### The Immortal Life of Henrietta Lacks

*Crown* #1 NEW YORK TIMES BESTSELLER • “The story of modern medicine and bioethics—and, indeed, race relations—is refracted beautifully, and movingly.”—Entertainment Weekly  
NOW A MAJOR MOTION PICTURE FROM HBO® STARRING OPRAH WINFREY AND ROSE BYRNE • ONE OF THE “MOST INFLUENTIAL” (CNN), “DEFINING” (LITHUB), AND “BEST” (THE PHILADELPHIA INQUIRER) BOOKS OF THE DECADE • ONE OF ESSENCE’S 50 MOST IMPACTFUL BLACK BOOKS OF THE PAST 50 YEARS • WINNER OF THE CHICAGO TRIBUNE HEARTLAND PRIZE FOR NONFICTION NAMED ONE OF THE BEST BOOKS OF THE YEAR BY The New York Times Book Review • Entertainment Weekly • O: The Oprah Magazine • NPR • Financial Times • New York • Independent (U.K.) • Times (U.K.) • Publishers Weekly • Library Journal • Kirkus Reviews • Booklist • Globe and Mail Her name was Henrietta Lacks, but scientists know her as HeLa. She was a poor Southern tobacco farmer who worked the same land as her slave ancestors, yet her cells—taken without her knowledge—became one of the most important tools in medicine: The first “immortal” human cells grown in culture, which are still alive today, though she has been dead for more than sixty years. HeLa cells were vital for developing the polio vaccine; uncovered secrets of cancer, viruses, and the atom bomb’s effects; helped lead to important advances like in vitro fertilization, cloning, and gene mapping; and have been bought and sold by the billions. Yet Henrietta Lacks remains virtually unknown, buried in an unmarked grave. Henrietta’s family did not learn of her “immortality” until more than twenty years after her death, when scientists investigating HeLa began using her husband and children in research without informed consent. And though the cells had launched a multimillion-dollar industry that sells human biological materials, her family never saw any of the profits. As Rebecca Skloot so brilliantly shows, the story of the Lacks family—past and present—is inextricably connected to the dark history of experimentation on African Americans, the birth of bioethics, and the legal battles over whether we control the stuff we are made of. Over the decade it took to uncover this story, Rebecca became enmeshed in the lives of the Lacks family—especially Henrietta’s daughter Deborah. Deborah was consumed with questions: Had scientists cloned her mother? Had they killed her to harvest her cells? And if her mother was so important to medicine, why couldn’t her children afford health insurance? Intimate in feeling, astonishing in scope, and impossible to put down, *The Immortal Life of Henrietta Lacks* captures the beauty and drama of scientific discovery, as well as its human consequences.

### A Conspiracy of Cells

### One Woman's Immortal Legacy-And the Medical Scandal It Caused

*SUNY Press* **A Conspiracy of Cells** presents the first full account of one of medical science's more bizarre and costly mistakes. On October 4, 1951, a young black woman named Henrietta Lacks died of cervical cancer. That is, most of Henrietta Lacks died. In a laboratory dish at the Johns Hopkins Medical Center in Baltimore, a few cells taken from her fatal tumor continued to live--to thrive, in fact. For reasons unknown, her cells, code-named "HeLa," grew more vigorously than any other cells in culture at the time. Long-time science reporter Michael Gold describes in graphic detail how the errant HeLa cells spread, contaminating and overwhelming other cell cultures, sabotaging research projects, and eluding detection until they had managed to infiltrate scientific laboratories worldwide. He tracks the efforts of geneticist Walter Nelson-Rees to alert a sceptical scientific community to the rampant HeLa contamination. And he reconstructs Nelson-Rees's crusade to expose the embarrassing mistakes and bogus conclusions of researchers who unknowingly abetted

HeLa's spread.

