LEARNING TO LIVE IN THE KNOWLEDGE SOCIETY

IFIP 20TH WORLD COMPUTER CONGRESS, IFIP TC 3 ED-L2L CONFERENCE, SEPTEMBER 7-10, 2008, MILANO, ITALY

Springer Science & Business Media ED-L2L, Learning to Live in the Knowledge Society, is one of the co-located conferences of the 20th World Computer Congress (WCC2008). The event is organized under the auspices of IFIP (International Federation for Information Processing) and is to be held in Milan from 7th to 10th September 2008. ED-L2L is devoted to themes related to ICT for education in the knowledge society. It provides an international forum for professionals from all continents to discuss research and practice in ICT and education. The event brings together educators, researchers, policy makers, curriculum designers, teacher educators, members of academia, teachers and content producers. ED-L2L is organised by the IFIP Technical Committee 3, Education, with the support of the Institute for Educational Technology, part of the National Research Council of Italy. The Institute is devoted to the study of educational innovation brought about through the use of ICT. Submissions to ED-L2L are published in this conference book. The published papers are devoted to the published conference themes: Developing digital literacy for the knowledge society: information problem solving, creating, capturing and transferring knowledge, commitment to lifelong learning Teaching and learning in the knowledge society, playful and fun learning at home and in the school New models, processes and systems for formal and informal learning environments and organisations Developing a collective intelligence, learning together and sharing knowledge ICT issues in education - ethics, equality, inclusion and parental role Educating ICT professionals for the global knowledge society Managing the transition to the knowledge society

STORIES OF YOUNG REFUGEES IN SOUTH AFRICA

New Africa Books

GOING TO UNIVERSITY. THE INFLUENCE OF HIGHER EDUCATION ON THE LIVES OF YOUNG SOUTH AFRICANS

THE INFLUENCE OF HIGHER EDUCATION ON THE LIVES OF YOUNG SOUTH AFRICANS

African Books Collective Around the world, more young people than ever before are attending university. Student numbers in South Africa have doubled since democracy and for many families, higher

education is a route to a better future for their children. But alongside the overwhelming demand for higher education, questions about its purposes have intensified. Deliberations about the curriculum, culture and costing of public higher education abound from student activists, academics, parents, civil society and policy-makers. We know, from macro research, that South African graduates generally have good employment prospects. But little is known at a detailed level about how young people actually make use of their university experiences to craft their life courses. And even less is known about what happens to those who drop out. This accessible book brings together the rich life stories of 73 young people, six years after they began their university studies. It traces how going to university influences not only their employment options, but also nurtures the agency needed to chart their own way and to engage critically with the world around them. The book offers deep insights into the ways in which public higher education is both a private and public good, and it provides significant conclusions pertinent to anyone who works in – and cares about – universities.

SOCIAL JUSTICE AND TRANSFORMATIVE LEARNING

CULTURE AND IDENTITY IN THE UNITED STATES AND SOUTH AFRICA

Routledge The similarities between the United States and South Africa with respect to race, power, oppression and economic inequities are striking, and a better understanding of these parallels can provide educational gains for students and educators in both countries. Through shared experiences and perspectives, this volume presents scholarly work from U.S. and South African scholars that advance educational practice in support of social justice and transformative learning. It provides a comprehensive framework for developing transformational learning experiences that facilitates leadership for social justice, and a deeper understanding of the factors influencing personal, national and global identity.

RESEARCH IN EDUCATION

RESOURCES IN EDUCATION

EDUCATION IN THE EUROPEAN UNION: POST-2003 MEMBER STATES

Bloomsbury Publishing The volume provides a comprehensive reference resource for education in the countries that joined the European Union between the signing of the Treaty of Nice to the present time: Bulgaria, Croatia, Cyprus, the Czech Republic, Estonia, Hungary, Latvia, Lithuania, Malta, Poland, Romania, Slovakia and Slovenia. Many of these countries have previously been under the influence of the Soviet Union and are moving through transitional phases towards more western models. The chapters in this volume, written by regional experts, examine the educational heritage of these countries and how these education systems evolved in response to changing national needs, European agreements including the Treaty of Nice and The Bologna Process, and international evaluations such as the Programme for International Student Assessment (PISA). The chapters on Cyprus and Malta show the very special circumstances of these two Mediterranean islands and the international influences that have underpinned their developments in education.

