AUTOMOTIVE MACHINING

A GUIDE TO BORING, DECKING, HONING & MORE

CarTech Inc Machining is an essential part of high-performance engine building and stock rebuilding, as well as certain servicing procedures. Although you may not own the expensive tooling and machining to perform all or any of the machining required for a quality build, you need to understand the principles, procedures, and goals for machining, so you can guide the machining process when outsourced. Classic and older engines typically require extensive machining and almost every major component of engine, including block, heads, intake, crankshaft, and pistons, require some sort of machining and fitment. A detailed, authoritative, and thorough automotive engine-machining guide for the hard-core enthusiast has not been available until now. Mike Mavrigian, editor of *Engine Building Professional*, walks you through each important machining procedure. A stock 300-hp engine build has far different requirements than a 1,000-hp drag race engine, and Mavrigian reveals the different machining procedures and plans according to application and engine design. The author also shows you how to inspect, measure, and evaluate components so you can provide astute guidance and make the best machine work choices. Machining procedures included are cylinder boring, align boring/honing, decking, valveseat cutting, cam tunnel boring, and a multitude of other services. In addition, multi-angle valve jobs, setting the valveseats, altering rocker arm ratio, re-conditioning connecting rods, and machining and matching valvetrain components are also covered. Whether you're an enthusiast engine builder or prospective machining student who wants to pursue a career as an automotive machinist, this book will provide insight and in-depth instruction for performing the most common and important machining procedures.

AUTOMOTIVE WIRING

THE HOLDOUT

A NOVEL

Random House NEW YORK TIMES BESTSELLER • One juror changed the verdict. What if she was wrong? From the Academy Award-winning screenwriter of *The Imitation Game* and bestselling author of *The Last Days of Night*. . . . An ID Book Club Selection • "Exhilarating . . . a fiendishly slippery game of cat-and-mouse suspense and a provocative, urgent inquiry into American justice (and injustice) in the twenty-first century."—A. J. Finn, #1 New York Times bestselling author of *The Woman in the Window* It's the most sensational case of the decade. Fifteen-year-old Jessica Silver, heiress to a billion-dollar real estate fortune, vanishes on her way home from school, and her teacher, Bobby Nock, a twenty-five-year-old African American man, is the prime suspect. The subsequent trial taps straight into America's most pressing preoccupations: race, class, sex, law enforcement, and the lurid sins of the rich and famous. It's an open-and-shut case for the prosecution, and a quick conviction seems all but guaranteed—until Maya Seale, a young woman on the jury, convinced of Nock's innocence, persuades the rest of the jurors to return the verdict of not guilty, a controversial decision that will change all their lives forever. Flash forward ten years. A true-crime docuseries reassembles the jury, with particular focus on Maya, now a defense attorney herself. When one of the jurors is found dead in Maya's hotel room, all evidence points to her as the killer. Now, she must prove her own innocence—by getting to the bottom of a case that is far from closed. As the present-day murder investigation entwines with the story of what really happened during their deliberation, told by each of the jurors in turn, the secrets they have all been keeping threaten to come out—with drastic consequences for all involved.