## Strangers from a Different Shore

## A History of Asian Americans (Updated and Revised)

*eBookIt.com* In an extraordinary blend of narrative history, personal recollection, & oral testimony, the author presents a sweeping history of Asian Americans. He writes of the Chinese who laid tracks for the transcontinental railroad, of plantation laborers in the canefields of Hawaii, of "picture brides" marrying strangers in the hope of becoming part of the American dream. He tells stories of Japanese Americans behind the barbed wire of U.S. internment camps during World War II, Hmong refugees tragically unable to adjust to Wisconsin's alien climate & culture, & Asian American students stigmatized by the stereotype of the "model minority." This is a powerful & moving work that will resonate for all Americans, who together make up a nation of immigrants from other shores.

## Qualitative Research Methods

## Collecting Evidence, Crafting Analysis, Communicating Impact

*John Wiley & Sons* The definitive step-by step resource for qualitative and ethnographic research **Qualitative Research Methods: Collecting Evidence, Crafting Analysis, Communicating Impact** is a comprehensive guide on both the theoretical foundations and practical application of qualitative methodology. Adopting a phronetic-iterative approach, this foundational book leads readers through the chronological progression of a qualitative research project, from designing a study and collecting and analyzing data to developing theories and effectively communicating the results—allowing readers to employ qualitative methods in their projects as they follow each chapter. Coverage of topics such as qualitative theories, ethics, sampling, interview techniques, qualitative quality, and advice on practical fieldwork provides clear and concise guidance on how to design and conduct sound research projects. Easy-to-follow instructions on iterative qualitative data analysis explain how to organize, code, interpret, make claims, and build theory. Throughout, the author offers her own backstage stories about fieldwork, analysis, drafting, writing, and publishing, revealing the emotional and humorous aspects of practicing qualitative methods. Now in its second edition, this thorough and informative text includes new and expanded sections on topics including post-qualitative research, phenomenology, textual analysis and cultural studies, gaining access to elite and difficult to access populations, on persuasive writing, novel interviewing approaches, and more. Numerous examples, case studies, activities, and discussion questions have been updated to reflect current research and ensure contemporary relevance. Written in an engaging and accessible narrative style by an acclaimed scholar and researcher in the field Offers new and updated examples of coding and qualitative analysis, full-color photos and illustrations, and a companion instructor website Synthesizes the most up-to-date multidisciplinary literature on qualitative research methods including seven main approaches to qualitative inquiry: grounded theory, case study, ethnography, phenomenology, narrative and autoethnography, participatory action research, and arts-based research Presents innovative qualitative data collection methods and modern representation strategies, such as virtual ethnography, photo-voice, and mobile interviewing **Qualitative Research Methods: Collecting Evidence, Crafting Analysis, Communicating Impact** is an ideal resource for undergraduate and graduate students, instructors, and faculty across multiple disciplines including the social sciences, healthcare, education, management, and the humanities, and for practitioners seeking expert guidance on practical qualitative methods.

## The Cultural Cold War

### The CIA and the World of Arts and Letters

*New Press, The* **During the Cold War**, freedom of expression was vaunted as liberal democracy's most cherished possession—but such freedom was put in service of a hidden agenda. In **The Cultural Cold War**, Frances Stonor Saunders reveals the extraordinary efforts of a secret campaign in which some of the most vocal exponents of intellectual freedom in the West were working for or subsidized by the CIA—whether they knew it or not. Called "the most comprehensive account yet of the [CIA's] activities between 1947 and 1967" by the *New York Times*, the book presents shocking evidence of the CIA's undercover program of cultural interventions in Western Europe and at home, drawing together declassified documents and exclusive interviews to expose the CIA's astonishing campaign to deploy the likes of Hannah Arendt, Isaiah Berlin, Leonard Bernstein, Robert Lowell, George Orwell, and Jackson Pollock as weapons in the Cold War. Translated into ten languages, this classic work—now with a new preface by the author—is "a real contribution to popular understanding of the postwar period" (*The Wall Street Journal*), and its story of covert cultural efforts to win hearts and minds continues to be relevant today.

