## Combining Paid Work and Family Care

## Policies and Experiences in International Perspective

**Policy Press** As populations age around the world, increasing efforts are required from both families and governments to secure care and support for older and disabled people. At the same time both women and men are expected to increase and lengthen their participation in paid work, which makes combining caring and working a burning issue for social and employment policy and economic sustainability. International discussion about the reconciliation of work and care has previously focused mostly on childcare. Combining paid work and family care widens the debate, bringing into discussion the experiences of those providing support to their partners, older relatives and disabled or seriously ill children. The book analyses the situations of these working carers in Nordic, liberal and East Asian welfare systems. Highlighting what can be learned from individual experiences, the book analyses the changing welfare and labour market policies which shape the lives of working carers in Finland, Sweden, Australia, England, Japan and Taiwan.

## Communicating about Risks and Safe Use of Medicines

## Real Life and Applied Research

**Springer Nature** At the core of this book lies the question how to approach medicines, risks and communication as a researcher - or anybody planning and evaluating a communication intervention, or wanting to understand communication events in private and the media. With a view to tackle current shortcomings of communication systems and processes for improved implementation, patient satisfaction and health outcomes, a multilayered approach is presented. This combines multiple data types and methods to obtain a wider and deeper understanding of the major parties and their interactions, as well as the healthcare, social and political contexts of information flows, how they interfere and which impact they have. Illustrated with real life experiences of safety concerns with medicines, worldwide active experts discuss the methods and contributions their disciplines can offer. With considerations on terminologies, tabulated overviews on communication types and outcomes, a patient-centred vision and plain language for non-medical readers, the book creates a platform for multidisciplinary collaborations amongst researchers as well as practitioners from communications, healthcare, the social sciences and pharmacovigilance. Importantly, it advocates for an active role of patients and highlights the achievements and aspirations of patient organisations. Finally, the book suggests establishing an inclusive discipline of humanities and epidemiology of medicinal product risk communication to realise full research potential. The authors are driven by the curiosity for communication as the most human behaviour, and as good health is amongst the basic human needs, medicinal product risk communication is an exciting research field of high global relevance.

## Ruin the Sacred Truths

### Poetry and Belief from the Bible to the Present

Harvard University Press Bloom surveys with majestic view the literature of the West from the Old Testament to Samuel Beckett. He provocatively rereads the Yahwist (or J) writer, Jeremiah, Job, Jonah, the Iliad, the Aeneid, Dante's Divine Comedy, Hamlet, King Lear, Othello, the Henry IV plays, Paradise Lost, Blake's Milton, Wordsworth's Prelude, and works by Freud, Kafka, and Beckett. In so doing, he uncovers the truth that all our attempts to call any strong work more sacred than another are merely political and social formulations. This is criticism at its best. Table of Contents: 1. The Hebrew Bible 2. From Homer to Dante 3. Shakespeare 4. Milton 5. Enlightenment and Romanticism 6. Freud and Beyond

Reviews of this book: Bloom's puissance is not entirely his own; for some of it, he is indebted to Nietzsche, Freud, Schopenhauer, Gershom Scholem, and other masters. But enough of it is his own to constitute a distinctive form of splendor. --Denis Donoghue, New York Review of Books

Reviews of this book: The wit, the eclecticism and the gripping paradoxes...the force of [Bloom's] intellect carries the reader from pinnacle to pinnacle, showing a new spiritual landscape from each. --Roger Scruton, Washington Times

Reviews of this book: In some ways the wildest of the wild men (and women), in some ways the most traditional of the traditionalists, Harold Bloom remains serene amid the turbulence--much of it caused by him. He stands dauntless, a party of one, as thrilling to behold up on the high wire as he is (at times) throttling to read on the page...From this strong critic dealing with these strong poets comes a potent mix of insight. --Mark Feeney, Boston Globe

## Report of the Mid Staffordshire NHS Foundation Trust Public Inquiry

### Executive Summary

The Stationery Office This public inquiry report into serious failings in healthcare that took place at the Mid Staffordshire NHS Foundation Trust builds on the first independent report published in February 2010 (ISBN 9780102964394). It further examines the suffering of patients caused by failures by the Trust: there was a failure to listen to its patients and staff or ensure correction of deficiencies. There was also a failure to tackle the insidious negative culture involving poor standards and a disengagement from managerial and leadership responsibilities. These failures are in part a consequence of allowing a focus on reaching national access targets, achieving financial balance and seeking foundation trust status at the cost of delivering acceptable care standards. Further, the checks and balances that operate within the NHS system should have prevented the serious systemic failure that developed at Mid Staffs. The system failed in its primary duty to protect patients and maintain confidence in the healthcare system. This report identifies numerous warning signs that could and should have alerted the system to problems developing at the Trust. It also sets out 290 recommendations grouped around: (i) putting the patient first; (ii) developing a set of fundamental standards, easily understood and accepted by patients; (iii) providing professionally endorsed and evidence-based means of compliance of standards that are understood and adopted by staff; (iv) ensuring openness, transparency and candour throughout system; (v) policing of these standards by the healthcare regulator; (vi) making all those who provide care for patients, properly accountable; (vii) enhancing recruitment, education, training and support of all key contributors to the provision of healthcare; (viii) developing and sharing ever improving means of measuring and understanding the performance of individual professionals, teams, units and provider organisations for the patients, the public, and other stakeholders.

