With the commercialization of examination results and teachers being rewarded for narrowly defined academic excellence, many teachers are using dubious means to raise test scores and are disregarding areas like drama, music, games and sports, leadership and management, student welfare, and science and technology. This challenging work seeks to stimulate positive change within primary and secondary educational institutions by encouraging the development of leadership and sustainable motivation. In Building Top Performing Schools, Dr. Onchiri presents a persuasive and timely argument for definitive improvements throughout the educational system. Instead, he put his work in the service of the imperialist movement that led Japan into World War II. Now, as the mature Ono struggles through the aftermath of that war, his memories of his youth and of the "floating world"—the nocturnal world of pleasure, entertainment, and drink—offer him both escape and redemption, even as they punish him for betraying his early promise. Indicted by society for its defeat and reviled for his past aesthetics, he relives the passage through his personal history that makes him both a hero and a coward but, above all, a human being.
