## The theory and practice of international marketing – B2B

[GRIN Verlag](#) Seminar paper from the year 2003 in the subject Business economics - Marketing, Corporate Communication, CRM, Market Research, Social Media, , language: English, abstract: In this paper I will show the link between the international marketing theory and practice based on the example of the maquiladora industry located on the US-Mexican border. Furthermore, my research will pinpoint the fact that most of the decisions made by international managers are a conclusion of the international marketing theory. This is the case starting with the macro analysis of the foreign markets and ending with the individual usage of the “4 P’s” regardless of the sector of business. In the age of globalization many companies want to or are forced by the markets to expand their business to other countries. However, in the early years of the globalization process firms mostly extended their commerce usually on the national level or to the home country’s neighbor markets, but today it does not appear anymore oddly, when a single company owns facilities located across the globe. Concerning this development, the company faces different challenges in each market, which will shape the usage of the marketing-mix. International marketing understood as “the segment of business concerned with planning, promoting, distributing, pricing and servicing of the goods and services desired by intermediate and ultimate consumers” is an important business tool in order to describe the decisions made by many companies across political boundaries. To be fully able to understand the process of the companies’ expansion in terms of international marketing it is very important to begin the analysis with the assessment of the political and economic forces in the world, in the home country and in the particular country, where the business is supposed to be done. These forces create a framework for a company’s further decision-making. Therefore, only having the information about the political, economic and legal environment one is able to retrace the reasons for a multinational companies’ strategy choice.

## Business-to-Business Marketing

[SAGE](#) The Second Edition of this bestselling B2B marketing textbook offers the same accessible clarity of insight, combined with updated and engaging examples. Each chapter contains a detailed case study to further engage the reader with the topics examined. - Featuring updated case studies and a range of new examples. - Incorporating additional coverage of B2B branding and the B2B strategic marketing process, and issues of sustainability. - Extended coverage of Key Account Management - Online lecturer support including PowerPoint slides and key web links Drawing on their substantial experience of business-to-business marketing as practitioners, researchers and educators, the authors make this exciting and challenging area accessible to advanced undergraduate and to postgraduate students of marketing, management and business studies. Praise for the Second Edition: 'I found that the first edition of Brennan, Canning and McDowell's text was excellent for raising students' awareness and understanding of the most important concepts and phenomena associated with B2B marketing. The second edition should prove even more successful by using several new case studies and short 'snapshots' to illustrate possible solutions to common B2B marketing dilemmas, such as the design and delivery of business products and services, the selection of promotional tools and alternative routes to market. The new edition also deals clearly with complex issues such as inter-firm relationships and networks, e-B2B, logistics, supply chain management and B2B branding' - Michael Saren, Professor of Marketing, University of Leicester 'This textbook makes a unique contribution to business-to-business teaching: not only does it provide up-to-date cases and issues for discussion that reach to the heart of business-to-business marketing; it also brings in the latest academic debates and makes them both relevant and accessible to the readers. A fantastic addition to any library or course' - Dr Judy Zolkiewski, Senior Lecturer in Business-to-Business Marketing, Manchester Business School 'The advantage of the approach taken by Brennan and his colleagues is that this book manages to convey both the typical North American view of B2B marketing as the optimisation of a set of marketing mix variables, and the more emergent European view of B2B Marketing as being focused on the management of relationships between companies. This updated second edition sees the addition of a number of 'snapshots' in each chapter that bring the subject alive through the description of current examples, as well as some more expansive end-of-chapter case studies. It is truly a most welcome addition to the bookshelves of those students and faculty interested in this facet of marketing' - Peter Naudé, Professor of Marketing, Manchester Business School 'The strength of this text lies in the interconnection of academic theory with real world examples. Special attention has been given to the role that relationships play within the Business-to business environment, linking these to key concepts such as segmentation, targeting and marketing communications, which importantly encompasses the role personal selling as relationshipcommunications building and not just order taking. With good coverage of international cultural differences this is a valuable resource for both students of marketing and sales' -

Andrew Whalley, Lecturer in Business-to-Business Marketing, Royal Holloway University of London 'The text provides an authoritative, up-to-date review of organisational strategy development and 'firmographic' market segmentation. It provides a comprehensive literature review and empiric examples through a range of relevant case studies. The approach to strategy formulation, ethics and corporate social responsibility are especially strong' - Stuart Challinor, Lecturer in Marketing, Newcastle University 'This revised second edition offers an excellent contemporary view of Business-to-Business Marketing. Refreshingly, the text is packed with an eclectic mix of largely European case studies that make for extremely interesting reading. It is a 'must read' for any undergraduate or postgraduate Marketing student' - Dr Jonathan Wilson, Senior Lecturer, Ashcroft International Business School, Anglia Ruskin University, Cambridge

## Global Marketing Management

[Scientific e-Resources](#) Global Marketing is invaluable text for M.Com, and MBA students studying international or global marketing. Today, many companies have trouble deciding whether using a truly global marketing strategy is right for them. There is a slight trend back toward localization due to new efficiencies of customization made possible by technology, the Internet, and new manufacturing processes. "e;Mass Customization"e; has now taken the place of "e;Mass Production."e; In today's world, the customer does not always respond to a "e;one size fits all"e; approach. Global marketing is also a field of study in general business management to provide valuable products, solutions and services to customers locally, nationally, internationally and worldwide. Global Marketing Management equips students with knowledge and skills to enable them to make key management decisions and understand how organisations may be navigated through the increasingly dynamic and challenging global trading environment. Global marketing management is of great importance to a company that is looking to offer its product in an international market. This book will give a high level overview of the planning and organization marketing leaders must address when considering a new country to sell its product in.

## Marketing High Profit Product/Service Solutions

[Gower Publishing, Ltd.](#) Marketing High Profit Product/Service Solutions addresses one of the most exciting and growing strategic marketing opportunities facing product and service companies - 'bundling'. Many customers want bundled products and services which represent integrated solutions to their problems, rather than buying individual products and services piecemeal, and if you become that supplier it can transform a company. There are many outstanding examples: Magna International grew in several stages from a supplier of basic individual auto parts to a company manufacturing a product/service 'super-bundle'; ultimately sourcing and assembling the entire car itself. GE developed their business involving the supply of medical imaging machines to hospitals to become a 'super-bundler' of complete hospital radiological floor imaging operations planning, installation, and integration. IBM transformed their position as a supplier of individual hardware, software, and peripherals to companies into a product/service solution 'bundler' of increasing complexity, and finally into the 'super-bundle' of BPO (Business Process Outsourcing); representing an outsourced and complete integrated IT solution set for clients' entire global operations. Roger More explores what was learned by these leading companies (amongst others) when they transformed their market strategies to become bundlers of complex integrated customer solutions. Over many years the author has developed and tested new concepts, maps and tools for use by a wide variety of managers in developing strategies for these bundled product/service solutions. His book now offers these maps and tools to all who invest in a copy.