## Dynamics of Cancer

### Incidence, Inheritance, and Evolution

Princeton University Press The onset of cancer presents one of the most fundamental problems in modern biology. In Dynamics of Cancer, Steven Frank produces the first comprehensive analysis of how particular genetic and environmental causes influence the age of onset. The book provides a unique conceptual and historical framework for understanding the causes of cancer and other diseases that increase with age. Using a novel quantitative framework of reliability and multistage breakdown, Frank unifies molecular, demographic, and evolutionary levels of analysis. He interprets a wide variety of observations on the age of cancer onset, the genetic and environmental causes of disease, and the organization of tissues with regard to stem cell biology and somatic mutation. Frank uses new quantitative methods to tackle some of the classic problems in cancer biology and aging: how the rate of increase in the incidence of lung cancer declines after individuals quit smoking, the distinction between the dosage of a chemical carcinogen and the time of exposure, and the role of inherited genetic variation in familial patterns of cancer. This is the only book that presents a full analysis of the age of cancer onset. It is a superb teaching tool and a rich source of ideas for new and experienced researchers. For cancer biologists, population geneticists, evolutionary biologists, and demographers interested in aging, this book provides new insight into disease progression, the inheritance of predisposition to disease, and the evolutionary processes that have shaped organismal design.

## SAP Applications on IBM PowerVM

IBM Redbooks IBM® invented the virtualization technology starting in the 1960s on the mainframe, and the functionalities evolved and were ported to other platforms and improved the reliability, availability, and serviceability (RAS) features. With virtualization, you achieve better asset utilization, reduced operating costs, and faster responsiveness to changing business demands. Every technology vendor in the SAP ecosystem understands virtualization as slightly different capabilities on different levels (storage and server hardware, processor, memory, I/O resources or the application, and so on). It is important to understand exactly what functionality is offered and how it supports the client's business requirements. In this IBM Redbooks® publication we focus on server virtualization technologies in the IBM Power Systems™ hardware, AIX®, IBM i, and Linux space and what they mean specifically for SAP applications running on this platform. SAP clients can leverage the technology that the IBM Power Systems platform offers. In this book, we describe the technologies and functions, what they mean, and how they apply to the SAP system landscape.

### Navy Irregular Warfare and Counterterrorism Operations

#### Background and Issues for Congress

In the years following the terrorist attacks of September 11, 2001, the Navy has carried out a variety of irregular warfare (IW) and counterterrorism (CT) activities. Among the most readily visible of these were operations carried out by Navy sailors serving ashore in the Middle East and Afghanistan, as well as the May 1-2, 2011, U.S. military operation in Abbottabad, Pakistan, that killed Osama bin Laden. During these years, the Navy took certain actions intended to improve its IW capabilities. For example, the Navy established the Navy Expeditionary Combat Command (NECC) informally in October 2005 and formally in January 2006. NECC consolidated and facilitated the expansion of a number of Navy organizations that have a role in IW operations. The Navy also established the Navy Irregular Warfare Office in July 2008, published a vision statement for irregular warfare in January 2010, and established "a community of interest" (COI) to develop and advance ideas, collaboration, and advocacy related to IW in December 2010. The Navy during these years also reestablished its riverine force and initiated The Global Maritime Partnership, which was a U.S. Navy initiative to achieve an enhanced degree of cooperation between the U.S. Navy and foreign navies, coast guards, and maritime police forces, for the purpose of ensuring global maritime security against common threats. In addition, the Navy operated the Southern Partnership Station (SPS) and the Africa Partnership Station (APS), which were Navy ships, such as amphibious ships or high-speed sealift ships, that deployed to the Caribbean and to waters off Africa, respectively, to support U.S. Navy engagement with countries in those regions, particularly for purposes of building security partnerships with those countries and for increasing the capabilities of those countries for performing maritime-security operations. The Navy's current IW and CT activities pose a number of potential oversight issues for Congress, including how much emphasis to place on IW and CT activities in Navy budgets, particularly in a context of constraints on Navy budgets and Navy desires to devote resources to developing "high end" combat capabilities for countering improved conventional military capabilities of countries such as China and Russia.

#### Creativity & Innovation

Notion Press "Creativity and innovation are to events, what the heart and soul are to the living." The book aims at encouraging readers to capture the traits and develop skills for enhancing their creative and innovative capabilities, cultivating the culture of creativity and innovation. Creativity is inventiveness with new ideas; critical thinking is generating and selecting ideas; and innovation turns creativity into products, processes and services. Creativity + Critical thinking + Innovation = Path of Desired Change The primary difference between creativity and innovation is that the former refers to conceiving a new idea while the latter involves converting that idea into a marketable commodity. Creativity and innovation are an attempt to gain a competitive advantage. Organizations are now focusing on enhancing their employees' creativity and not merely developing their technical competencies and skills. Undoubtedly, creativity is the most important human resource of all without which there would be no progress, and we would be forever repeating the same patterns. Innovation is at the heart of all successful companies.
