ENGINEERING FLUID DYNAMICS 2018

MDPI “Engineering Fluid Dynamics 2018”. The topic of engineering fluid dynamics includes both experimental as well as computational studies. Of special interest were submissions from the fields of mechanical, chemical, marine, safety, and energy engineering. We welcomed both original research articles as well as review articles. After one year, 28 papers were submitted and 14 were accepted for publication. The average processing time was 37.91 days. The authors had the following geographical distribution: China (9); Korea (3); Spain (1); and India (1). Papers covered a wide range of topics, including analysis of fans, turbines, fires in tunnels, vortex generators, deep sea mining, as well as pumps.

CREATING LEADERSHIP

ILLUSTRATIONS FROM MY TOP COP YEARS

Diamond Pocket Books Pvt Ltd My Top Cop Years were overwhelmingly creative because every time I saw a problem, the focus was on solutions. I am illustrating a select few for you, drawn from my carefully documented archives. If the department did not have the resources I sought them from outside. I was never shy of asking for anything that would benefit the people to be served. Because they needed answers, not excuses. For all these solutions, I had the support of some of my seniors, team members and juniors. They were excited about the novelty and ease of doing their duty. They, equally, got the credits and due recognition. Many of them saw growth in their new learning. This sowed the seeds for empowered and creative leadership.

REUSABLE LAUNCH VEHICLE

TECHNOLOGY DEVELOPMENT AND TEST PROGRAM

National Academies Press *The key to opening the use of space to private enterprise and to broader public uses lies in reducing the cost of the transportation to space. More routine, affordable access to space will entail aircraft-like quick turnaround and reliable operations. Currently, the space Shuttle is the only reusable launch vehicle, and even parts of it are expendable while other parts require frequent and extensive refurbishment. NASA's highest priority new activity, the Reusable Launch Vehicle program, is directed toward developing technologies to enable a new generation of space launchers, perhaps but not necessarily with single stage to orbit capability. This book assesses whether the technology development, test and analysis programs in propulsion and materials-related technologies are properly constituted to provide the information required to support a December 1996 decision to build the X-33, a technology demonstrator vehicle; and suggest, as appropriate, necessary changes in these programs to ensure that they will support vehicle feasibility goals.*

FAST TRACK OBJECTIVE ARITHMETIC

Arihant Publications India limited *Here comes the Best Seller! Since its first edition in 2012, Fast Track Objective Arithmetic has been great architect for building and enhancing Aptitude skills in lakhs of aspirant across the country. The first book of its kind has all*
