## Woldman's Engineering Alloys

ASM International Annotation New edition of a reference that presents the values of properties typical for the most common alloy processing conditions, thus providing a starting point in the search for a suitable material that will allow, with proper use, all the necessary design limitations to be met (strength, toughness, corrosion resistance and electronic properties, etc.) The data is arranged alphabetically and contains information on the manufacturer, the properties of the alloy, and in some cases its use. The volume includes 32 tables that present such information as densities, chemical elements and symbols, physical constants, conversion factors, specification requirements, and compositions of various alloys and metals. Also contains a section on manufacturer listings with contact information. Edited by Frick, a professional engineering consultant. Annotation c. Book News, Inc., Portland, OR (booknews.com).

## CAPS LOCK: How Capitalism Took Hold of Graphic Design, and How to Escape from It

Capitalism could not exist without the coins, banknotes, documents, information graphics, interfaces, branding, and advertisements made by graphic designers. Even anti-consumerist strategies such as social design and speculative design are appropriated to serve economic growth. It seems design is locked in a cycle of exploitation and extraction, furthering inequality and environmental collapse. CAPS LOCK uses clear language and visual examples to show how graphic design and capitalism are inextricably linked. The book features designed objects and also examines how the study, work, and professional practice of designers support the market economy. Six radical design cooperatives are featured that resist capitalist thinking in their own way, hoping to inspire a more socially aware graphic design.

## Engineering a Better Future

# Interplay between Engineering, Social Sciences, and Innovation

**Springer** This open access book examines how the social sciences can be integrated into the praxis of engineering and science, presenting unique perspectives on the interplay between engineering and social science. Motivated by the report by the Commission on Humanities and Social Sciences of the American Association of Arts and Sciences, which emphasizes the importance of social sciences and Humanities in technical fields, the essays and papers collected in this book were presented at the NSF-funded workshop 'Engineering a Better Future: Interplay between Engineering, Social Sciences and Innovation', which brought together a singular collection of people, topics and disciplines. The book is split into three parts: A. Meeting at the Middle: Challenges to educating at the boundaries covers experiments in combining engineering education and the social sciences; B. Engineers Shaping Human Affairs: Investigating the interaction between social sciences and engineering, including the cult of innovation, politics of engineering, engineering design and future of societies; and C. Engineering the Engineers: Investigates thinking about design with papers on the art and science of science and engineering practice.

## Competition is Killing Us

## How Big Business is Harming Our Society and Planet - and What To Do About It

Penguin UK **We live in the age of big companies where rising levels of power are concentrated in the hands of a few. Yet no government or organisation has the power to regulate these titans and hold them to account. We need big companies to share their power and we, the people of the world, need to reclaim it. In *Competition is Killing Us*, top business and competition lawyer Michelle Meagher establishes a new framework to control capitalism from the inside in order to make it work for the many and not just the few. Meagher has spent years campaigning against these multi-billion and trillion dollar mammoths that dominate the market and prioritise shareholder profits over all else; leading to extreme wealth inequality, inhumane conditions for workers and relentless pressure on the environment. In this revolutionary book, she introduces her wholly-achievable alternative; a fair and comprehensive competition law that limits unfair mergers, enforces accountability and redistributes power through stakeholder governance.**

## Father's Day

Vintage **At the age of thirty-five, Matthew Vaber's life is so messy it can only be at a turning point. In one direction is the neon glare of his father's recent suicide, and in the other is the tough love of his fluorescent mother. He'd love to find love, but he can't make it twenty minutes into a first date without spotting that fatal flaw. In spite of Matthew's better intentions, he always finds himself back at the same old place: 555-PUMP, "New York's only phone line for men who are serious about their bodies!" Eventually, even Matthew realizes the long odds of making a love connection on a sex**

line, but then the pound sign connects him to Henry. Much to his dismay, Matthew can't find a single problem with him. In fact, Henry may be just the one to lead Matthew past his recent tragedies and childhood traumas. If Matthew lets himself follow, that is. Philip Galanes's dynamic wit and idiosyncratic charm make *Father's Day* a compassionate, heart-melting story and a delightful debut.

## Odes

Knopf Following the Pulitzer prize-winning collection *Stag's Leap*, Sharon Olds gives us a stunning book of odes. Opening with the powerful and tender "Ode to the Hymen," Olds addresses and embodies, in this age-old poetic form, many aspects of love and gender and sexual politics in a collection that is centered on the body and its structures and pleasures. The poems extend parts of her narrative as a daughter, mother, wife, lover, friend, and poet of conscience that will be familiar from earlier collections, each episode and memory burnished by the wisdom and grace and humor of looking back. In such poems as "Ode to My Sister," "Ode of Broken Loyalty," "Ode to My Whiteness," "Blow Job Ode," and "Ode to the Last Thirty-Eight Trees in New York City Visible from This Window," Olds treats us to an intimate examination that, like all her work, is universal, by turns searing and charming in its honesty. From the bodily joys and sorrows of childhood to the deaths of those dearest to us, Olds shapes the world in language that is startlingly fresh, profound in its conclusions, and life-giving for the reader.