TOURISM AND HOSPITALITY STUDIES

Peter Lang D This book discusses "tourism and hospitality" from different perspectives and disciplines. In addition, this book, considering the tourism and hotel management terminology, is expected to be a source book for the theoretical and practical scientific studies in the fields which is in close relationship such as gastronomy, recreation and marketing.

SOUTH AFRICAN CURRICULUM REFORM

EDUCATION FOR ACTIVE CITIZENSHIP

The changing societal context in South Africa (SA) has necessitated curriculum reform to deal with the challenges of education, from apartheid to democracy, with the aim of promoting active citizenship education. The aim of the paper is thus to illuminate to what extent the Grade 11 Life Orientation (LO) curriculum prepares learners for active citizenship in a democratic South Africa. The research on citizenship education adopted a qualitative interpretive approach and a case study as the research design. The findings suggest that there is a lack of knowledge and understanding of concepts relating to active citizenship which constrain effective preparation of learners for active citizenship in a new democracy. Recommendations refer to a focus on curriculum development and a framework to inform active citizenship policies and structures applicable to the education system. [For the complete Volume 14, Number 1 proceedings, see ED568088.].

MY CHILDREN! MY AFRICA! (TCG EDITION)

Theatre Communications Group The search for a means to an end to apartheid erupts into conflict between a black township youth and his "old-fashioned" black teacher.

HOW PEOPLE LEARN II

LEARNERS, CONTEXTS, AND CULTURES

National Academies Press There are many reasons to be curious about the way people learn, and the past several decades have seen an explosion of research that has important implications for individual learning, schooling, workforce training, and policy. In 2000, How People Learn: Brain, Mind, Experience, and School: Expanded Edition was published and its influence has been wide and deep. The report summarized insights on the nature of learning in school-aged children; described principles for the design of effective learning environments; and provided examples of how that could be implemented in the classroom. Since then, researchers have continued to investigate the nature of learning and have generated new findings related to the neurological processes involved in learning, individual and cultural variability related to learning, and educational technologies. In addition to expanding scientific understanding of the mechanisms of learning and how the brain adapts throughout the lifespan, there have been important discoveries about influences on learning, particularly sociocultural factors and the structure of learning environments. How People Learn II: Learners, Contexts, and Cultures provides a much-needed update incorporating insights gained from this research over the past decade. The book expands on the foundation laid out in the 2000 report and takes an in-depth look at the constellation of influences that affect individual learning. How People Learn II will become an indispensable resource to understand learning throughout the lifespan for educators of students and adults.

SELF-RELIANCE

THE UNPARALLELED VISION OF PERSONAL POWER FROM AMERICA'S GREATEST TRANSCENDENTAL PHILOSOPHER

HBG The Extraordinary Manifesto of Independent Living -Newly Abridged and Introduced in this Powerful Condensation Self-Reliance is a life-changing experience-its message of nonconformity, self-expression, and personal independence can awaken you to a new, and better, way of living. Now, historian and New Thought scholar Mitch Horowitz has deftly and faithfully retained the most powerful ideas of Ralph Waldo Emerson's original classic, and reintroduced this work in this one-of-a-kind condensation. Listenable within the space of an average commute or lunch hour, the experience of Self-Reliance may represent a true turning point in your life.

STRENGTHENING FORENSIC SCIENCE IN THE UNITED STATES

A PATH FORWARD

National Academies Press Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. Strengthening Forensic Science in the United States: A Path Forward provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. Strengthening Forensic Science in the United States gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