### The Assisted Reproduction of Race

*Indiana University Press* **The use of assisted reproductive technologies (ART)—in vitro fertilization, artificial insemination, and gestational surrogacy—challenges contemporary notions of what it means to be parents or families.** Camisha A. Russell argues that these technologies also bring new insight to ideas and questions surrounding race. In her view, if we think of ART as medical technology, we might be surprised by the importance that people using them put on race, especially given the scientific evidence that race lacks a genetic basis. However if we think of ART as an intervention to make babies and parents, as technologies of kinship, the importance placed on race may not be so surprising after all. Thinking about race in terms of technology brings together the common academic insight that race is a social construction with the equally important insight that race is a political tool which has been and continues to be used in different contexts for a variety of ends, including social cohesion, economic exploitation, and political mastery. As Russell explores ideas about race through their role in ART, she brings together social and political views to shift debates from what race is to what race does, how it is used, and what effects it has had in the world.

### Don't Let Them See Me Like This

An incendiary debut poetry collection that tears into the thick skin of political malaise through to the guts of history

### New Critical Legal Thinking

### Law and the Political

*Taylor & Francis* **New Critical Legal Thinking** articulates the emergence of a stream of critical legal theory which is directly concerned with the relation between law and the political. The early critical legal studies claim that all law is politics is displaced with a different and more nuanced theoretical arsenal. Combining grand theory with a concern for grounded political interventions, the various contributors to this book draw on political theorists and continental philosophers in order to engage with current legal problematics, such as the recent global economic crisis, the Arab spring and the emergence of biopolitics. The contributions instantiate the claim that a new and radical political legal scholarship has come into being: one which critically interrogates and intervenes in the contemporary relationship between law and power.

## Handbook of Health Social Work

*John Wiley & Sons* **Praise for HANDBOOK of HEALTH SOCIAL WORK SECOND EDITION** "Handbook of Health Social Work, Second Edition is a crucial addition for seasoned practitioners' libraries, as well as an essential foundation for fledgling social workers ready to enter health as a practice and research area." -From the Foreword by Suzanne Heurtin-Roberts, U.S. Department of Health and Human Services "The book's strengths include the high quality of writing and the expertise of its contributors. It covers the field of health social work in significant depth and is sure to leave readers well informed." -Mary Sormanti, PhD, MSW, Associate Professor of Professional Practice, Columbia University School of Social Work "Quite simply, this is the definitive volume for health and social work. In this second edition, Gehlert and Browne and their expert contributors have confidently managed to keep pace with current theory and empirical research across a wide range of subject matter that will be of interest to practitioners, educators, and researchers." -Michael Vaughn, PhD, Assistant Professor, School of Social Work, School of Public Health, and Department of Public Policy Studies, Saint Louis University Thoroughly revised and updated, the only comprehensive handbook of its kind covering the diverse field of health social work Now in its Second Edition, Handbook of Health Social Work provides a comprehensive and evidence-based overview of contemporary social work practice in health care. Written from a wellness perspective, the chapters cover practice and research areas ranging from chronic disorders to infectious disease, from physical to mental disorders, and all areas in between. An excellent resource preparing social workers for the present and future challenges of practice in the field of health care, the Handbook of Health Social Work, Second Edition features discussion on: New trends in social work and health care, including genetics, transdisciplinary care, as well as national and state changes in policy Health social work and children The wide array of roles performed by social workers in health-care settings Ethical issues and decision making in a variety of arenas Understanding of community factors in health social work Edited by two respected leaders in the field of health social work, this second edition includes contributions from a diverse team of notable experts, researchers, and scholars addressing multiple theoretical foundations, models, issues, and dilemmas for the social worker in health care. The resulting resource offers both a foundation for social work practice in health care and a guide for strategy, policy, and program development in proactive and actionable terms.

