Professionally edited by David Gatewood, Stygian Overlord So you want to be a villain? You do know that being a villain isn't all fun-filled romps in dank, lightless tombs, incendiary encounters with intellectually stunted heroes, joyously crushing the hopes and dreams of unsuspecting innocents, accumulating vast hordes of ill-gotten wealth, and advancing your agenda on a world unappreciative of your greatness? (1) You really want to be hunted by unethical vigilantes(2), chased by grown adults wearing skintight suits, ostracized from (in)decent society, forced to forge ahead in a universe largely opposed to your relentless pursuit of self-interest, and relegated to a life of bad hygiene and poor fashion choices? Have you considered another career? Ever? If not, then villainy is for you, and Nemesis - A Good Guide for Bad Guys is the manual you'll live(3) by! Nemesis - A Good Guide for Bad Guys provides a wealth of information you do not wish to have on becoming a villain and succeeding in the kingdom of evil. With illuminating topics such as The Villainy of Villainy, On Accepting Advice and Recognizing Terrible Ideas, How to Keep Your Secret Plans Secret, Horrible Haircuts, The Humility of Arrogance, The Good Guys Don't Always Win, and Happily Never After, Nemesis - A Good Guide for Bad Guys has more information than you can hope to want on being a villain. (4) If, on the assuredly infinitesimal possibility you have not yet come to your senses about becoming a villain, then Nemesis - A Good Guide for Bad Guys will be your highly impractical pragmatic guide to commencing upon the often volatile, failure-laden, frustrating, dangerous, and short-lived career of the evildoer, archrival, supervillain, antihero, fell overlord, or nemesis. (5) Read this if you value your life: 1. Okay, maybe it is. 2. Probably your extended family. 3. Or die. 4. Only a minute portion actually being practical. 5. You have been warned. It includes critical assessments of the work of Clifford Geertz, O.W. Wolters, Benedict Anderson, and other major scholars who have written on early, colonial, and modern Southeast Asian history and culture. Making use of the ideas of Weber, Marx, Foucault, and postmodern and postcolonial theory, Tony Day argues that culture must be restored to the study of Southeast Asian history so that the state and historical developments in the region can be returned to their own "alternative" historical contexts and trajectories. He employs a wide range of contemporary scholarship, as well as Southeast Asian literary and historical texts, inscriptions, and temples to explore the kinds of concepts and practices--kinship networks, cosmologies, gender identities, bureaucracies, rituals, violence and aesthetics--that have been used for centuries to build states.Highly readable and accessibly written, Fluid Iron demonstrates that Southeast Asian state building has taken place in a part of the world that has always been a crossroads of cultural and transcultural change. Day urges Southeast Asians to learn more about the history of their own state formations so they can safeguard not only human freedom, but also the "incongruity" of their unique region in the years ahead. Eerdmans Publishing* **Warfare exerts a magnetic power, even a terrible attraction, in its emphasis on glory, honor, and duty. In order to face the terror of war, it is necessary to face how our biblical traditions have made it attractive -- even alluring. In this book Mark Smith undertakes an extensive exploration of "poetic heroes" across a number of ancient cultures in order to understand the attitudes of those cultures toward war and warriors. Smith examines the Iliad and the Gilgamesh; Ugaritic poems commemorating Baal, Aqhat, and the Rephaim; and early biblical poetry, including the battle hymn of Judges 5 and the lament of David over Saul and Jonathan in 2 Samuel 1. Smith's Poetic Heroes analyzes the importance of heroic poetry in early Israel and its disappearance after the time of David, building on several strands of scholarship in archaeological research, poetic analysis, and cultural reconstruction. This is a guide to the science of kicking and punching that can settle the debates about which techniques are the most effective and why. It will help a fighter to fight, an instructor to teach and martial artists to advance by working things out for themselves. There is no magic involved in the martial arts. The force and power that is displayed by an expert fighter is the consequence of rigorous training in the accurate application of physical laws. Understanding how to use these laws of physics to create massive impact forces will provide a personal insight into the practice of correct technique and form. This unique piece of work will act as a technical reference that provides the facts and figures that fighters seek, including records of the maximum force and speed achieved by some of the best present day warriors, helping to answer many of the most difficult questions in the martial arts. The good thing is that you're not the first person ever to face the challenges of running for office - even though sometimes it might seem like it. In this book, Craig W. Turner collects stories, advice, warnings and best practices from local candidates from around the country who have been there and done that. They've already seen what you're about to see, and they've generously shared their experiences for the benefit of you and other first-time candidates for local office. This is no poli-sci class. This is "in the trenches" life experience. Everyone interviewed for this book as part of The Campaign Coach Podcast, has run and won at least one election. Some are now retired, some have moved on to higher office, and some are still serving in the capacity we discussed in their interview. In these pages, you will find insights that no guidebook or online course can give you - they will inspire you, and scare you, and motivate you and smack you in the face with a reality check. But, they will also make you a stronger candidate. Whether it's talking with voters, fundraising, understanding local government policy, promoting your candidacy or even knowing how to best serve your community, learning from these people's experiences - and avoiding mistakes that they've already made for you - will give you a leg up on any opponent. *Fighting the Dragon How I Beat Multiple Sclerosis* *Createspace Independent Pub* For decades, traditional medicine had very little to offer for individuals suffering from multiple sclerosis and other autoimmune diseases. Today, medical science has brought us wave upon wave of immunomodulatory medications to try to slow disease progression. Unfortunately, these medications come with their own health- and life-threatening side effects. And sometimes, they just stop working. "Fighting the Dragon: How I Beat Multiple Sclerosis" is the story of one woman's thirty year battle with multiple sclerosis and what she did to reclaim her life when she realized she would need an assisted living facility within a few years. The book contains detailed descriptions of what worked and what did not, where she got the help she needed (and how the reader can locate these resources within his/her own community), and the logic behind the non-conventional therapies. "Fighting the Dragon" is a narrative of courage—courage driven by desperation, a story written by a patient who decided, when her neurologist told her, "You will never walk normally again," that she would dance. "Fighting the Dragon" is also a book the MS patient can take to his/her physician . . . it contains well-researched, easy-to-follow guidelines for what to do and how. The information is also applicable to a wide range of other autoimmune conditions, cancers, and AIDS. ***** Excerpt: . . . if your car kept breaking down and the mechanic you took it to kept doing the same thing to fix it—but it did not stay fixed, you would question the mechanic's competence. Maybe the mechanic pulled out a technical manual. "See. I fixed it exactly as the manual said. This is the industry-approved way to solve this problem." When the car broke down again a week later, would you be satisfied? Probably not. You might decide it is time to replace the car. But that might be too expensive. So, what to do? If you were smart, you would probably try to find a new mechanic. You might ask your friends who they would recommend. You might search on the Internet to see if other people had the same experience with their cars . . . and what caused the problem. You might telephone some repair shops to get some idea of what they thought the problem might be. If you found a new mechanic and that mechanic looked over the car and said, "I have a solution that is not in any industry-approved repair manuals, but it is safe and it works,"—would you walk away and go back to the first mechanic who never got it right? Why is your health worth any less than your car?
