BULK MATERIAL HANDLING

PRACTICAL GUIDANCE FOR MECHANICAL ENGINEERS

Partridge Publishing Singapore Tens of thousands of mechanical engineers are engaged in the design, building, upgrading, and

optimization of various material handling facilities. The peculiarity of material handling is that there are numerous technical solutions to any problem. The engineer's personal selection of the optimal solution is as critical as the technical component. Michael Rivkin, Ph.D., draws on his decades of experience in design, construction, upgrading, optimization, troubleshooting, and maintenance throughout the world, to highlight topics such as: • physical principles of various material handling systems; • considerations in selecting technically efficient and environmentally friendly equipment; • best practices in upgrading and optimizing existing bulk material handling facilities; • strategies to select proper equipment in the early phases of a new project. Filled with graphs, charts, and case studies, the book also includes bulleted summaries to help mechanical engineers without a special background in material handling find optimal solutions to everyday problems.

ECONOMIC DEVELOPMENT FOR SMALL COMMUNITIES AND RURAL AREAS

University of Illinois Urbana-Champaign This book is designed to provide an introductory understanding of challenges, goals, processes, and procedures for economic developers, particularly economic development volunteers, in rural areas and small towns. Chapter 1 defines economic development and basic terms. Chapter 2 describes major economic, social, and demographic trends that influence the development prospects of small communities and rural areas. Chapter 3 discusses 10 common denominators of success for development organizations and steps in getting started. Common problems are addressed in Chapter 4. Chapter 5 reviews the basics of site selection and describes a 12-step process. Chapter 6 discusses in detail a strategic planning process that is composed of a cycle of eight steps. Focus of Chapter 7 is on the rationale behind targeting and on data sources and techniques to select target industries. Chapter 8 provides information on business retention, expansion, and creation programs. Chapter 9 describes a comprehensive approach to marketing as applied to economic development based on the strategic planning and targeting frameworks and an understanding of the site selection process presented in earlier chapters. Each chapter concludes with references to books, articles, and organizations that are particularly relevant to the topics covered. Twenty exhibits supplement the text, and a 107-item annotated bibliography lists relevant books, articles, government publications, and development organizations. The book is intended to be a useful reference book for local government officials, community leaders, educators, and others involved in the community economic development field. (YLB)

RISING CONCENTRATION IN ASIA-LATIN AMERICAN VALUE CHAINS

CAN SMALL FIRMS TURN THE TIDE?

UN Dynamic Asia has overtaken the European Union as Latin America and the Caribbean's second largest export market, after the

United States. However, the region's exports to Asia remain concentrated in few commodities involved a small number of large firms. This book explores the present and future scope for the participation of small and medium-sized enterprises (SMEs) in biregional trade and value chains and the measures that can be taken to make those chains more inclusive and sustainable. It encourages governments in Latin America to improve the business environment in order to encourage multinational firms to invest, upgrade and innovate in the region.

SEDIMENTS, MORPHOLOGY AND SEDIMENTARY PROCESSES ON CONTINENTAL SHELVES

ADVANCES IN TECHNOLOGIES, RESEARCH AND APPLICATIONS

John Wiley & Sons The application of multibeam and sediment transport measurement technologies and the adoption of multi-faceted research methodologies have greatly advanced our understanding of the sedimentary processes on continental shelves in the last decade. This book uniquely blends cutting-edge research and state-of-the art review articles that take stock of new advances in multibeam mapping and sediment transport technologies, spatial analysis and modelling, and the applications of these advances to the understanding of shelf sediments, morphodynamics, and sedimentary processes. Case studies are also presented to illustrate the utilization of seabed property and process knowledge in habitat mapping and ocean management. With its mix of papers focusing on technological advances, integration of shelf morphology and processes, and the application of these advances to coastal and ocean management, this Special Publication volume will serve as a milestone reference for professional marine scientists and as advanced text for students in marine geology, sedimentology and oceanography. This book is part of the International Association of Sedimentologists (IAS) Special Publications. The Special Publications from the IAS are a set of thematic volumes edited by specialists on subjects of central interest to sedimentologists. Papers are reviewed and printed to the same high standards as those published in the journal *Sedimentology* and several of these volumes have become standard works of reference.