## The Home Place

## Memoirs of a Colored Man's Love Affair with Nature

*Milkweed Editions* "A groundbreaking work about race and the American landscape, and a deep meditation on nature...wise and beautiful."—Helen Macdonald, author of *H is for Hawk* **A Foreword Reviews Best Book of the Year and Nautilus Silver Award Winner** In me, there is the red of miry clay, the brown of spring floods, the gold of ripening tobacco. All of these hues are me; I am, in the deepest sense, colored. Dating back to slavery, Edgefield County, South Carolina—a place “easy to pass by on the way somewhere else”—has been home to generations of Lanhams. In *The Home Place*, readers meet these extraordinary people, including Drew himself, who over the course of the 1970s falls in love with the natural world around him. As his passion takes flight, however, he begins to ask what it means to be “the rare bird, the oddity.” By turns angry, funny, elegiac, and heartbreaking, *The Home Place* is a meditation on nature and belonging by an ornithologist and professor of ecology, at once a deeply moving memoir and riveting exploration of the contradictions of black identity in the rural South—and in America today. “When you’re done with *The Home Place*, it won’t be done with you. Its wonders will linger like everything luminous.”—*Star Tribune* “A lyrical story about the power of the wild...synthesizes his own family history, geography, nature, and race into a compelling argument for conservation and resilience.”—*National Geographic*

## Teaching Academic Writing

### A Toolkit for Higher Education

*Routledge* Student academic writing is at the heart of teaching and learning in higher education. Students are assessed largely by what they write, and need to learn both general academic conventions as well as disciplinary writing requirements in order to be successful in higher education. Teaching Academic Writing is a 'toolkit' designed to help higher education lecturers and tutors teach writing to their students. Containing a range of diverse teaching strategies, the book offers both practical activities to help students develop their writing abilities and guidelines to help lecturers and tutors think in more depth about the assessment tasks they set and the feedback they give to students. The authors explore a wide variety of text types, from essays and reflective diaries to research projects and laboratory reports. The book draws on recent research in the fields of academic literacy, second language learning, and linguistics. It is grounded in recent developments such as the increasing diversity of the student body, the use of the Internet, electronic tuition, and issues related to distance learning in an era of increasing globalisation. Written by experienced teachers of writing, language, and linguistics, Teaching Academic Writing will be of interest to anyone involved in teaching academic writing in higher education.

## Represent and Destroy

### Rationalizing Violence in the New Racial Capitalism

*U of Minnesota Press* A stinging critique of the link between global capitalism and U.S. multiculturalisms

## March: Book One

*Top Shelf Productions* Congressman John Lewis (GA-5) is an American icon, one of the key figures of the civil rights movement. His commitment to justice and nonviolence has taken him from an Alabama sharecropper's farm to the halls of Congress, from a segregated schoolroom to the 1963 March on Washington, and from receiving beatings from state troopers to receiving the Medal of Freedom from the first African-American president. Now, to share his remarkable story with new generations, Lewis presents March, a graphic novel trilogy, in collaboration with co-writer Andrew Aydin and New York Times best-selling artist Nate Powell (winner of the Eisner Award and LA Times Book Prize finalist for *Swallow Me Whole*). March is a vivid first-hand account of John Lewis' lifelong struggle for civil and human rights, meditating in the modern age on the distance traveled since the days of Jim Crow and segregation. Rooted in Lewis' personal story, it also reflects on the highs and lows of the broader civil rights movement. Book One spans John Lewis' youth in rural Alabama, his life-changing meeting with Martin Luther King, Jr., the birth of the Nashville Student Movement, and their battle to tear down segregation through nonviolent lunch counter sit-ins, building to a stunning climax on the steps of City Hall. Many years ago, John Lewis and other student activists drew inspiration from the 1958 comic book *Martin Luther King and the Montgomery Story*. Now, his own comics bring those days to life for a new audience, testifying to a movement whose echoes will be heard for generations.

## The Feminine Mystique

*Penguin Classics* When Betty Friedan produced *The Feminine Mystique* in 1963, she could not have realized how the discovery and debate of her contemporaries' general malaise would shake up society. Victims of a false belief system, these women were following strict social convention by loyally conforming to the pretty image of the magazines, and found themselves forced to seek meaning in their lives only through a family and a home. Friedan's controversial book about these women - and every woman - would ultimately set Second Wave feminism in motion and begin the battle for equality. This groundbreaking and life-changing work remains just as powerful, important and true as it was forty-five years ago, and is essential reading both as a historical document and as a study of women living in a man's world. 'One of the most influential nonfiction books of the twentieth century.' *New York Times* 'Feminism ..... began with the work of a single person: Friedan.' Nicholas Lemann With a new Introduction by Lionel Shriver