## Blockchain Ethics

### A Bridge to Abundance

Createspace Independent Publishing Platform Unlike many other recent Blockchain books focused on describing and defining Blockchain technology from a technical or cryptocurrency perspective, this unique book takes a very different tack: its focus is on how mainstream and marginalized Americans can use blockchain technology and digital assets ethically to create an abundant life. This book explores what Blockchain technology is doing today and how it can be used to create a better tomorrow. The book daringly explores how blockchain technology can make a difference in improving America's education system, cracking the Glass Ceiling, altering employment outlooks, and improving every person's financial future. The author examines and explores the business and social impact that open sourced Blockchain technology promises us is possible. And, in turn, discusses how we Americans can take those possibilities to create our economy, country, and lives into bustling meccas of abundance for E-V-E-R-Y-O-N-E.

## The Grit Factor

# Courage, Resilience, and Leadership in the Most Male-Dominated Organization in the World

**Harvard Business Press** **What does it take for women to succeed in a male-dominated world? *The Grit Factor*. At age nineteen, Shannon Huffman Polson became the youngest woman ever to climb Denali, the highest mountain in North America. She went on to reach the summits of Mt. Rainier and Mt. Kilimanjaro and spent more than a decade traveling the world. Yet it was during her experience serving as one of the Army's first female attack helicopter pilots, and eventually leading an Apache flight platoon on deployment to Bosnia-Herzegovina, that she learned the lessons of leadership that forever changed her life. Where did these insights come from? From her own crucibles of experience—and from other women. In writing *The Grit Factor*, Polson made it her mission to connect with an elite pack of tough, impressive female iconoclasts who shared with her their candid stories of combat and career. This slate of decorated leaders includes Heather Penney, one of the first female F-16 pilots, who was put on a suicide mission for 9/11; General Ann Dunwoody, the first female four-star general in the Army; Amy McGrath, the first female Marine to fly the F/A-18 in combat and a 2020 candidate for the US Senate—and dozens of other unstoppable women who got there first, including Polson herself. These women led at the highest levels in the most complicated, challenging, and male-dominated organization in the world. Now, in the post-#MeToo era, when positive role models of women leading are needed as never before, Polson brings these voices together, sharing her own life lessons and theirs with storytelling flair, keen insight, and incisive analysis of current research. With its gripping narrative and relatable takeaways, *The Grit Factor* is both inspiring and pragmatic, a book that will energize and enlighten current and aspiring leaders everywhere—whether male or female.**

## FinTech Revolution

## Universal Inclusion in the New

# Financial Ecosystem

Springer This book is a practical guide to the evolving landscape of finance, highlighting how it's changing our relationship with money and how financial technology, together with macroeconomic and societal change, is rewriting the story of how business is done in developing economies. Financial services companies are trying to become more customer focused, but struggling to help huge customer segments, particularly in developing economies. Alternative financial models and tools are emerging, which are being embraced by consumers and incumbents. In large parts of the developing world, alternative services are leapfrogging traditional finance, meaning more and more people have access to finance without ever needing a bank. Meanwhile, the barriers around financial services companies are crumbling, as they become more reliant on integration with new providers and alternative types of service. Financial products can no longer be viewed in isolation, but as part of a service landscape that supports how people do life. This means rethinking how our businesses are designed, motivated and organised, and letting go of the old ways of thinking about supply and demand. With practical steps businesses and, in particular, financial services organisations need to take to participate in a global service ecosystem, this book will be of interest to financial professionals who work in banking, financial technology, and development finance.

## An Impressionistic History of the South Asian Subcontinent - Vol 1

## Feudal languages

**VICTORIA INSTITUTIONS, Aaradhana, DEVERKOVIL 673508 India This is a writing that goes into the very depth of feudal language social systems. The writing commenced as a regular broadcast through Whatsapp and still continues. The language of the original writing was a vernacular language of the southern parts of the South Asian Subcontinent. As of now (24th Dec 2018), the broadcast has gone beyond 400 chapters. In this book only the first 100 and odd posts are given. This is so because the translation of only that many chapters has been completed. The translated version of this book is primarily aimed at the attention of the native-English populations of native-English nations. They have no idea as to what it is that is entering their nations, when feudal language speakers enter their nations and slowly bring in diabolic transformations in everything in the native-English**

social systems. Feudal languages have terrible carnivorous codes, along with an overpowering outwardly affable friendliness. The combination is a very deadly one, in that there is no shield or barrier that can effectively stop the infection of feudal languages. The only way to ward off the terrible social disasters in the offing is to understand what a feudal language is. Feudal languages can literally splinter up all native-English social systems, at every nook and corner of the social system; be it family, professional locations, roadways, work efficiency, ethical codes and almost all else. The appealing goodness of this book is that it has originally been written for people of feudal language nations; to make them understand what it is that is evil in their native social communication systems. Once they understand it, they can think of overcoming and overpowering the evil that possess them, and lead their own social systems and nation to greater quality standards. As of now, they do not understand what the evil is that is daunting them at every location in their social system. They see only one way to escape the terrific negativity that infects them; that is to escape to native-English nations. However, once they enter native-English nations, they become the beachhead for spreading their native-land feudal-language infection into the quaint and placid native-English social systems. When accosted by a feudal language verbal or non-verbal signal, native-Englishmen and women, if defined in the meaner codes in the signals, will or can go berserk.

