had

become among Boston's wealthiest, Kennedy knew political ambition from an early age, and his meteoric rise to become the youngest elected president cemented his status as one of the most mythologized figures in American history. And while hagiographic portrayals of his dazzling charisma, reports of his extramarital affairs, and disagreements over his political legacy have come and gone in the decades since his untimely death, these accounts all fail to capture the full person. Beckoned by this gap in our historical knowledge, Fredrik Logevall has spent much of the last decade searching for the "real" JFK. The result of this prodigious effort is a sweeping two-volume biography that properly contextualizes Kennedy amidst the roiling American Century. This volume spans the first thirty-nine years of JFK's life—from birth through his decision to run for president—to reveal his early relationships, his formative experiences during World War II, his ideas, his writings, his political aspirations. In examining these pre-White House years, Logevall shows us a more serious, independently minded Kennedy than we've previously known, whose distinct international sensibility would prepare him to enter national politics at a critical moment in modern U.S. history. Along the way, Logevall tells the parallel story of America's midcentury rise. As Kennedy comes of age, we see the charged debate between isolationists and interventionists in the years before Pearl Harbor; the tumult of the Second World War, through which the United States emerged as a global colossus; the outbreak and spread of the Cold War; the domestic politics of anti-Communism and the attendant scourge of McCarthyism; the growth of television's influence on politics; and more. *JFK: Coming of Age in the American Century, 1917-1956* is a sweeping history of the United States in the middle decades of the twentieth century, as well as the clearest portrait we have of this enigmatic American icon.

## Civic Engagement in Food System Governance

A comparative perspective of  
American and British local food

## movements

Routledge The local food movement is one of the most active of current civil engagement social movements. This work presents primary evidence from over 900 documents, interviews, and participant observations, and provides the first descriptive history of local food movement national policy achievements in the US, from 1976 to 2013, and in the UK, from 1991 to 2013, together with reviews of both the American and British local food movements. It provides a US-UK comparative context, significantly updating earlier comparisons of American, British and European farm and rural policies. The comparative perspective shows that, over time, more effective strategies for national policy change required social-movement building strategies, such as collaborative policy coalitions, capacity-building for smaller organizations, and policy entrepreneurship for joining together separate rural, farming, food, and health interests. In contrast, narrowly-defined single issue campaigns often undermined long-term policy change, even if short-term wins emerged. By profiling interviews of American and English movement leaders, policymakers, and funders, the book demonstrates that democratic participation in food policy is best supported when funders incentivize groups to work together and overcome their differences.

## Chinese People's Diplomacy and Developmental Relations with East Asia

### Trends in the Xi Jinping Era

Routledge As China takes up the mantle of a global power, its diplomatic policy has changed significantly as it assumes a role of regional leadership. Until recently, China has not tended to talk about its developmental strategy as a model for others to follow. Since the rise of Xi Jinping this has changed, and the state has become more open in sharing its developmental experiences with its neighbours. This has become an important part of China's diplomatic relations with other countries in East Asia. Beijing has also emphasized people-to-people diplomacy, with outward tourism and other exchanges of peoples seen as an important part of building stronger relations with its neighbours. The chapters in this book all address different elements of this strategy, looking at China's bilateral relationships with other East Asian countries in terms of developmental relations and the increasing mutual exposure of their citizens. This book will be of great interest to scholars of Chinese diplomacy, especially those with a particular interest in soft power.