## Habeas Viscus

### Racializing Assemblages, Biopolitics, and Black Feminist Theories of the Human

*Duke University Press* *Habeas Viscus* focuses attention on the centrality of race to notions of the human. Alexander G. Weheliye develops a theory of "racializing assemblages," taking race as a set of sociopolitical processes that discipline humanity into full humans, not-quite-humans, and nonhumans. This disciplining, while not biological per se, frequently depends on anchoring political hierarchies in human flesh. The work of the black feminist scholars Hortense Spillers and Sylvia Wynter is vital to Weheliye's argument. Particularly significant are their contributions to the intellectual project of black studies vis-à-vis racialization and the category of the human in western modernity. Wynter and Spillers configure black studies as an endeavor to disrupt the governing conception of humanity as synonymous with white, western man. Weheliye posits black feminist theories of modern humanity as useful correctives to the "bare life and biopolitics discourse" exemplified by the works of Giorgio Agamben and Michel Foucault, which, Weheliye contends, vastly underestimate the conceptual and political significance of race in constructions of the human. *Habeas Viscus* reveals the pressing need to make the insights of black studies and black feminism foundational to the study of modern humanity.

## The SAGE Handbook of Intercultural Competence

*SAGE* Bringing together leading experts and scholars from around the world, this Handbook provides a comprehensive overview of the latest theories and research on intercultural competence. It will be a useful and invaluable resource to administrators, faculty, researchers, and students.

## Can Philosophy Love?

### Reflections and Encounters

*Rowman & Littlefield* This volume considers formalisations of love in the 21st century. Engaging with the Slovenian School of Philosophy, the book contends that psychoanalysis is the one line of thought that exposes the role that love plays in all knowledge, emphasising the importance of love in these unsettled times.

## Uses of Heritage

*Routledge* Examining international case studies including USA, Asia, Australia and New Zealand, Laurajane Smith identifies and explores the use of heritage throughout the world. Challenging the idea that heritage value is self-evident, and that things must be preserved because they have an inherent importance, Smith forcefully demonstrates that heritage value is not inherent in physical objects or places, but rather that these objects and places are used to give tangibility to the values that underpin different communities and to

assert and affirm these values. A practically grounded accessible examination of heritage as a cultural practice, *The Uses of Heritage* is global in its benefit to students and field professionals alike.

## Critical Dietetics and Critical Nutrition Studies

*Springer* This second volume in the Food Policy series focuses on critical nutrition and dietetics studies, offering an innovative and interdisciplinary exploration of the complexities of the food supply and the actors in it through a new critical lens. The volume provides an overview of the growth of critical nutrition and dietetics since its inception in 2009, as well as commentary on its continuing relevance and its applicability in the fields of dietetic education, research, and practice. Chapters address key topics such as how to bring critical dietetics into conventional practice, applying critical diets in clinical practice, policy applications, and new perspectives on training and educating a critical nutrition and dietetic workforce. Contributing authors from around the globe also discuss the role of critical nutrition dietetics in industry, private practice, and consultancy, as well the role of critical dietetics in addressing the food, hunger, and health issues associated with the world economic crisis. The authors designed the volume to be a reference work for students enrolled in undergraduate and postgraduate courses in Critical Nutrition, Critical Food Studies, and Critical Dietetics. Each chapter offers concise aims and learning outcomes, as well as assignments for students and a concise chapter summary. These features enhance the value of the volume as a learning tool.