## Cities and Race

### America's New Black Ghetto

Routledge This fascinating book examines the 1990s rise of a new black ghetto in rust belt America, 'the global ghetto'. It uses the emergent perspective of 'racial economy' to delineate a fundamental proposition; historically neglected and marginalized black ghettos, in a 1990s era of societal boom and bust, have become more impoverished, more stigmatized, and functionally ambiguous as areas. As these ghettos grow in size and become more stigmatized entities in contemporary society, our understanding of them in relation to evolving cities and society has not kept pace. This book looks to the heart of this misunderstanding, to find out how race and political economy in cities dynamically connect in new ways ('racial economy') to deepen deprivation in these areas. This book is an essential read for students of geography, urban studies and sociology.

## Designing with Web Standards

New Riders Best-selling author, designer, and web standards evangelist Jeffrey Zeldman has revisited his classic, industry-shaking guidebook. Updated in collaboration with co-author Ethan Marcotte, this third edition

**covers improvements and challenges in the changing environment of standards-based design. Written in the same engaging and witty style, making even the most complex information easy to digest, Designing with Web Standards remains your essential guide to creating sites that load faster, reach more users, and cost less to design and maintain. Substantially revised—packed with new ideas How will HTML5, CSS3, and web fonts change your work? Learn new strategies for selling standards Change what “IE6 support” means “Occasionally (very occasionally) you come across an author who makes you think, ‘This guy is smart! And he makes me feel smarter, because now I finally understand this concept.’” — Steve Krug, author of Don’t Make Me Think and Rocket Surgery Made Easy “A web designer without a copy of Designing with Web Standards is like a carpenter without a level. With this third edition, Zeldman continues to be the voice of clarity; explaining the complex in plain English for the rest of us.” — Dan Cederholm, author, Bulletproof Web Design and Handcrafted CSS “Jeffrey Zeldman sits somewhere between ‘guru’ and ‘god’ in this industry—and manages to fold wisdom and wit into a tale about WHAT web standards are, HOW standards-based coding works, and WHY we should care.” — Kelly Goto, author, Web ReDesign 2.0: Workflow that Works “Some books are meant to be read. Designing with Web Standards is even more: intended to be highlighted, dogeared, bookmarked, shared, passed around, and evangelized, it goes beyond reading to revolution.” — Liz Danzico, Chair, MFA Interaction Design, School of Visual Arts**

## Emma's Table

### A Novel

Harper Collins **From the moment Emma Sutton walks into the esteemed FitzCoopers auction house, the one-time media darling knows exactly what she wants: an exquisite antique dining table. What she doesn't realize is what she's getting: the chance to set things right. Fresh from a year-long stretch in prison and the public bloodletting that accompanied her fall, Emma needs a clean slate. She finds her life just as she left it, filled with glittering business successes and bruising personal defeats—rolling television cameras and chauffeured limousines, followed by awkward Sunday dinners at home. She knows, deep down, that she needs a change, though she can't imagine where it might come from or where it will lead. Enter Benjamin Blackman, a terminally charming social worker who moonlights for Emma on the weekends, and Gracie Santiago, an overweight little girl from Queens, one of Benjamin's most heartbreaking wards. Together with an eclectic supporting cast—including Emma's prodigal ex-husband, a bossy yoga teacher, and a tiny Japanese diplomat—the unlikely trio is whisked into a fleet-footed story of unforeseen circumstance and delicious opportunity, as their solitary**

searching for better paths leads them all, however improbably, straight to Park Avenue and the dynamic woman at the novel's center. Sophisticated yet accessible, lighthearted but also telling, Emma's Table is a thoroughly winning and surprisingly affecting tale of second chances.

# Tech Giants, Artificial Intelligence, and the Future of Journalism (Open Access)

Routledge This book examines the impact of the "Big Five" technology companies - Apple, Alphabet/Google, Amazon, Facebook and Microsoft - on journalism and the media industries. It looks at the current role of algorithms and artificial intelligence in curating how we consume media and their increasing influence on the production of the news. Exploring the changes that the technology industry and automation have made in the past decade to the production, distribution and consumption of news globally, the book considers what happens to journalism once it is

produced and enters the media ecosystems of the internet tech giants - and the impact of social media and AI on such things as fake news in the post-truth age. The audience for this book are students and researchers working in the field of digital media, and journalism studies or media studies more generally. It will also be useful to those who are looking for extended case studies of the role taken by tech giants such as Facebook and Google in the fake news scandal, or the role of Jeff Bezos in transforming The Washington Post.