## The Eighties

### The Decade That Transformed Australia

Black Inc. It was the era of Hawke and Keating, Kylie and INXS, the America's Cup and the Bicentenary. It was perhaps the most controversial decade in Australian history, with high-flying entrepreneurs booming and busting, torrid debates over land rights and immigration, the advent of AIDS, a harsh recession and the rise of the New Right. It was a time when Australians fought for social change - on union picket lines, at rallies for women's rights and against nuclear weapons, and as part of a new environmental movement. And then there were the events that left many scratching their heads: Joh for Canberra . . . the Australia Card . . . Cliff Young. In The Eighties, Frank Bongiorno brings all this and more to life. He uncovers forgotten stories - of factory workers proud of their skills who found themselves surplus to requirements; of Vietnamese families battling to make new lives for themselves in the suburbs. He sheds new light on 'both the ordinary and extraordinary things that happened to Australia and Australians during this liveliest of decades'. The Eighties is contemporary history at its best. 'Frank Bongiorno has successfully negotiated the minefield of Australia's political egos to write the definitive account of an inspired, infuriating decade.' - George Megalogenis

# The Intellectual Sword

# Harvard Law School, the Second Century

Harvard University Press A history of Harvard Law School in the twentieth century, focusing on the school's precipitous decline prior to 1945 and its dramatic postwar resurgence amid national crises and internal discord. By the late nineteenth century, Harvard Law School had transformed legal education and become the preeminent professional school in the nation. But in the early 1900s, HLS came to the brink of financial failure and lagged its peers in scholarly innovation. It also honed an aggressive intellectual culture famously described by Learned Hand: "In the universe of truth, they lived by the sword. They asked no quarter of absolutes, and they gave none." After World War II, however, HLS roared back. In this magisterial study, Bruce Kimball and Daniel Coquillette chronicle the school's near collapse and dramatic resurgence across the twentieth century. The school's struggles resulted in part from a debilitating cycle of tuition dependence, which deepened through the 1940s, as well as the suicides of two deans and the dalliance of another with the Nazi regime. HLS stubbornly resisted the admission of women, Jews, and African Americans, and fell behind the trend toward legal realism. But in the postwar years, under Dean Erwin Griswold, the school's resurgence began, and Harvard Law would produce such major political and legal figures as Chief Justice John Roberts, Justice Elena Kagan, and President Barack Obama. Even so, the school faced severe crises arising from the civil rights movement, the Vietnam War, Critical Legal Studies, and its failure to enroll and retain people of color and women, including Justice Ruth Bader Ginsburg. Based on hitherto unavailable sources—including oral histories, personal letters, diaries, and financial records—The Intellectual Sword paints a compelling portrait of the law school widely considered the most influential in the world.

## Putin's Labor Dilemma

## Russian Politics between Stability and Stagnation

Cornell University Press In Putin's Labor Dilemma, Stephen Crowley investigates how the fear of labor protest has inhibited substantial economic transformation in Russia. Putin boasts he has the backing of workers in the country's industrial heartland, but as economic growth slows in Russia, reviving the economy will require restructuring

the country's industrial landscape. At the same time, doing so threatens to generate protest and instability from a key regime constituency. However, continuing to prop up Russia's Soviet-era workplaces, writes Crowley, could lead to declining wages and economic stagnation, threatening protest and instability. Crowley explores the dynamics of a Russian labor market that generally avoids mass unemployment, the potentially explosive role of Russia's monotowns, conflicts generated by massive downsizing in "Russia's Detroit" (Tol'yatti), and the rapid politicization of the truck drivers movement. Labor protests currently show little sign of threatening Putin's hold on power, but the manner in which they are being conducted point to substantial chronic problems that will be difficult to resolve. Putin's Labor Dilemma demonstrates that the Russian economy must either find new sources of economic growth or face stagnation. Either scenario—market reforms or economic stagnation—raises the possibility, even probability, of destabilizing social unrest.

## Stateless Law

## Evolving Boundaries of a Discipline

Routledge This volume offers a critical analysis and illustration of the challenges and promises of 'stateless' law thought, pedagogy and approaches to governance - that is, understanding and conceptualizing law in a post-national condition. definition and role of law as an academic discipline, and hybridity in the practice and production of law. With contributions by a diverse and international group of scholars, the collection includes fourteen chapters written in English and three in French. Confronting the 'transnational challenge' posed to the traditional theoretical and institutional structures that underlie the teaching and study of law in the university, the seventeen authors of Stateless Law: Evolving Boundaries of a Discipline bring new insight to the ongoing and crucial conversation about the future shape of legal scholarship, education and practice that is emblematic of the early twenty-first century. This collection is essential reading for academics, institutions and others involved in determining the future roles, responsibilities and education of jurists, as well as for academics interested in Law, Sociology, Political Science and Education.

