Getting Skills Right: South Africa

OECD Publishing This report identifies effective strategies to tackle skills imbalances in South Africa.

Industry 4.0 – Shaping The Future of The Digital World

Proceedings of the 2nd International Conference on Sustainable Smart Manufacturing (S2M 2019), 9–11 April 2019, Manchester, UK

CRC Press The City of Manchester, once the birthplace of the 1st Industrial Revolution, is today a pioneering hub of the 4th Industrial Revolution (Industry 4.0), offering Industry 4.0 solutions in advanced materials, engineering, healthcare and social sciences. Indeed, the creation of some of the city's greatest academic institutions was a direct outcome of the industrial revolution, so it was something of a homecoming that the Sustainable Smart Manufacturing (S2M) Conference was hosted by The University of Manchester in 2019. The conference was jointly organised by The University of Manchester, The University of Lisbon and The Polytechnic of Leiria – the latter two bringing in a wealth of expertise in how Industry 4.0 manifests itself in the context of sustainably evolving, deeply-rooted cities. S2M-2019 instigated the development of 61 papers selected for publication in this book on areas of Smart Manufacturing, Additive Manufacturing and Virtual Prototyping, Materials for Healthcare Applications and Circular Economy, Design Education, and Urban Spaces.

Marking Matric

Colloquium Proceedings

HSRC Press The past ten years in South Africa has seen many changes in education - the creation of a single department of education; common examinations for all learners in public schools in the country, a new outcomes based education curriculum which was introduced to learners in the general education and training phase since 1998 and will be introduced to the further education and training phase from 2006. To evaluate the success of these changes South African researchers still use the indicator of student achievement. The matriculation examination is the visible, high profile and public performance indicator. Every year parents, learners, teachers, researchers, government officials, policymakers, and the general public get involved in the debate around the matric examination with the most frequently asked questions being - Did the pass rate go up? Are standards dropping? Are the results real or have they been manipulated? How is our education system doing? Are we meeting the development goals? What should the matriculation examination of the future look like? participants from government (national and provincial).

Inequality and Development Challenges

BRICS National Systems of Innovation

Taylor & Francis This series of books brings together results of an extensive research programme on aspects of the national systems of innovation (NSI) in the five BRICS countries — Brazil, Russia, India, China, and South Africa. It provides a comprehensive and comparative examination of the challenges and opportunities faced by these dynamic and emerging economies. In discussing the impact of innovation with respect to economic, geopolitical, socio-cultural, institutional, and technological systems, it reveals the possibilities of new development paradigms for equitable and sustainable growth. This volume analyses the co-evolution of inequality and NSI across the BRICS economies. It reveals the multi-dimensional character of inequality, in going beyond its income aspect to include assets, access to basic services, infrastructure, knowledge, race, gender, ethnicity and geographic location. In advancing valuable policy recommendations, the book argues that inequalities must be factored in development strategies given that benefits of innovation are not automatically distributed equally. Original and detailed data, together with expert analyses on wide-ranging issues, make this book an invaluable resource for researchers and scholars in economics, development studies and political science, in addition to policy-makers and development practitioners interested in the BRICS countries.

South African National Bibliography

Growing Up in an Urbanizing World

Routledge Half the world's children live in cities and the proportion is growing. Their environment critically determines their futures and the world they will make as adults. This text, by an interdisciplinary team of international child-environment authorities, explores how crucial the relationship of the young and their surroundings is. Covering eight countries, it shows the enormous benefits - for them, for the wider society and for the future - of involving children, especially from underprivileged communities, in planning and implementing urban improvements. It continues and updates Kevin Leech's pioneering 1970s MIT project, *Growing Up in Cities*.

Information Systems and Technologies to Support Learning

Proceedings of EMENA-ISTL 2018

Springer This book features a selection of articles from the second edition of the conference Europe Middle East & North Africa Information Systems and Technologies to Support Learning 2018 (EMENA-ISTL'18), held in Fez, Morocco between 25th and 27th October 2018. EMENA-ISTL'18 was a global forum for researchers and practitioners to present and discuss recent findings and innovations, current trends, professional experiences and challenges in information systems & technologies to support learning. The main topics covered are: A) information systems technologies to support education; B) education in science, technology, engineering and Mathematics; C) emerging technologies in education learning innovation in the digital age; D) software systems, architectures, applications and tools; E) multimedia systems and applications; F) computer communications and networks; G) IOT, smart cities and people, wireless, sensor and ad-hoc networks; H) organizational models and information systems and technologies; I) human-computer interaction; J) computers & security, ethics and data-forensic; K) health informatics, and medical informatics security; L) information and knowledge management; M) big data analytics and applications, intelligent data systems, and machine learning; N) artificial intelligence, high performance computing; O) mobile, embedded and ubiquitous systems; P) language and image processing, computer graphics and vision; and Q) the interdisciplinary field of fuzzy logic and data mining.

