POPULAR SCIENCE

Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better.

TECH-POWERED SALES

ACHIEVE SUPERHUMAN SALES SKILLS

HarperCollins Leadership Conventional ways of selling are becoming outdated. Learn what it takes to go from the traditional sales mindset to a tech-enabled sales superhero. In tough markets and with more people working remotely, creating a quality sales pipeline in traditional ways is more challenging than ever. As sales technologies continue to evolve and advance, developing technical quotient (TQ) is an essential element of sales success. Record-setting sales expert Justin Michael and bestselling sales leadership author Tony Hughes combine to provide practical guidance on how professional sellers can maximize results with an effective sales tech-stack to increase sales effectiveness for outstanding results. In Tech-Powered Sales, Michael and Hughes share helpful advice that:

- Reveal the techniques that enable you to break through with difficult to reach buyers
- Teach you how sales technologies can be employed for maximum benefit by raising your TQ
- Enable you to make the jump from being a beginner to a superuser within your sales team
- Show you how to thrive in the fourth industrial revolution to leverage technology rather than be at risk of being replaced by it

 Tech-Powered Sales delivers evidence-based strategies salespeople can use to create more opportunities than ever before. If you want to learn how to maximize your abilities to develop new business, this is the book for you!

MOON LIVING ABROAD COSTA RICA

Moon Travel Moon Travel Guides: Make Your Move! From visas, to job-hunting, to cultural assimilation, get a head start on your life-changing move with Moon Living Abroad Costa Rica. Inside you'll find:

- Practical information on setting up the essentials, including visas, finances, employment, education, and healthcare
- Firsthand insight on navigating Costa Rica's language and culture from experienced expat-turned-local Erin Van Rheenen
- Tips on finding housing that suits your needs and budget, whether you're renting or buying
- A thorough survey of the regions, provinces, and individual cultures that Costa Rica encompasses, to help you find the right new home for you
- Interviews with other expats who share their personal experiences building successful lives abroad
- How to plan a fact-finding trip before making the move to familiarize yourself with aspects of daily life in Costa Rica: internet and phone access, schooling, banking, insurance, travel, transportation, and more
- Special tips for those making the move with children or pets

 Moon Living Abroad Costa Rica takes the hassle out of planning your move, giving you the insider tips, practical resources, and local know-how to start your new life abroad!

THE NIGHT IS A STARRY DOME

A SHORT STORY

Lek and Giannis were married for ten years and lived happily with their children in North-East Thailand. Though Giannis spoke often of his Cretan childhood and heritage, he never showed his family the island of his birth. When Giannis dies, his widow takes her two children to Crete on a journey of discovery which will change their lives. This story first appeared in the collection *Mist on the Jungle and Other Stories*.

EVALUATION OF SOIL AND ROCK PROPERTIES

This document presents state-of-the-practice information on the evaluation of soil and rock properties for geotechnical design applications. This document addresses the entire range of materials potentially encountered in highway engineering practice, from soft clay to intact rock and variations of materials that fall between these two extremes. Information is presented on parameters measured, evaluation of data quality, and interpretation of properties for conventional soil and rock laboratory testing, as well as in situ devices such as field vane testing, cone penetration testing, dilatometer, pressuremeter, and borehole jack. This document provides the design engineer with information that can be used to develop a rationale for accepting or rejecting data and for resolving inconsistencies between data provided by different laboratories and field tests. This document also includes information on:

- (1) the use of Geographical Information Systems (GIS) and Personal Data Assistance devices for the collection and interpretation of subsurface information;
- (2) quantitative measures for evaluating disturbance of laboratory soil samples; and
- (3) the use of measurements from geophysical testing techniques to obtain information on the modulus of soil.

 Also included are chapters on evaluating properties of special soil materials (e.g., loess, cemented sands, peats and organic soils, etc.) and the use of statistical information in evaluating anomalous data and obtaining design values for soil and rock properties. An appendix of three detailed soil and rock property selection examples is provided which illustrate the application of the methods described in the document.