UP AND DOWN

VICTORIES AND STRUGGLES IN THE COURSE OF LIFE

Thomas Nelson He was a small-town boy who burst onto the international golf scene with a dramatic hook shot from deep in the woods to win the Masters— before the game he loved almost killed him. Opening up about the toll that chasing and achieving his dream of being a champion golfer took on his mental health, Bubba Watson shares his powerful story of the breaking point that gave him clarity. Bubba Watson is known as the big-hitting left-handed golfer who plays with the pink driver—the small-town kid who grew

up as a child golf prodigy before going on to win two Masters Tournaments, competing in the Olympics, and rising to be the number two golfer in the world. But every dream comes with a price. Feeling that he was never good enough, Bubba began to let the constant criticism from fans and commentators haunt his thoughts. Success in the game he loved was killing him. In Up and Down, Bubba opens up about his debilitating anxiety attacks, the death of his father and namesake, adopting his children, and how reaching a breaking point professionally and personally drew him closer to his family and God. Golf is what Bubba Watson does, but it is not who he is. Through his story, you'll learn how Bubba: Overcame his anxiety and feelings of inadequacy Found his true identity not in the standards of the world, but in the God who already knows he is enough Learned to trust God with his gifts, family, and biggest dreams Became the husband, father, friend, and mentor he was called to be Life, like golf, is filled with ups and downs. Up and Down is the inspiring story of an imperfect man striving to become the best person he can be—wherever the course may take him.

IF JESUS HAD A DOG

For almost two thousand years, there have been countless books written about our Lord; books by the authors of the four Gospels and the early church fathers, which tell of his words, his actions, and his miracles; books which tell of how he changed the lives of the authors and how he continues to change lives of their readers; and books which build on what he said and did called historical novels. I guess that this little short story is one of those. What If Jesus Did Have a Dog? One night, when I couldn't sleep, a very strange thought came to me. For some reason, I began to wonder, whether or not, Jesus may have had a dog. I've had a number of wonderful dogs in my life, and I can't think of a better pet, or a more loving friend. I once saw a comment written on a wall that said, "God spelled backwards is still your best friend." Dogs, like God himself, love unconditionally. And like God, they are always ready to forgive us. Even many centuries ago, dogs were held in great esteem by many people. The wealthy and powerful kept dogs mostly for protection, but ordinary people believed that dogs could be wonderful helpers and companions, as well as dear friends. This is a story about the birth of Jesus and the dog that he may have had.

KANGAROO COURTS AND THE RULE OF LAW

THE LEGACY OF MODERNISM

Routledge Kangaroo Courts and the Rule of Law -The Legacy of Modernism addresses the legacy of contemporary critiques of language for the concept of the rule of law. Between those who care about the rule of law and those who are interested in contemporary legal theory, there has been a dialogue of the deaf, which cannot continue. Starting from the position that contemporary critiques of linguistic meaning and legal certainty are too important to be dismissed, Desmond Manderson takes up the political and intellectual challenge they pose. Can the rule of law be re-configured in light of the critical turn of the past several years

in legal theory, rather than being steadfastly opposed to it? Pursuing a reflection upon the relationship between law and the humanities, the book stages an encounter between the influential theoretical work of Jacques Derrida and Mikhail Bakhtin, and D.H. Lawrence's strange and misunderstood novel Kangaroo (1923). At a critical juncture in our intellectual history - the modernist movement at the end of the first world war - and struggling with the same problems we are puzzling over today, Lawrence articulated complex ideas about the nature of justice and the nature of literature. Using Lawrence to clarify Derrida's writings on law, as well as using Derrida and Bakhtin to clarify Lawrence's experience of literature, Manderson makes a robust case for 'law and literature.' With this framework in mind he outlines a 'post-positivist' conception of the rule of law - in which justice is imperfectly possible, rather than perfectly impossible.