# External Mission

## The ANC in Exile, 1960-1990

Oxford University Press (UK) Nelson Mandela's release from prison in February 1990 was one of the most memorable moments of recent decades. It came a few days after the removal of the ban on the African National Congress; founded a century ago and outlawed in 1960, it had transferred its headquarters abroad and opened what it termed an External Mission. For the thirty years following its banning, the ANC had fought relentlessly against the apartheid state. Finally voted into office in 1994, the ANC today regards its armed struggle as the central plank of its legitimacy. External Mission is the first study of the ANC's period in exile, based on a full range of sources in southern Africa and Europe. These include the ANC's own archives and also those of the Stasi, the East German ministry that trained the ANC's security personnel. It reveals that the decision to create the Umkhonto we Sizwe (Spear of the Nation) -- guerrilla army which later became the ANC's armed wing -- as made not by the ANC but by its allies in the South African Communist Party after negotiations with Chinese leader Mao Zedong. In this impressive work, Ellis shows that many of the strategic decisions made, and many of the political issues that arose during the course of that protracted armed struggle, had a lasting effect on South Africa, shaping its society even up to the present day.

## Analytical Solutions for Extremal Space Trajectories

*Butterworth-Heinemann Analytical Solutions for Extremal Space Trajectories* presents an overall treatment of the general optimal control problem, in particular, the Mayer's variational problem, with necessary and sufficient conditions of optimality. It also provides a detailed derivation of the analytical solutions of these problems for thrust arcs for the Newtonian, linear central and uniform gravitational fields. These solutions are then used to analytically synthesize the extremal and optimal trajectories for the design of various orbital transfer and powered descent and landing maneuvers. Many numerical examples utilizing the proposed analytical synthesis of the space trajectories and comparison analyses with numerically integrated solutions are provided. This book will be helpful for engineers and researchers of industrial and government organizations, and is also a great resource for university faculty and graduate and undergraduate students working, specializing or majoring in the fields of aerospace engineering, applied celestial mechanics, and guidance, navigation and control technologies, applied mathematics and analytical dynamics, and avionics software design and development. ## Handbook of Cannabis

OUP Oxford Truly global in scope and with contributions from leading researchers around the world, *The Handbook of Cannabis* is the definitive resource on this fascinating drug. Combining scientific perspectives and clinical applications, it covers a vast array of topics, from why over the centuries cannabis has been used as a medicine, through the regulations facing those wishing to self-administer cannabis or provide cannabis-based medicines, to the chemical structure of its many constituents and the rapidly growing group of synthetic cannabinoids that are currently being used for 'legal highs'. With each chapter written by a group of one or more internationally recognised subject experts, it provides academics and researchers with authoritative scientific material on the main pharmacological actions and their effects, as well as their pharmacokinetics, metabolism, and forensic detection. In addition it also examines the complex morphology, cultivation,

harvesting, and processing of cannabis and the ways in which the plant's chemical composition can be controlled. As well as offering a raft of scientific information there is extensive coverage of cannabinoid-based medicines. Helping readers to identify and evaluate their benefits, chapters explore pharmacological actions and the effects that seem to underlie approved therapeutic uses, how they are currently used to treat certain disorders, and the ever-growing number of wide-ranging potential clinical applications. There is also coverage of both the legal and illegal sources of cannabis, including 'coffee shops' and 'cannabis dispensaries'. The complex issue of 'recreational cannabis' is also tackled. The sought-after and adverse psychological and non-psychological effects are described and discussions are included on how some adverse effects can be lessened by at least one constituent of cannabis, and that it might be possible to reduce the harm that cannabis does to some by changing current regulatory policies. The Handbook of Cannabis is a one-stop reference; essential reading for all clinicians, pharmacologists, psychologists, and psychiatrists interested in this drug, as well as those working in the field of public health.