CONSTRUCTION METHODS AND MANAGEMENT

Prentice Hall Comprehensive and up-to-date, the text integrates major construction management topics with an explanation of the methods of heavy/highway and building construction. It incorporates both customary U.S. units and metric (SI) units and is the only text to present concrete formwork design equations and procedures using both measurement systems. This edition features information on new construction technology, the latest developments in soil and asphalt compaction, the latest developments in wood preservation and major health, safety and environmental concerns. Explains latest developments in soil and asphalt compaction. Presents the latest developments in wood preservation materials and techniques which respond to environmental concerns. Expanded and updated coverage of construction safety and major health hazards and precautions. Designed to guide construction engineers and managers in planning, estimating, and directing construction operations safely and effectively.

POPULAR MECHANICS

Popular Mechanics inspires, instructs and influences readers to help them master the modern world. Whether it's practical DIY home-improvement tips, gadgets and digital technology, information on the newest cars or the latest breakthroughs in science -- PM is the ultimate guide to our high-tech lifestyle.

HIGHWAY & HEAVY CONSTRUCTION

ON-FARM COMPOSTING HANDBOOK

Benefits and drawbacks; The composting process; Raw materials; Composting methods; Composting operations; Management; Site and environmental considerations; Using compost; Marketing agricultural compost; Farm composting economics: focus on production costs; Other options for waste management and composting; Characteristics of raw materials; Equipment tables; Troubleshooting and management guide; Work sheets and forms; Environmental agencies; Metric conversions.

UNDERWATER

HOW OUR AMERICAN DREAM OF HOMEOWNERSHIP BECAME A NIGHTMARE

Thomas Dunne Books Winner of the Bruss Real Estate Book Award His assignment was to write about a real-estate frenzy lighting up the Redneck Riviera. So Ryan DeZemmer settled in and bought a home nearby himself. Then the market crashed, and he became one of the millions of Americans who suddenly owed more on their homes than they were worth. A flood of foreclosures made it impossible to sell. It didn't help that his quaint neighborhood fell into disrepair and drug-induced despair. He had no choice but to become a reluctant and wildly unprofitable landlord to move on. Meanwhile, his reporting showed how the speculative mania that caused the crash opened the U.S. housing market to a much larger breed of investors. In this deeply personal story, DeZemmer shows how decisions on Wall Street and in Washington played out on his street in a corner of the Sunbelt that was convulsed by the foreclosure crisis. Readers will witness the housing market collapse from DeZemmer's perch as a newspaper reporter. First he's in the boom-to-bust South where a hot-air balloonist named Bob Shallow becomes one of the world's top selling real-estate agents arranging condo flips, developers flop in spectacular fashion and the law catches up with a beach-town mayor on the take. Later he's in New York, among financiers like Blackstone's Stephen Schwarzman who are building rental empires out of foreclosures, staking claim to the bastion of middle-class wealth: the single-family home. Through it all, DeZemmer is an underwater homeowner caught up in the mess. A cautionary tale of Wall Street's push to turn homes into assets, *Underwater* is a powerful, incisive story that chronicles the crash and its aftermath from a fresh perspective—the forgotten, middle-class homeowner.

THE SOUTHERN LUMBERMAN

ADVANCES IN CANCER RESEARCH

Elsevier Advances in Cancer Research provides invaluable information on the exciting and fast-moving field of cancer research. Here, once again, outstanding and original reviews are presented on a variety of topics, including nitric oxide-induced apoptosis in tumor cells, detection of minimal residual disease, immunity to oncogenetic human papilloma viruses, and modeling prostate cancer in the mouse.

THE WILLAMETTE LOCOMOTIVE

The geared locomotive is important in the history of logging. It mechanized the transport of logs from forest to mill. The Willamette is but a footnote with only 33 ever built. Its impact belies the small number; it brought innovations later copied by the big players: Shay and Heisler. A useful and worthy contribution to the history of rail and logging.