GEOTECHNICAL ENGINEERING

UNSATURATED AND SATURATED SOILS

John Wiley & Sons Written by a leader on the subject, Introduction to Geotechnical Engineering is first introductory geotechnical engineering textbook to cover both saturated and unsaturated soil mechanics. Destined to become the next leading text in the field, this book presents a new approach to teaching the subject, based on fundamentals of unsaturated soils, and extending the description of applications of soil mechanics to a wide variety of topics. This groundbreaking work features a number of topics typically left out of undergraduate geotechnical courses.

THE MODERN SOCCER COACH: POSITION-SPECIFIC TRAINING

In recent years, player development has been a hot topic in the soccer world. With more pressure on coaches to win than ever before, the modern game seems to be less about actual players and more about tactical systems. In many places, the majority of training sessions are structured so that each player receives the same training as his or her teammates, even though they are asked to perform different functions. As a result, players do not receive specific feedback and lack the ability to produce functional skills in the heat of a game. Aimed at football coaches of all levels, and players of all ages and abilities, The Modern Soccer Coach: Position-Specific Training seeks to identify, develop, and enhance the skills and functions of the modern soccer player whatever their position and role on the pitch. This book offers unique insight into how to develop an elite program that can both improve players and win games. Filled with practical no-nonsense explanations, focused player drills, and more than 40 illustrated soccer templates, this book will help you - the modern coach - to create a coaching environment that will take your players to the next level. Understand how the concept of player development needs to change as players progress in the game. Examine how learning styles have changed and how

coaches must adapt accordingly. Enhance your players' performance levels with innovative exercises and ways to share feedback and critical information. Includes chapters and exercises for developing Center Backs, Full Backs, Holding Midfielders, Attacking Midfielders, Wide Attackers, and Center Forwards. Learn how certain coaches can move their players from 'interested' to 'committed'. Develop ways to maximize the talent levels of your players.

THE AUSTRALIAN OFFICIAL JOURNAL OF TRADEMARKS

PETEY (NEW COVER)

Hyperion In 1922, at the age of two, Petey's distraught parents commit him to the state's insane asylum, unaware that their son is

actually suffering from severe cerebral palsy. Bound by his wheelchair and struggling to communicate with the people around him, Petey finds a way to remain kind and generous despite the horrific conditions in his new "home." Through the decades, he befriends several caretakers but is heartbroken when each eventually leaves him. Determined not to be hurt again, he vows to no longer let hope of lifelong friends and family torment him. That changes after he is moved into a nursing home and meets a young teen named Trevor Ladd; he sees something in the boy and decides to risk friendship one last time. Trevor, new to town and a bit of a loner, is at first weary of the old man in the wheelchair. But after hearing more of his story, Trevor learns that there is much more to Petey than meets the eye. Petey is a touching story of friendship, discovery, and the uplifting power of the human spirit.

EURO-ASIAN TRANSPORT LINKAGES

OPERATIONALISATION OF INLAND TRANSPORT BETWEEN EUROPE AND ASIA

This publication is the outcome of work of the UNECE Group of Experts on Euro-Asian Transport Links (EATL) in phase III of the project

(2013-2017). The report was drafted by a consultant from the Scientific and Research Institute of Motor Transport (NIIAT) in Moscow and is focused both at coordination and facilitation of financing of infrastructural projects, as well as facilitating and removing physical and administrative bottlenecks at border crossings in overland transport between Europe and Asia. The report is a particularly useful tool for transport policy-makers from Landlocked Developing Countries (LLDCs) and transit countries in the Euro-Asian region and beyond, in that it, inter alia: i) Identifies and describes main commodity groups for the transport of which inland modes of transport can compete with maritime and aviation modes (incl. non-containerized, containerized and high-value containerized cargo); ii) Provides analysis showing the economic advantage (in terms of time and costs) of inland routes compared to air or maritime routes; and iii) Identifies the current strengths and weaknesses and lists several recommendations to make inland routes more competitive vis-à-vis the other modes. The EATL project's principal value to the market is that it paved the way for the operation of container "block trains". The development of the block trains, the so called "highways of railways" made the Euro-Asian corridors operational, serving as a regular mechanism controlled by the market that evaluates the service levels and requests for greater facilitation, cooperation and investment.
