### The Zenith Trans-Oceanic

### The Royalty of Radios

Schiffer Pub Limited **The previously untold story of the Zenith Trans-Oceanic, the world's most romantic and expensive series of portable radios. Long a companion of kings, presidents, transoceanic yachtsmen and world explorers, the Trans-Oceanic was also carried into battle by American troops in three wars. Its great popularity in spite of a very high price can be laid at the feet of several generations of armchair travelers who used the shortwave capabilities of the Trans-Oceanic as a window on the world. With access to the Zenith corporate archives and their long experience as radio enthusiasts and writers for both the popular and scholarly press, Professors Bryant and Cones present the engrossing stories of the development and use of the Trans-Oceanic throughout its forty year life. They present a wealth of never-before published photographs, documents and information concerning these fascinating radios, their collection, preservation and restoration.**

### A Girl Made of Dust

Open Road + Grove/Atlantic **A “beautifully written, lyrical . . . completely believable” prize-winning novel about a girl’s coming of age in war-torn Lebanon (Publishers Weekly). In her peaceful town outside Beirut, Ruba is slowly awakening to the shifting contours within her household: hardly speaking and refusing to work, her father has inexplicably withdrawn**

from his family in favor of his favorite armchair; her once-youthful mother looks so sad that Ruba imagines her heart must have withered like a fig in the heat; and Ruba's brother, Naji, is spending less time with Ruba than he is with older friends, some of whom carry guns. In trying to salvage her family, Ruba uncovers a secret from her father's past. It sends her on a journey far from the fantasies of youth and into a brutal reality where men kill in the name of faith and race, old wrongs remain unforgiven, and where nothing less than self-sacrifice and unity can offer survival. But as Israeli troops invade Beirut and danger moves ever closer, Ruba realizes that she alone may not be able to keep her loved ones safe. She must first save her father. "Exquisitely affecting . . . page-turningly suspenseful . . . A Girl Made of Dust is equally gripping as a poignant family drama and as a visceral depiction of living with war literally crashing on your doorstep" (Words Without Borders). With its "delightful and precocious narrator [reminiscent of] Scout in To Kill a Mockingbird," Abi-Ezzi captures both a country and a childhood plagued by a conflict that even at its darkest and most threatening, carries the promise of healing and retribution (Christian Science Monitor).

## Oxidative Stress in Lung Diseases

## Volume 1

[Springer Nature](#) This first volume of the comprehensive, two-volume work on oxidative stress in lung disease introduces the molecular mechanisms, and the role of oxidants in the progression of different lung diseases. The lungs of humans and animals are under constant threat from oxidants from either endogenous (e.g. in situ metabolic reactions) or exogenous sources (e.g. air pollutants). Further, oxidative stress causes the oxidation of proteins, DNA and lipids, which in turn generates secondary metabolic products. The book consists of sections, each focusing on different aspects of oxidant-mediated lung diseases. As such it is a unique reference resource for postgraduate students, biomedical researchers and also for the clinicians who are interested in studying and understanding oxidant-mediated lung diseases. The second volume will incorporate other aspects of

oxidant-mediated lung diseases, including prevention and therapeutics.

## Light Pollution as a New Risk Factor for Human Breast and Prostate Cancers

Springer Science & Business Media **Humans are diurnal organisms whose biological clock and temporal organization depend on natural light/dark cycles. Changes in the photoperiod are a signal for seasonal acclimatization of physiological and immune systems as well as behavioral patterns. The invention of electrical light bulbs created more opportunities for work and leisure. However, exposure to artificial light at night (LAN) affects our biological clock, and suppresses pineal melatonin (MLT) production. Among its other properties, MLT is an antioncogenic agent, and therefore its suppression increases the risks of developing breast and prostate cancers (BC&PC). To the best of our knowledge, this book is the first to address the linkage between light pollution and BC&PC in humans. It explains several state-of-the-art theories, linking light pollution with BC&PC. It also illustrates research hypotheses about health effects of light pollution using the results of animal models and population-based studies.**

