# The Chicago Guide to Landing a Job in Academic Biology

University of Chicago Press **The Chicago Guide to Landing a Job in Academic Biology** is an indispensable guide for graduate students and post-docs as they enter that domain red in tooth and claw: the job market. An academic career in the biological sciences typically demands well over a decade of technical training. So it's ironic that when a scholar reaches the most critical stage in that career—the search for a job following graduate work—he or she receives little or no formal preparation. Instead, students are thrown into the job market with only cursory guidance on how to search for and land a position. Now there's help. Carefully, clearly, and with a welcome sense of humor, **The Chicago Guide to Landing a Job in Academic Biology** leads graduate students and postdoctoral fellows through the perils and rewards of their first job search. The authors—who collectively have for decades mentored students and served on hiring committees—have honed their advice in workshops at biology meetings across the country. The resulting guide covers everything from how to pack an overnight bag without wrinkling a suit to selecting the right job to apply for in the first place. The authors have taken care to make their advice useful to all areas of academic biology—from cell biology and molecular genetics to evolution and ecology—and they give tips on how applicants can tailor their approaches to different institutions from major research universities to small private colleges. With jobs in the sciences ever more difficult to come by, **The Chicago Guide to Landing a Job in Academic Biology** is designed to help students and post-docs navigate the tricky terrain of an academic job search—from the first year of a graduate program to the final negotiations of a job offer.

## The Job Search Navigator

# An Expert's Guide to Getting Hired, Surviving Layoffs, and Building Your Career

Agate Publishing “A no-holds-barred view of career management in a turbulent world . . . provides a reality-based perspective that should be of value to all who read [it].” —Len Schlesinger, president emeritus at Babson College, Baker Foundation professor, Harvard Business School In these uncertain times, *The Job Search Navigator* is a reliable guide to every step of the twenty-first-century job hunt, whether readers are laid off, wanting to change careers after surviving cutbacks, or seeking a better full-time gig in a stagnant marketplace. Author Matt Durfee writes from the perspective of someone who has both recruited for some of America’s biggest companies and navigated his way through nine of his own job losses. The book combines practical real-world perspectives with the technical knowledge job seekers need in order to excel at every aspect of their searches. Drawing on the knowledge Durfee accumulated through his own experiences, searches, and big-brand corporate hiring responsibilities, *The Job Search Navigator* abandons the “clinical approach” of many other career-advice books. Instead, Durfee gives easy-to-follow strategies and, perhaps more importantly, recounts in illuminating detail the kinds of mistakes that led him to develop these strategies. “From the strategic to the emotional to the tactical—this is one of the most practical and useful books on career management I’ve read in a very, very long time.” —L. Kevin Cox, chief human resources officer, American Express Company “Matt’s expertise in this space is unmatched. We live in a world where

constant reinvention is the rule and The Job Search Navigator is essential reading for those who want to take control of their career trajectory.”

—Scott Westerman, executive director & associate vice president for alumni relations, Michigan State University

## My Dream Job Guide A

# A 26-Book Series On World Professions

**Mindpop** There is no denying that folklore plays an important role in shaping the beliefs and imagination of our children. But times today have changed and continue to change as you read this. The world is becoming increasingly competitive; rat race and herd mentality are among the terms that best define the lifestyle today. Inevitably, there needs to be something that helps our children prepare for this competition. But do we want to take away from them the stories that form their dreams—of kingdoms, of princes and princesses, and of magic. Absolutely not! How about, then, we do something that brings to them the best of both worlds—something that helps them dream and also educates them? One's career is an important aspect of one's life. And this isn't something that, I believe, should be thought about a couple of years before one finishes school or maybe a couple of days after the results are announced. Undeniably, there is a gap between what we teach our children and what they need to learn. The aim to create the Role & Rollland™ My Dream Job Guide (A 26-book series on world professions) Series was to fill in this gap. The Role & Rollland™ My Dream Job Guide (A 26-book series on world professions) Series 1 is a set of 26 books, one for each alphabet. Each book covers ten professions, the names of which begin with that alphabet. For example, the book for the alphabet A covers professions like academic dean, acupuncturist, artistic gymnast, auditor, and so on. This synopsis outlines the vision and the concept behind these books and introduces you to the soul of our books—the Role & Rollland gang! The concept The concept is built around the play-and-learn and interactive learning techniques. The idea is to not just educate kids about a profession, but also tell them facts that will inspire in them a curiosity to know more on their own. There are activities and dress-up and role play games that will make the kids think from that professional's point of view. These games also involve friends and family, so the social interactions part is covered too! Each profession, apart from the content describing its key aspects in sufficient detail, includes the following sections: Polish your vocabulary! Good to know stuff! It's activity time! Let's go the extra mile! Fame crunch! Let's role play! The section names have been kept in a way that they aren't just attractive to sound but are also self-explanatory.

## Job Superbook: Book 1. Career Ideas Guide

Lulu Press, Inc The biggest thing in life for most people aside from personal relationships and health is to earn a living. This comes down to four things: 1.) Education 2.) Finding a job, keeping it 3.) Starting and running a business 4.) State of being, are you capable of being out there, around people These are all huge areas. I cover them all somewhere through all the books I've written because I know the real world and I know it's not the glittery world you can see on TV at anytime but a lot of people, especially young ones, don't know this then when the real world hits them straight-on for the first time, it's like a spear piercing through their being. Life is hard. I wrote the "People Power" books because I lived a fun, easy life until a few tragedies hit then I knew anybody can end up sick, unemployed, feeling hopeless, uninspired and destitute.

## **The "People Power" Education Superbook: Book 31. Vocational - Trades - Career Guide 2 (Community Colleges, Vocational - Technical Schools, Career Colleges)**

**Lulu Press, Inc This book has basic contact information for schools and colleges within the trades and technical skills. I've looked around. A book like this doesn't exist anywhere right now, a book that tries to list most of the community colleges and trades-vocational schools in the United States. I deal with specific profession schools in the next book. A lot of colleges offer career programs that don't lead to a degree but rather a certificate for the vocational field. Local community colleges often offer many programs in the practical skill occupations. Professional and trade organizations present free or low-cost webinars in addition to their traditional courses available for a fee.**
