SEDIMENTS, MORPHOLOGY AND SEDIMENTARY PROCESSES ON CONTINENTAL SHELVES

ADVANCES IN TECHNOLOGIES, RESEARCH AND APPLICATIONS

John Wiley & Sons *The application of multibeam and sediment transport measurement technologies and the adoption of multi-faceted research methodologies have greatly advanced our understanding of the sedimentary processes on continental shelves in the last decade. This book uniquely blends cutting-edge research and state-of-the art review articles that take stock of new advances in multibeam mapping and sediment transport technologies, spatial analysis and modelling, and the applications of these advances to the understanding of shelf sediments, morphodynamics, and sedimentary processes. Case studies are also presented to illustrate the utilization of seabed property and process knowledge in habitat mapping and ocean management With its mix of papers focusing on technological advances, integration of shelf morphology and processes, and the application of these advances to coastal and ocean management, this Special Publication volume will serve as a milestone reference for professional marine scientists and as advanced text for students in marine geology, sedimentology and oceanography. This book is part of the International Association of Sedimentologists (IAS) Special Publications. The Special Publications from the IAS are a set of thematic volumes edited by specialists on subjects of central interest to sedimentologists. Papers are reviewed and printed to the same high standards as those published in the journal Sedimentology and several of these volumes have become standard*

ATLAS OF CT ANGIOGRAPHY

NORMAL AND PATHOLOGIC FINDINGS

Springer *This atlas presents normal and pathologic findings observed on CT angiography with 3D reconstruction in a diverse range of clinical applications, including the imaging of cerebral, carotid, thoracic, coronary, abdominal and peripheral vessels. The superb illustrations display the excellent anatomic detail obtained with CT angiography and depict the precise location of affected structures and lesion severity. Careful comparisons between normal imaging features and pathologic appearances will assist the reader in image interpretation and treatment planning and the described cases include some very rare pathologies. In addition, the technical principles of the modality are clearly explained and guidance provided on imaging protocols. This atlas will be of value both to those in training and to more experienced practitioners within not only radiology but also cardiovascular surgery, neurosurgery, cardiology and neurology.*

DARK SIDE OF THE LIGHT

SLAVERY AND THE FRENCH ENLIGHTENMENT

U of Minnesota Press Enlightenment thinkers such as Rousseau and Montesquieu are best known for their humanist theories and liberating influence on Western civilization. But as renowned French intellectual Louis Sala-Molins shows, Enlightenment discourses and scholars were also complicit in the Atlantic slave trade, becoming instruments of oppression and inequality. Translated into English for the first time, *Dark Side of the Light* scrutinizes Condorcet's *Reflections on Negro Slavery* and the works of Montesquieu, Rousseau, and Diderot side by side with the *Code Noir* (the royal document that codified the rules of French Caribbean slavery) in order to uncover attempts to uphold the humanist project of the Enlightenment while simultaneously justifying slavery. Wielding the pen of both the ironist and the moralist, Sala-Molins demonstrates the flawed nature of these attempts and the reasons given for this denial of rights, from the imperatives of public order to the incomplete humanity of the slave (and thus the need for his progressive humanization through slavery), to the economic prosperity that depended on his labor. At the same time, Sala-Molins uses the techniques of literature to give equal weight to the perspective of the "barefooted, the starving, and the slaves" through expository prose and scenes between slave and philosopher, giving moral agency and flesh-and-blood dimensions to issues most often treated as abstractions. Both an urgent critique and a measured analysis, *Dark Side of the Light* reveals the moral paradoxes of Enlightenment philosophies and their world-changing consequences. Louis Sala-Molins is a moral and political philosopher and emeritus professor at the University of Toulouse. He is the author of many books, including *Le Code Noir, ou Le calvaire de Canaan* and *L'Afrique aux Amériques*. John Conteh-Morgan is associate professor of French and Francophone, African-American, and African studies at Ohio State University. He is the author of *Theatre and Drama in Francophone Africa: A Critical Introduction*.

THE BOOK OF L

Springer Science & Business Media *This book is dedicated to Aristid Lindenmayer on the occasion of his 60th birthday on November 17, 1985. Contributions range from mathematics and theoretical computer science to biology. Aristid Lindenmayer introduced language-theoretic models for developmental biology in 1968. Since then the models have been customarily referred to as L systems. Lindenmayer's invention turned out to be one of the most beautiful examples of interdisciplinary science: work in one area (developmental biology) induces most fruitful ideas in other areas (theory of formal languages and automata, and formal power series). As evident from the articles and references in this book, the interest in L systems is continuously growing. For newcomers the first contact with L systems usually happens via the most basic class of L systems, namely, DOL systems. Here "0" stands for zero context between developing cells. It has been a major typographical problem that printers are unable to distinguish between 0 (zero) and 0 (oh). Thus, DOL was almost always printed with "oh" rather than "zero", and also pronounced that way. However, this misunderstanding turned out to be very fortunate. The wrong spelling "DOL" of "DOL" could be read in the suggestive way: DO L Indeed, hundreds of researchers have followed this suggestion. Some of them appear as contributors to this book. Of the many who could not contribute, we in particular regret the absence of A. Ehrenfeucht, G. Herman and H.A. Maurer whose influence in the theory of L systems has been most significant.*