## The Hidden Inheritance

Xlibris Corporation **The consequences of drug use, whether illicit or prescribed. Consequences that can be enduring, lifelong, even carry through generations. Yet few of us have the time to consider them as we live in the heat of our own daily lives. I have seen this in action, watched events while they happened, seen it unfold, lived through the results, and unfortunately am observing the ongoing calamities of it all, still today. It is not fun to watch but not mine to fix. I was and am an observer, a recorder, merely that, out of the action, incapable of altering the results. My wife made a great point on this novels subject. Drug use she said is a leveler. It brings people down the lowest common denominator. What a concept! How right on is that statement! Drugs affect the rich, the poor, the famous, and the infamous in every country and nationality on this earth. If you are on the upscale end drugs keep you there. The users life contribution to humanity is likely to be nothing, but the cost to the user, their family and friends in physical, emotional, and fiscal terms expensive and of course dangerous, because it may also kill you. I have put these observations into this novel hoping that readers can identify with the characters, watch them grow and suffer through the consequences of their actions unaware of the effect of their lives and on others.**

## The Emily Dickinson Collection

Graphic Arts Books **The Emily Dickinson Collection (2021) compiles some of the best-known works of an icon of American poetry. Out of nearly two-thousand poems discovered after her death, less than a dozen appeared in print during Dickinson's lifetime. Drawn from such influential posthumous volumes as Poems (1902) and The Single Hound (1914), The Emily Dickinson Collection captures the spiritual depths, celebratory heights, and impenetrable mystery of Dickinson's poetic gift. "Fame is a fickle food / Upon a shifting plate, / Whose table once a Guest, but not / The second time, is set." Deeply aware of the fleeting nature of fame, Dickinson—whose reputation in life was as a lonely eccentric who rarely, if ever, left home—seems to provide some clarity as to why publication so often eluded her. Having published just ten poems in her lifetime, Dickinson continued to write in solitude until her final years. Her final word on fame is a warning, perhaps, for poets whose fate would differ from her own: "Men eat of it and die." Despite her admonishing tone, she found space elsewhere to muse on the nature of literary achievement, recognizing that obscurity could incidentally produce the conditions for a poet to produce their most vital work: "Success is counted sweetest / By those who ne'er succeed. / To comprehend a nectar / Requires sorest need." Throughout her life, Emily Dickinson showed a profound respect for the mysteries of worldly existence. In her poems, this creates an atmosphere of prayer and contemplation, a search for something beyond the simple answers: "Some things that fly there be, — / Birds, hours, the bumble-bee: / Of these no elegy." Amid such fleeting things, she catches a glimpse of eternity. With a beautifully designed cover and professionally typeset manuscript, this edition of The Emily Dickinson Collection is a classic of American poetry reimagined for modern readers.**

If you want to pimp out your rig, then this book is a must-have. No other book combines PC mods and overclocking into one, indispensable book. Best of all, this book was written by the two top voices in PC hardware technology - Maximum PC and Que! First, we show you to cook up your idea, spec it out, gather the tools for the job, prepare your workshop and complete your mod without injuring yourself or setting your workshop ablaze. For beginners, we'll first show you how to choose the best off-the-shelf enclosures for "simple" modding projects, and later we'll show you how you can let your imagination run wild, creating kick ass mods from the most unusual objects. Along the way, we show you - with hundreds of full-color photos - how to cut case windows, paint your rig at home, add trick fans, install dazzling interior lights, install custom cables, and how to mod your PC's front-panel. Once you have all of the hardcore skills down, we dive into three mod projects, which show you, step-by-step, how to build a mod from an everyday, garden-variety PC case, to creating a mod from an object you found around the house or at the hardware store, to building a mod from scratch. Each of these projects is explained in fine detail, with full-color photos that show you exactly how to do it. We then attack more performance-oriented hardware hacking, such as installing exotic cooling, overclocking your CPU frequency, and tweaking your BIOS and video card settings. Throughout the book, we highlight some of the best mods from Maximum PC readers.