## Burns and Grove's The Practice of Nursing Research - E-Book

### Appraisal, Synthesis, and Generation of Evidence

*Elsevier Health Sciences* Winner of the 1st-place American Journal of Nursing Book of the Year award in nursing research/evidence-based practice for 2021! Burns & Grove's *The Practice of Nursing Research: Appraisal, Synthesis, and Generation of Evidence*, 9th Edition is the trusted resource for those wanting to master the research methods that are foundational to evidence-based practice. This highly respected textbook covers how to appraise and apply existing research evidence, as well as how to participate in research and quality improvement projects. This new 9th edition has been extensively updated to reflect today's focus on online research in the digital era and includes clear, step-by-step guidelines for all major quantitative and qualitative research approaches — including supporting examples from the latest high-quality literature. There's also new content on translational research, coverage of the most current research tools and techniques, and an increased use of illustrations, tables, and other visuals to help engage visually oriented readers of all levels. Coverage of quantitative, qualitative, and other research methodologies provides a solid foundation to conduct, appraise, and apply research evidence to the realities of today's clinical practice. Balanced coverage of qualitative and quantitative methods addresses the qualitative research methodologies that are often the starting point of research projects, particularly in magnet hospitals and DNP programs. Clear, comprehensive coverage is organized into five units that include: an introduction to nursing research; coverage of the research process; application for evidence-based health care; how to analyze data, determine outcomes, and disseminate research; and how to propose and seek funding for research. Strong emphasis on evidence-based practice addresses this key graduate-level QSEN competency and reinforces how to generate research evidence and appraise and synthesize existing research for application to clinical practice. Rich examples from nursing literature bring research principles to life. Emphasis on the most currently used research methodologies focuses on the methods used in both quantitative research and qualitative research, as well as outcomes research and mixed-methods research. Coverage of digital data collection examines the use of online research tools. Quick-reference summaries include a table of research methods inside the front cover and a list of types of research syntheses (with definitions) inside the back cover. Helpful user resources are included with each new text purchase on the companion Evolve website and feature 400 interactive review questions along with a library of 10 full-text research articles.

## Identity and Ethics in the Book of Ruth

## A Social Identity Approach

*Walter de Gruyter* **This study demonstrates the importance of including narrative ethics in a construction of Old Testament ethics. The social identity approach is used as a lens through which to understand and derive ethics. This approach highlights the social emphases of a biblical text, and consequently assists in understanding a text's original ethical message. The book of Ruth is used as a test case, employing a social identity approach for understanding the narrative, but also to model the approach so that it can be implemented more widely in study of the Old Testament and narrative ethics. Each of the protagonists in the book of Ruth is examined in regards to their personal and social self-components. This study reveals that the narrative functions to shape or reinforce the identity of an ancient Israelite implied reader. A social identity approach can also highlight the social processes within a society. The social processes taking place in the Monarchic and Persian Periods are discussed, and it is found that the social emphases of the book of Ruth most closely correspond to the social undercurrents of the Persian Period."**

## Dawn

*Open Road Media* An alien race calls on one woman to revive mankind after Earth's apocalypse in this science fiction classic from the award-winning author of *Parable of the Sower*. Lilith Iyapo has just lost her husband and son when atomic fire consumes Earth—the last stage of the planet's final war. Hundreds of years later Lilith awakes, deep in the hold of a massive alien spacecraft piloted by the Oankali—who arrived just in time to save humanity from extinction. They have kept Lilith and other survivors asleep for centuries, as they learned whatever they could about Earth. Now it is time for Lilith to lead them back to her home world, but life among the Oankali on the newly resettled planet will be nothing like it was before. The Oankali survive by genetically merging with primitive civilizations—whether their new hosts like it or not. For the first time since the nuclear holocaust, Earth will be inhabited. Grass will grow, animals will run, and people will learn to survive the planet's untamed wilderness. But their children will not be human. Not exactly. Featuring strong and compelling characters and exploring complex themes of gender and species, Octavia E. Butler presents a powerful, postapocalyptic interplanetary epic, as well as a ray of hope for humanity. This ebook features an illustrated biography of Octavia E. Butler including rare images from the author's estate.