Mindset

The New Psychology of Success

Random House The updated edition of the bestselling book that has changed millions of lives with its insights into the growth mindset "Through clever research studies and engaging writing, Dweck illuminates how our beliefs about our capabilities exert tremendous influence on how we learn and which paths we take in life."—Bill Gates, *GatesNotes* After decades of research, world-renowned Stanford University psychologist Carol S. Dweck, Ph.D., discovered a simple but groundbreaking idea: the power of mindset. In this brilliant book, she shows how success in school, work, sports, the arts, and almost every area of human endeavor can be dramatically influenced by how we think about our talents and abilities. People with a fixed mindset—those who believe that abilities are fixed—are less likely to flourish than those with a growth mindset—those who believe that abilities can be developed. *Mindset* reveals how great parents, teachers, managers, and athletes can put this idea to use to foster outstanding accomplishment. In this edition, Dweck offers new insights into her now famous and broadly embraced concept. She introduces a phenomenon she calls false growth mindset and guides people toward adopting a deeper, truer growth mindset. She also expands the mindset concept beyond the individual, applying it to the cultures of groups and organizations. With the right mindset, you can motivate those you lead, teach, and love—to transform their lives and your own.

Tourism and Hospitality Studies

Peter Lang D This book discusses "tourism and hospitality" from different perspectives and disciplines. In addition, this book, considering the tourism and hotel management terminology, is expected to be a source book for the theoretical and practical scientific studies in the fields which is in close relationship such as gastronomy, recreation and marketing.

The Indian Ocean Newsletter

Growing Up in an Urbanising World

Unesco More than half of all children in industrialised countries live in urban areas, and the same will be true in the developing world in the near future. Yet, by almost all indicators, cities are failing to meet the needs of young people, prejudicing their chances as adults. Written by a team of experts from the fields of urban planning, architecture, geography, anthropology, psychology and environmental education, this book analyses the results of a UNESCO project which looks at the effects on young people of their urban surroundings, based on case studies from eight countries (including Australia, India, South Africa, the UK and the USA). This study places a new emphasis on the active participation of young people in the planning, design and implementation of urban improvements, and recommends policies and practices that will make cities more responsive to the needs of children, adolescents and their families.

The Choice Wine Buying Guide 2003

The Choice Wine Buying Guide 2004 is the result of the widest wine test ever conducted by Choice. Now in its third year, the guide has established itself as a totally independent and reliable guide to over 400 of the most popular and best value wines available in Australia. Seasoned wineophiles and novices alike will appreciate The Choice Wine Buying Guide 2004. It includes a score out of 20 and taster's notes for each wine. From a panel of 16, each wine was tasted by at least four experts in the Australian wine industry--winemakers, retailers, educators and consultants--bringing a true range of experience and expectation to the process. You'll be amazed at the results. There are some great medal quality wines on the market for under \$15. And as for the long-held belief that you should drink red wine with red meat, and white wine with white meat--read this book and you'll see that it pays to think outside the square when it comes to matching wine with food. The special recommendations section features a vintner's dozen wines considered great value and great quality. No boutique or difficult-to-find wines were tested for this book, so most of them will be found at the local bottle shop.

Practical Cooking for Babies and Toddlers

Practical Cooking for Babies and Toddlers contains more than 100 delicious recipes for babies over six months of age. Using a minimum of ingredients and step-by-step practical instructions, recipes are given for breakfasts, light and main meals, vegetables and sauces, desserts, snacks, and party foods. They are set out one to a page in an easy-to-read format and can be readily adapted to suit the rest of the family. Each recipe is marked with clear symbols showing the age groups it is suitable for, and whether or not it can be frozen or cooked in a microwave. The book includes nutrition and hygiene information and a section called 'Playtime', which gives recipes for useful and fun things to make, such as noodle necklaces and finger paint.

Defining Moments

Experiences of Black Executives in South Africa's Workplace

University of Kwazulu Natal Press Black professionals in business have become an important grouping in South African society. But this is a relatively recent development. *Defining Moments* presents the stories of three decades of black executives, drawing on significant aspects of management theory and practice in the context of the changing socio-economic conditions that prevailed in each decade. The first generation of black professionals who braved the corporate world in the 1970s was handicapped by Bantu Education and apartheid legislation, but they were imbued with a vigorous culture of debate born of the struggle. During the 1980s they increased in numbers and included black females with qualifications in commerce and finance. The 1990's generation was supported by changes in the political landscape in South Africa which gave birth to the country's new democracy and universally admired Constitution. This book offers the experiences and attitudes of black executives of the past three decades to future generations and invites professionals to use this book as a tool to create a better understanding and bridge the gap between cultures.

The New Tribe

Heinemann From best-selling author Holly Webb comes a brand new series full of mystery and intrigue following the adventures of a very determined heroine and her dog! Holly Webb fans will be thrilled to pieces to discover the adventures of Maisie Hitchens, the pluckiest little detective in Victorian London. Maisie Hitchens lives in her grandmother's boarding house, longing for adventure. She idolizes the famous detective, Gilbert Carrington, and follows his every case. But Maisie is about to be given the opportunity of a lifetime: her own mystery to solve! In the first book in this fantastic new series, Maisie rescues a puppy in peril whilst running an errand, and adopts him. She decides to investigate the puppy's original cruel owner, but instead gets tangled up in an intriguing plot involving stolen sausages, pilfered halfpennies and a fast-paced bicycle chase. The streets of Victorian London are never safe, but Maisie's on the case!
