### The Knowledge Gap

## The hidden cause of America's broken education system--and how to fix it

*Penguin* The untold story of the root cause of America's education crisis--and the seemingly endless cycle of multigenerational poverty. It was only after years within the education reform movement that Natalie Wexler stumbled across a hidden explanation for our country's frustrating lack of progress when it comes to providing every child with a quality education. The problem wasn't one of the usual scapegoats: lazy teachers, shoddy facilities, lack of accountability. It was something no one was talking about: the elementary school curriculum's intense focus on decontextualized reading comprehension "skills" at the expense of actual knowledge. In the tradition of Dale Russakoff's *The Prize* and Dana Goldstein's *The Teacher Wars*, Wexler brings together history, research, and compelling characters to pull back the curtain on this fundamental flaw in our education system--one that fellow reformers, journalists, and policymakers have long overlooked, and of which the general public, including many parents, remains unaware. But *The Knowledge Gap* isn't just a story of what schools have gotten so wrong--it also follows innovative educators who are in the process of shedding their deeply ingrained habits, and describes the rewards that have come along: students who are not only excited to learn but are also acquiring the knowledge and vocabulary that will enable them to succeed. If we truly want to fix our education system and unlock the potential of our neediest children, we have no choice but to pay attention.

### Tools for Conflict Resolution

## A Practical K-12 Program Based on Peter Senge's 5th Discipline

*R&L Education* Have you been searching for a way to resolve conflict that doesn't involve a series of ten or more steps? Do you think that perhaps a key to conflict resolution must come from within? How can teachers and pre-service teachers help their students learn and use strategies for conflict resolution? *Tools for Conflict Resolution* is a practical method for teaching conflict resolution skills to students in grades K-12. Conflict is a part of everyone's life. It is the authors' belief that if each student is given tools for handling conflict, and these tools are used each time conflict arises that soon students become proficient conflict managers. This book begins with a chapter, which introduces Peter Senge's five disciplines: Personal Mastery, Mental Models, Shared Vision, Team Building, and Systems Thinking. After reading this chapter, the reader is able to embrace the five disciplines and begin practicing the adult level. As teachers, we teach from who we are. The rest of the book is filled with actual lesson plans, which are directly tied to the Multiple Intelligences Theory and are developmentally appropriate for students. Case studies, role-plays, skits, literature, songs, and co-operative learning activities are the primary instructional methods used to teach students conflict resolution skills. An annotated bibliography is included to assist teachers in extending lessons. These lessons may be taught during Social Studies as a unit on character education or could be used during a guidance class.

### Making Things Right

## Activities That Teach Restorative Justice, Conflict Resolution, Mediation, and Discipline That Restores Includes 32 Detailed Lesson Plans with Prepared Projections and Handouts

*CreateSpace* Making Things Right is designed to be used in several ways: 1. To train students to become mediators and peacemakers in their classroom and at home and as peer mediators for their school. 2. To train students to understand and participate in a restorative justice/discipline structure in the classroom based on the book *Discipline That Restores: Strategies to Create Respect, Cooperation, and Responsibility in the Classroom* by Ron and Roxanne Claassen. 3. To train parents who want to understand and use a constructive conflict management strategy in their families. Making Things Right is divided into three sections. The first section consists of the lesson plans for each of thirty-two activities. The second section is called Projections and Handouts (larger print makes them easier to read when projected). The third section consists of the Student Folder Items. The time listed for each activity is an approximation and provided to help the teacher determine how they want to combine or use individual activities to fit their time frames. Making Things Right is designed to be used both for whole-class trainings in which lessons are taught on a daily basis spread over several days for one to two weeks, and for two-day student mediator training seminars. Our preference is to use the lessons with the entire class so all have the skills and strategies to be peaceful problem solvers. It is especially helpful for educating students about the theory, skills and strategies used in *Discipline That Restores*, also by Ron and Roxanne Claassen. *Discipline That Restores* gives teachers and administrators the knowledge and skills for implementing restorative justice discipline in the classroom and school. It is important for students to have as much knowledge of this structure and process as their teachers and school administrators so all are better able to constructively resolve conflicts together. Lessons are designed to help students learn and become equipped to understand and implement conflict and peacemaking theory, skills and strategies. Students will learn some theory and be encouraged to develop their own theories for why we are interested in learning about new strategies for problem solving, and they will participate in lessons that will teach a specific process to use for problem solving and peacemaking as individuals in relationship with others and as mediators. Making Things Right provides activities that build student understanding of the mediation process and gives students a chance to practice the process through roleplay. This training will enable students to develop practical skills that will help them respond constructively to conflicts in many areas of their own lives as well as help others. Punishment for misbehavior causes resentment to grow, and what appears as evil intent is a consequence of that resentment. Punishment damages relationship at least a little and sometimes a lot. We have discovered that the most effective way to respond to misbehavior is to gain the cooperation of each person involved - it is rare that misbehavior involves only one person -then to sit down with them and help them solve the problem. Responding this way transforms an otherwise destructive event into a teaching and learning situation for everyone involved and builds relationship. Personal experience has shown that students, kindergarten and above, can understand and respond constructively; students grade four and above can readily understand and use these concepts in their own interpersonal conflicts and as mediators. Roxanne used this curriculum for many years with her 8th grade students and with parents. Many have used this curriculum to train high school students. All teachers make some adaptations to best use it with their audience.

### The Art of Failure

## An Essay on the Pain of Playing Video Games

*MIT Press* An exploration of why we play video games despite the fact that we are almost certain to feel unhappy when we fail at them. We may think of video games as being "fun," but in *The Art of Failure*, Jesper Juul claims that this is almost entirely mistaken. When we play video games, our facial expressions are rarely those of happiness or bliss. Instead, we frown, grimace, and shout in frustration as we lose, or die, or fail to advance to the next level. Humans may have a fundamental desire to succeed and feel competent, but game players choose to engage in an activity in which they are nearly certain to fail and feel incompetent. So why do we play video games even though they make us unhappy? Juul examines this paradox. In video games, as in tragic works of art, literature, theater, and cinema, it seems that we want to experience unpleasantness even if we also dislike it. Reader or audience reaction to tragedy is often explained as catharsis, as a purging of negative emotions. But, Juul points out, this doesn't seem to be the case for video game players. Games do not purge us of unpleasant emotions; they produce them in the first place. What, then, does failure in video game playing do? Juul argues that failure in a game is unique in that when you fail in a game, you (not a character) are in some way inadequate. Yet games also motivate us to play more, in order to escape that inadequacy, and the feeling of escaping failure (often by improving skills) is a central enjoyment of games. Games, writes Juul, are the art of failure: the singular art form that sets us up for failure and allows us to experience it and experiment with it. *The Art of Failure* is essential reading for anyone interested in video games, whether as entertainment, art, or education.
