IMAGES OF ENCHANTMENT

VISUAL AND PERFORMING ARTS OF THE MIDDLE EAST

American Univ in Cairo Press This original and multidimensional book brings a refreshing new approach to the study of the arts of the Middle East. By dealing in one volume with dance, music, painting, and cinema, as experienced and practiced not only within the Middle East but also abroad, Images of Enchantment breaks down the artificial distinctions--of form, geography, 'high' and 'low' art, performer and artist--that are so often used to delineate the subjects and processes of Middle Eastern artistic culture. The eighteen essays in this book cover themes as diverse as Bedouin dance, the music of Arab Americans, cinema in Egypt and Iran, Hollywood representations of the Middle East, and contemporary Sudanese painting. The contributions come from scholars and critics and from the artists themselves. Together, they present a wide-ranging and holistic view of the arts in their social, political, anthropological, and gender contexts. Contributors: Walter Armbrust, Farida Ben Lyazid, Kay Hardy Campbell, Virginia Danielson, Marjorie Franken, Sondra Hale, Carolee Kent, Hamid Naficy, Salwa Mikdadi Nashashibi, Anne K. AFFECT IN RELATION

FAMILIES, PLACES, TECHNOLOGIES

Routledge Decades of research on affect and emotion have brought out the paramount importance of affective processes for human lives. *Affect in Relation* brings together perspectives from social science and cultural studies to analyze the formative, subject constituting potentials of affect and emotion. Relational affect is understood not as individual mental states, but as social-relational processes that are both formative and transformative of human subjects. This volume explores relational affect through a combination of interdisciplinary case studies within four key contexts: Part I: "Affective Families" deals with the affective dynamics in transnational families who are scattered across several regions and nations. Part II: "Affect and Place" brings together work on affective place-making in the contexts of migration and in political movements. Part III: "Affect at Work" analyzes the affective dimension of contemporary white-collar workplaces. Part IV: "Affect and Media" focuses on the role of media in the formation and mobilization of relational affect. In its transdisciplinary spirit, analytical rigor and focus on timely and salient global matters, *Affect in Relation* consolidates the field of affect studies and opens up new avenues for scholarly and practical co-operation. It will appeal to both students and postdoctoral researchers interested in fields such as anthropology, sociology, cultural studies, media studies and human development.

MODEL ORGANISMS FOR MICROBIAL PATHOGENESIS, BIOFILM FORMATION AND ANTIMICROBIAL DRUG DISCOVERY

Springer Nature This book provides essential insights into microbial pathogenesis, host-pathogen interactions, and the anti-microbial drug resistance of various human pathogens on the basis of various model organisms. The initial sections of the book introduce readers to the mechanisms of microbial pathogenesis, host-pathogen interactions, anti-microbial drug resistance, and the dynamics of biofilm formation. Due to the emergence of various microbial resistant strains, it is especially important to understand the prognosis for microbial infections, disease progression profiles, and mechanisms of resistance to antibiotic therapy in order to develop novel therapeutic strategies. In turn, the second part of the book presents a comparative analysis of various animal models to help readers understand microbial pathogenesis, host-pathogen interactions, anti-microbial drug discovery, anti-biofilm therapeutics, and treatment regimes. Given its scope, the book represents a valuable asset for microbiologists, biotechnologists, medical professionals, drug development researchers, and pharmacologists alike.

SITUATING GLOBALIZATION

VIEWS FROM EGYPT

Transcript Verlag The range of perspectives and original materials dealt with here highlights the renewed urgency of the struggle for cultural autonomy and voice within the context of globalization. Each author explores how the various processes at both the local and global levels intersect to create new discourses and debates around the "indigenization of knowledge." If a new wind of cultural decolonization is blowing through the Arab Middle East and is having profound impact on the lives of men and women, then we should expect a new scholarship to emerge in order to grasp it. This book is a contribution in that direction. A key dimension concerns the issue of borders and boundaries. These are both real and imaginary (i.e., symbolic and metaphoric), hegemonic and counter-hegemonic. Among these borders are spatial ones that determine individuals' and communities' everyday location and place in the world--these include boundaries of class, gender, territory, and language. Each of these separations in turn has embedded in it, and rests on constructions of "imaginary" borders and boundaries. The real and imaginary do not exist as two disparate entities but are inextricably linked to each other in a dialectical move that simultaneously enables and disables movement and action. Current re-visioning of globalization challenges past suppositions. Globalization is a new form of an ongoing process that took inception during the heyday of colonialism. It might serve as a descriptive term to articulate the current historical period, but it remains theoretically problematic and imprecise. *Situating Globalization* picks up on the problematics of power and its dispersal and concentration. The bearers of these cultural flows seek legitimacy from their potential constituency by positing their language--cultural and religious--as local and therefore inherently in opposition to the hegemonic cultural knowledge that has seeped in from "outside" and led to disempowerment of local "peoples" and "knowledges." Bearers make no mention to this Islamist knowledge, of the "foreignness" of this idiom to many within the societies in question. Any attempt to contest their positioning and bearers of the indigenous results in

charges of either betrayal or brainwashing. Cynthia Nelson is professor of anthropology and dean of the School of Humanities and Social Sciences at Sarah Lawrence College. She is author of *Doria Shafik, Egyptian Feminist: A Woman Apart*. Shahnaz Rouse is a member of its sociology faculty. Her research interests and publications cover agrarian transformation; social movements; the state, religion and gender identity.

PERCUTANEOUS INTERVENTION FOR CORONARY CHRONIC TOTAL OCCLUSION

THE HYBRID APPROACH

Springer A practical and technical handbook providing operators with a step-by-step description of how to perform some of the techniques involved in the procedures, and how to troubleshoot some of the problems along the way. Examples with pictures will be provided, along with live angiographies. At the end of each chapter, the author will be provided with 3 questions to answer. Those questions will be developed by the editor and the contributors. The idea is to provide a quick reference to the most current problems encountered with a specific issue developed in the chapter. Nowadays, the busy clinician is unlikely to exclusively rely on lengthy

textbooks to learn specific complex techniques. That is one of the reasons for the popularity of CTO courses, live demonstrations, and conferences and, there are consequently many courses offered around the world to help new operators in the field. CTO PCI has emerged as a very effective procedure to help patients with CTOs, with very high success and low complications rates. It is however a very challenging procedure with multiple pitfalls along the way to success, both in specific cases, but also in the learning process. There are currently no single reference or "one-stop shop" for the operator who wants to learn a given technique that he or she may have seen performed live in a dedicated proctorship event, or in a live demonstration, or to even troubleshoot a problem encountered in daily CTO PCI practice. This will be the first handbook formatted for the busy interventional cardiologist. This book will become a "must have" for operators who are practicing CTO PCI and who want a quick reference. However, it will also provide tips and tricks currently used in the field.