## Fulfilling the Sacred Trust

# The UN Campaign for International Accountability for Dependent Territories in the Era of Decolonization

Cornell University Press Fulfilling the Sacred Trust explores the implementation of international accountability for dependent territories under the United Nations during the early Cold War era. Although the Western nations that drafted the UN Charter saw the organization as a means of maintaining the international status quo they controlled, newly independent nations saw the UN as an instrument of decolonization and an agent of change disrupting global political norms. Mary Ann Heiss documents the unprecedented process through which these new nations came to wrest control of the United Nations from the World War II victors that founded it, allowing the UN to become a vehicle for global reform. Heiss examines the consequences of these early changes on the global political landscape in the midst of heightened international tensions playing out in Europe, the developing world, and the UN General Assembly. She puts this anti-colonial advocacy for accountability into perspective by making connections between the campaign for international accountability in the United Nations and other postwar international reform efforts such as the anti-apartheid movement, Pan-Africanism, the Non-Aligned Movement, and the drive for global human rights. Chronicling the combative history of this campaign, Fulfilling the Sacred Trust details the global impact of the larger UN

reformist effort. Heiss demonstrates the unintended impact of decolonization on the United Nations and its agenda, as well as the shift in global influence from the developed to the developing world.

## Revisiting the Empowerment Controversy

### Black Power and Unitarian Universalism

Unitarian Universalist Association of Congregations Mark D. Morrison-Reed, the preeminent scholar of black Unitarian Universalist history, presents this long-awaited chronicle and analysis of the events of the Empowerment Controversy, which rocked Unitarian Universalism in the late sixties and continues to reverberate. It was a time of revolution, of the Civil Rights and Black Power movements. Like the country, the young Unitarian Universalist Association was forced to reckon with demands for change and found itself fractured by conflict about the implications of a commitment to racial justice. Morrison-Reed synthesizes decades of research and extensive interviews to present a nuanced and suspense-filled drama about Unitarian Universalism's great crisis of faith. As he writes, "Perhaps wisdom can be gleaned from the pain and upheaval of those years, a wisdom that will be of use today in a new era." Revisiting the Empowerment Controversy is the last book in a historical arc Morrison-Reed has traced since the publication of Black Pioneers in a White Denomination.

## Romance Fiction and American Culture

### Love as the Practice of Freedom?

Routledge Since the 1970s, romance novels have surpassed all other genres in terms of popularity in the United States, accounting for half of all mass market paperbacks sold and driving the digital publishing revolution. Romance Fiction and American Culture brings together scholars from the humanities, social sciences, and publishing to explore American romance fiction from the late eighteenth to the early twenty-first century. Essays on interracial, inspirational, and LGBTQ romance attend to the diversity of the genre, while new areas of inquiry are suggested in contextual and interdisciplinary examinations of romance authorship, readership, and publishing history, of pleasure and respectability in African American romance fiction, and of the dynamic tension between the genre and second wave feminism.

As it situates romance fiction among other instances of American love culture, from Civil War diaries to Bob Dylan's Blood on the Tracks, Romance Fiction and American Culture confirms the complexity and enduring importance of this most contested of genres.

## Rethinking the Future of Europe

### A Challenge of Governance

Springer Rethinking the Future of Europe has brought together three contrasting collections of contributions: the incrementalist perspective concerning the step by step development of Europe, the more radical reform/restructuring approach to the future of Europe, and a view of Europe from the outside.

