Modern, high-performance composites have revolutionized recent technology, as new composites are designed along with the structures they will become part of. These "engineered" materials are an ever increasing percentage of materials used in a variety of roles. This book focuses on experimental methods that improve the understanding of the mechanics of composite materials. Experiments are a critical means of material characterization and damage detection, and are always evolving. These papers present a window onto the world of experimental methods for mechanical testing of composites, for individuals who wish to fully encounter that world.* **Aviation Unit and Aviation Intermediate Maintenance Manual with Repair Parts and Special Tools List Army Aircraft Survival Kits A New Manual of Logarithms to Seven Places of Decimals Electric Railway Directory and Buyers' Manual The Hawaii Sugar Manual DA Pam Maintenance Expenditure Limits for FSC Group 49, FSC Classes 4910 and 4940 Military Publications Index of Technical Manuals, Technical Bulletins, Supply Manuals (types 7, 8 and 9), Supply Bulletins, Lubrication Orders, and Modification Work Orders Moody's Manual of Investments: American and Foreign Transportation Moody's Industrial Manual Covering New York, American & regional stock exchanges & international companies.