THE PSYCHOLOGY OF PANDEMICS

PREPARING FOR THE NEXT GLOBAL OUTBREAK OF INFECTIOUS DISEASE

Pandemics are large-scale epidemics that spread throughout the world. Virologists predict that the next pandemic could occur in the coming years, probably from some form of influenza, with potentially devastating consequences. Vaccinations, if available, and behavioral methods are vital for stemming the spread of infection. However, remarkably little attention has been devoted to the psychological factors that influence the spread of pandemic infection and the associated emotional distress and social disruption. Psychological factors are important for many reasons. They play a role in nonadherence

to vaccination and hygiene programs, and play an important role in how people cope with the threat of infection and associated losses. Psychological factors are important for understanding and managing societal problems associated with pandemics, such as the spreading of excessive fear, stigmatization, and xenophobia that occur when people are threatened with infection. This book offers the first comprehensive analysis of the psychology of pandemics. It describes the psychological reactions to pandemics, including maladaptive behaviors, emotions, and defensive reactions, and reviews the psychological vulnerability factors that contribute to the spreading of disease and distress. It also considers empirically supported methods for addressing these problems, and outlines the implications for public health planning.

THE COMPLETE GUIDE TO SERVICE LEARNING

PROVEN, PRACTICAL WAYS TO ENGAGE STUDENTS IN CIVIC RESPONSIBILITY, ACADEMIC CURRICULUM, & SOCIAL ACTION

Free Spirit Publishing This project-based guide is a blueprint for service learning—from getting started to assessing the experience—and integrates the K-12 Service-Learning Standards for Quality Practice. It provides ideas for incorporating literacy into service learning and suggestions for creating a culture of service. An award-winning treasury of activities, ideas, annotated book recommendations, author interviews, and expert essays—all presented within a curricular context and organized by theme. Digital Content contains all of the planning and tracking forms from the book plus bonus service learning plans, and more.

RESEARCH IN EDUCATION

TITLE INDEX, ERIC ED ACCESSIONS FILE

ORIENTALISM

Vintage More than three decades after its first publication, Edward Said's groundbreaking critique of the West's historical, cultural, and political perceptions of the East has become a modern classic. In this wide-ranging, intellectually vigorous study, Said traces the origins of "orientalism" to the centuries-long period during which Europe dominated the Middle and Near East and, from its position of power, defined "the orient" simply as "other than" the occident. This entrenched view continues to dominate western ideas and, because it does not allow the East to represent itself, prevents true understanding. Essential, and still eye-opening, *Orientalism* remains one of the most important books written about our divided world.

HOW PEOPLE LEARN

BRAIN, MIND, EXPERIENCE, AND SCHOOL: EXPANDED EDITION

National Academies Press First released in the Spring of 1999, *How People Learn* has been expanded to show how the theories and insights from the original book can translate into actions and practice, now making a real connection between classroom activities and learning behavior. This edition includes far-reaching suggestions for research that could increase the impact that classroom teaching has on actual learning. Like the original edition, this book offers exciting new research about the mind and the brain that provides answers to a number of compelling questions. When do infants begin to learn? How do experts learn and how is this different from non-experts? What can teachers and schools do—with curricula, classroom settings, and teaching methods—to help children learn most effectively? New evidence from many branches of science has significantly added to our understanding of what it means to know, from the neural processes that occur during learning to the influence of culture on what people see and absorb. *How People Learn* examines these findings and their implications for what we teach, how we teach it, and how we assess what our children learn. The book uses exemplary teaching to illustrate how approaches based on what we now know result in in-depth learning. This new knowledge calls into question concepts and practices firmly entrenched in our current education system. Topics include: How learning actually changes the physical structure of the brain. How existing knowledge affects what people notice and how they learn. What the thought processes of experts tell us about how to teach. The amazing learning potential of infants. The relationship of classroom learning and everyday settings of community and workplace. Learning needs and opportunities for teachers. A realistic look at the role of technology in education.

SOUTH AFRICAN EDUCATION POLICY REVIEW, 1993-2000

Heinemann Educational Books The South African Education Policy Review is an invaluable historical archive. It is a source book on policies, conflicts, developments and perspectives on education policy in the period 1993 to 2000. Drawing from a selection of articles from the successful Quarterly Reviews of Education and Training produced by the Education Policy Unit of the University of Witwatersrand,

this book provides readers with detailed accounts of educational changes in South Africa over the past decade. It reflects upon significant events, trends and debates and provides insightful analysis of this extremely momentous period of South Africa's history.