## Black on Both Sides

## A Racial History of Trans Identity

*U of Minnesota Press* The story of Christine Jorgensen, America's first prominent transsexual, famously narrated trans embodiment in the postwar era. Her celebrity, however, has obscured other mid-century trans narratives—ones lived by African Americans such as Lucy Hicks Anderson and James McHarris. Their erasure from trans history masks the profound ways race has figured prominently in the construction and representation of transgender subjects. In *Black on Both Sides*, C. Riley Snorton identifies multiple intersections between blackness and transness from the mid-nineteenth century to present-day anti-black and anti-trans legislation and violence. Drawing on a deep and varied archive of materials—early sexological texts, fugitive slave narratives, Afro-modernist literature, sensationalist journalism, Hollywood films—Snorton attends to how slavery and the production of racialized gender provided the foundations for an understanding of gender as mutable. In tracing the twinned genealogies of blackness and transness, Snorton follows multiple trajectories, from the medical experiments conducted on enslaved black women by J. Marion Sims, the “father of American gynecology,” to the negation of blackness that makes transnormativity possible. Revealing instances of personal sovereignty among blacks living in the antebellum North that were mapped in terms of “cross dressing” and canonical black literary works that express black men's access to the “female within,” *Black on Both Sides* concludes with a reading of the fate of Phillip DeVine, who was murdered alongside Brandon Teena in 1993, a fact omitted from the film *Boys Don't Cry* out of narrative convenience. Reconstructing these theoretical and historical trajectories furthers our imaginative capacities to conceive more livable black and trans worlds.

## A History of African American Autobiography

*Cambridge University Press* This History explores innovations in African American autobiography since its inception, examining the literary and cultural history of Black self-representation amid life writing studies. By analyzing the different forms of autobiography, including pictorial and personal essays, editorials, oral histories, testimonials, diaries, personal and open letters, and even poetry performance media of autobiographies, this book extends the definition of African American autobiography, revealing how people of

African descent have created and defined the Black self in diverse print cultures and literary genres since their arrival in the Americas. It illustrates ways African Americans use life writing and autobiography to address personal and collective Black experiences of identity, family, memory, fulfillment, racism and white supremacy. Individual chapters examine scrapbooks as a source of self-documentation, African American autobiography for children, readings of African American persona poems, mixed-race life writing after the Civil Rights Movement, and autobiographies by African American LGBTQ writers.

## Perspectives for Biodiversity and Ecosystems

*Springer Nature* The novelty of the book is a strong focus on perception, perspectives and prediction by scientists with profound insight into the ecology of ecosystems or into human demands and activity. The challenge is to bridge from empirical data and the knowledge of the past to the possibilities of the performance in the future. We assume that there is scope for more cooperation between the fields of ecology and practical philosophy or other social sciences in organising ecosystems and shaping the cultural future of humankind, and that such collaboration should be accorded considerably more priority. This book deals with environmental processes seen within a framework of the nature of ecosystems and human cultures. The future of the environment, the development of ecosystems and effective nature conservation management are the essentials of this book. Human nature and culture, and in particular their interactions, are interpreted as a set of rules and as given. The aim is not only to assess the significance of human influence on species composition and biodiversity but also to weigh up the subsequent potentials for action. In this book we will analyze the problems independently of one another, even if they are interconnected. This book focuses on perspectives and prognoses for the impacts of anthropogenic activity on ecosystems and thus on species conservation. Its goal is to improve assessments of the impacts of human activity on the environment. We are aware that prognoses have very often proven to be false. It is difficult to impossible to be able to predict with precision how evolution and ecosystems will change in future under anthropogenic influence. This strengthens our resolve to attempt to retain the highest possible degree of scientific integrity and professionalism and not to shy away from expressing the uncertainty of our own ideas and prognoses. We venture prognoses in this book and we will fail. However, we hope that we will be wrong on the right side.

## The Immortal Life of Henrietta Lacks

### Study Guide

**How to Use This Book** This book is to be used alongside the bestselling book, *The Immortal Life of Henrietta Lacks* by Rebecca Skloot for anyone interested in learning about one of the most important tools in medicine, vital for developing the polio vaccine, cloning, gene mapping, and more, the HeLa cells. This is also the story of the collision between ethics, race, and medicine; of scientific discovery and faith healing; and a daughter consumed with questions about the mother she never knew. For students: The study questions are in order and follow Rebecca Skloot's narrative. Answer questions as you read the book. Answers follow each question. For teachers: This is an easy and interesting resource to help your students learn about a specific tool used in medicine, the HeLa cell and how it originated and the impact its discovery had on medicine and the population. Use your own unique teaching style to supplement the Pembroke Notes with engaging activities and links for further investigating. With the new Common Core standards and a push to increased rigor, I have added a Writing Workshop section at the end of my book to help you with writing assignments. For homeschools: Your high school student will love the easy guide to help him/her in her reading *The Immortal Life of Henrietta Lacks*. Parents, be prepared for active discussions with your teenager while you read along. A Writing Workshop is supplied at the end of the book as a guide."