## The Most Dangerous German Agent in America

### The Many Lives of Louis N. Hammerling

Cornell University Press On the morning of April 27, 1935, Louis N. Hammerling fell to his death from the nineteenth floor of an apartment in New York City, where he lived alone. Hammerling was one of the most influential Polish immigrants in turn-of-the-century America and the leading voice and advocate of the Eastern Europeans who had come to the country seeking a better life. He was also a pathological liar, a crook, a swindler, a ruthless entrepreneur, and a patriot—of which nation he could never decide. In the United States, Hammerling rose from the poverty of his youth to the heights of wealth and power. He was a timberman and mule driver in the Pennsylvania coal mines, an indentured worker in the Hawaiian sugar fields, one of

the major behind-the-scenes powers in the United Mine Workers, an employee of the Hearst newspaper chain, an influential figure in the Republican Party, the owner of an advertising agency that made him a millionaire, a correspondent of Theodore Roosevelt and William Howard Taft, and a senator of the Polish Republic. A Jew whose conversion to Catholicism did not protect him from anti-Semitism, Hammerling was monitored by state and federal agencies and was, in the words of his pursuers, "the most dangerous German agent in America." M. B. B. Biskupski consulted more than forty archives in four countries, using trial testimony, intelligence reports, and blackmail correspondence to reconstruct Hammerling's story. The life of this mysterious man offers a window through which to see larger themes: labor and immigration politics in late nineteenth- and early twentieth-century America, espionage during World War I, the birth of modern Polish politics, and the tragic struggle of a poor immigrant striving for success in America. Scholars and general readers alike will be interested in this fascinating book.

### American and Muslim Worlds before 1900

Bloomsbury Publishing American and Muslim Worlds before 1900 challenges the prevailing assumption that when we talk about "American and Muslim worlds", we are talking about two conflicting entities that came into contact with each other in the 20th century. Instead, this book shows there is a long and deep seam of history between the two which provides an important context for contemporary events -- and is also important in its own right. Some of the earliest American Muslims were the African slaves working in the plantations of the Carolinas and Latin America. Thomas Jefferson, a slaveholder himself, was frequently called an "infidel" and suspected of hidden Muslim sympathies by his opponents. Whether it was the sale of American commodities in Central Asia, Ottoman consuls in Washington, orientalist themes in American fiction, the uprisings of enslaved Muslims in Brazil, or the travels of American missionaries in the Middle East, there was no shortage of opportunities for Muslims and inhabitants of the Americas to meet, interact and shape one another from an early period.

## Politics at Work

# How Companies Turn Their Workers into Lobbyists

Oxford University Press Employers are increasingly recruiting their workers into politics to change elections and public policy-sometimes in coercive ways. Using a diverse array of evidence, including national surveys of workers and employers, as well as in-depth interviews with top corporate managers, Alexander Hertel-Fernandez's Politics at Work explains why mobilization of workers has become an appealing corporate political strategy in recent decades. The book also assesses the effect of employer mobilization on the political process more broadly, including its consequences for electoral contests, policy debates, and political representation. Hertel-Fernandez shows that while employer political recruitment has some benefits for American democracy-for instance, getting more workers to the polls-it also has troubling implications for our democratic system. Workers face considerable pressure to respond to their managers' political requests because of the economic power employers possess over workers. In spite of these worrisome patterns, Hertel-Fernandez found that corporate managers view the mobilization of their own workers as an important strategy for influencing politics. As he shows, companies consider mobilization of their workers to be even more effective at changing public policy than making campaign contributions or buying electoral ads. Hertel-Fernandez closes with an array of solutions that could protect workers from employer political coercion and could also win the support of majorities of Americans. By carefully examining a growing yet underappreciated political practice, Politics at Work contributes to our understanding of the changing workplace, as well as the increasing power of corporations in American politics. It is essential reading for anyone interested in the connections between inequality, public policy, and American democracy.

## The Routledge Handbook of European Integrations

Routledge The Routledge Handbook of European Integrations fills a significant gap in the European studies literature by providing crucial and groundbreaking coverage of several key areas that are usually neglected or excluded in European integration collections. Whilst still examining the largest and most influential institutions, bodies and highly-funded policy areas as acknowledged dominant topics in European studies, it crucially does so with much greater balance by devoting equal billing to areas such as culture in European integration or new technologies and their impact on the EU. Organised around three main sections - culture, technology and 'tangibles' - the book: offers an authoritative 'encyclopaedia' to 'alter
