DESIGNING THE DOLL

FROM CONCEPT TO CONSTRUCTION

C&T Publishing Inc The author of *Anatomy of a Doll* "gives us a gift by distilling the spirits found in doll/figure art . . . then explains the fundamentals to pave the way" (Barbara Campbell, editor of *Soft Dolls & Animals!*). Advance your dollmaking skills with this in-depth guide by master-dollmaker Susanna Oroyan! Susanna introduces you to her concept of "imaginative engineering" with a collection of design directions and technical processes that will help your ideas translate into reality. Expands on concepts presented in *Anatomy of a Doll* and *Fantastic Figures*. Covers a wide variety of construction methods, such as applications of wire armature in body construction, general concepts of mold making, sculpture mechanics, in-depth discussion of jointed figures, and methods of assembling your doll. More than 250 full-color photos of dolls from 130 of the world's top doll artists. Over 200 detailed illustrations. Explains elements of design, such as focal point, scale, harmony, style, and the use of color, texture, and pattern. Learn techniques of proportion for working with the human figure. An excellent technical resource and reference book that will teach you how to develop ideas, then construct advanced art figures or dolls. "The doll world has only just recovered from the excitement of having *Anatomy of a Doll* which showed us what was possible. Now we can learn to get it with this new effort, the fabulous *Designing the Doll*. Thank you, Susanna, where would we be without you?" —Elinor Peace Bailey, author of *Storytelling with Dolls* "Demystifies the creation of dolls by offering techniques, basic construction and some very good thoughts on design . . . Filled with diagrams and color photos of dolls from some of the top contemporary doll-makers, inspiration is on every page." —Polymer Clay

BOLD & BEAUTIFUL PAPER FLOWERS

MORE THAN 50 EASY PAPER BLOOMS AND GORGEOUS ARRANGEMENTS YOU CAN MAKE AT HOME

These amazingly simple step-by-step tutorials inspire crafters to decorate their lives with brightly colored and boldly textured flowers that never die. Through her popular Etsy shop, Paper & Peony, Chantal Larocque creates custom paper flower arrangements for events, weddings and everyday, all infused with her signature bold style and fun colors. Now, with this book readers can learn how to make her flowers and favorite arrangements step by step using easy-to-find supplies and common cardstock. Chantal's use of cardstock instead of the more common tissue or crepe paper gives the flowers a unique bold and full appearance that stands out. With this simple trick, no fancy tools or difficult-to-work-with papers are required, as in other paper flower books on the market. Readers will be amazed at how quick and easy it is to craft these stunning flowers and arrangements. Not only do readers learn how to make each bloom step by step, they also learn to use a variety of those blooms for stunning statement arrangements. The photos showing each step reveal Chantal's secret techniques that give a life-like look to the flowers. Templates are provided at the back of the book for readers to trace onto their cardstock and cut out the petals and leaves. With this helpful and inspiring guide, readers will love creating bold and colorful flower arrangements that last forever. This book has 65 paper flower projects, including arrangements and bouquets, and it has more than 100 photos.

THE 15TH INTERNATIONAL CONFERENCE ON BIOMEDICAL ENGINEERING

ICBME 2013, 4TH TO 7TH DECEMBER 2013, SINGAPORE

Springer Science & Business Media This volume presents the processing of the 15th ICBME held from 4th to 7th December 2013, Singapore. Biomedical engineering is applied in most aspects of our healthcare ecosystem. From electronic health records to diagnostic tools to therapeutic, rehabilitative and regenerative treatments, the work of biomedical engineers is evident. Biomedical engineers work at the intersection of engineering, life sciences and healthcare. The engineers would use principles from applied science including mechanical, electrical, chemical and computer engineering together with physical sciences including physics, chemistry and mathematics to apply them to biology and medicine. Applying such concepts to the human body is very much the same concepts that go into building and programming a machine. The goal is to better understand, replace or fix a target system to ultimately improve the quality of healthcare. With this understanding, the conference proceedings offer a single platform for individuals and organizations working in the biomedical engineering related field to gather and network with each other in so doing create the catalyst for future development of biomedical engineering in Asia.