### Middlemarch

*CreateSpace* Who that cares much to know the history of man, and how the mysterious mixture behaves under the varying experiments of Time, has not dwelt, at least briefly, on the life of Saint Theresa, has not smiled with some gentleness at the thought of the little girl walking forth one morning hand-in-hand with her still smaller brother, to go and seek martyrdom in the country of the Moors? Out they toddled from rugged Avila, wide-eyed and helpless-looking as two fawns, but with human hearts, already beating to a national idea; until domestic reality met them in the shape of uncles, and turned them back from their great resolve. That child-pilgrimage was a fit beginning. Theresa's passionate, ideal nature demanded an epic life: what were many-volumed romances of chivalry and the social conquests of a brilliant girl to her? Her flame quickly burned up that light fuel; and, fed

from within, soared after some illimitable satisfaction, some object which would never justify weariness, which would reconcile self-despair with the rapturous consciousness of life beyond self. She found her epos in the reform of a religious order.

## Boyz 'r' Us

*Random House Australia* It's a long, mad ride from Summer Bay! Chicks, babes, cars and music; bored kids and shouting mothers; fathers that suck on a bottle to put themselves to sleep; and TV sets blaring mindlessly. Race tensions are hotting up in Marrickville and the media want a gang war so badly that they nearly start one. As Mitch looks back on his time as former leader of the Tunderjets, he tells the searing story of a scene that in some ways, no matter how hard you try, you can never leave.

## Shaping Written Knowledge

## The Genre and Activity of the Experimental Article in Science

The forms taken by scientific writing help to determine the very nature of science itself. In this closely reasoned study, Charles Bazerman views the changing forms of scientific writing as solutions to rhetorical problems faced by scientists arguing for their findings. Examining such works as the early Philosophical Transactions and Newton's optical writings as well as *Physical Review*, Bazerman views the changing forms of scientific writing as solutions to rhetorical problems faced by scientists. The rhetoric of science is, Bazerman demonstrates, an embedded part of scientific activity that interacts with other parts of scientific activity, including social structure and empirical experience. This book presents a comprehensive historical account of the rise and development of the genre, and views these forms in relation to empirical experience.

## Working with Academic Literacies

## Case Studies Towards Transformative Practice

*Parlor Press LLC* The editors and contributors to this collection explore what it means to adopt an "academic literacies" approach in policy and pedagogy. Transformative practice is illustrated through case studies and critical commentaries from teacher-researchers working in a range of higher education contexts—from undergraduate to postgraduate levels, across disciplines, and spanning geopolitical regions including Australia, Brazil, Canada, Cataluña, Finland, France, Ireland, Portugal, South Africa, the United Kingdom, and the United States.

## Treating Trauma in Dialectical Behavior Therapy

## The DBT Prolonged Exposure Protocol (DBT PE)

*Guilford Publications* Many DBT clients suffer from posttraumatic stress disorder (PTSD), but until now the field has lacked a formal, tested protocol for exactly when and how to treat trauma within DBT. Combining the power of two leading evidence-based therapies--and designed to meet the needs of high-risk, severely impaired clients--this groundbreaking manual integrates DBT with an adapted version of prolonged exposure (PE) therapy for PTSD. Melanie S. Harned shows how to implement the DBT PE protocol with DBT clients who have achieved the safety and stability needed to engage in trauma-focused treatment. In a convenient large-size format, the book includes session-by-session guidelines, rich case examples, clinical tips, and 35 reproducible handouts and forms that can be downloaded and printed for repeated use.
