CORPORATE STRATEGY IN POST-COMMUNIST RUSSIA

Routledge Russian businesses in the post-Soviet period have been noted for their unusual, sometimes allegedly corrupt, business practices, and for their role in the enrichment of oligarchs. This book, which includes a wide range of case study examples, and which draws on the author's first-hand experience of running a Russian company, argues that a key to understanding contemporary Russian business is the importance of arbitrage, that is the ability to take advantage of price and cost differentials in different markets. The book argues that the conditions for such arbitrage

advantages are often created by businesses which have special links to particular institutions; that arbitrage benefits are not available to all businesses in a sector, thereby providing unfair competitive advantages to some businesses; and that businesses' overall activities are often distorted by this system. The book includes an analysis of a wide range of different types of arbitrage activities in action.

COMPETITION AND THE WORLD ECONOMY

COMPARING INDUSTRIAL DEVELOPMENT POLICIES IN THE DEVELOPING AND TRANSITION ECONOMIES

Edward Elgar Pub Globalisation has had a major impact on manufacturing competitiveness and industrial development in transitional and developing economies. This up-to-date book critically examines the experience of a wide range of countries, focusing on the policy challenges they face in the new global economy. The rising demand for manufactured goods is causing increased pressure on developing and transitional countries to introduce policies aimed at enhancing productivity, mobilising resources, building capabilities and changing internal structures. Yet policymakers face difficult trade-offs between allocative efficiency and sustainable development. This book begins by looking at key policy issues in manufacturing including international best practices, policy convergence and policy benchmarking. The discussion then moves on to discuss the measurement of manufacturing competitiveness and the policies necessary for companies to compete successfully in the new global economy. The policy recommendations are underpinned through a wide range of case studies from different regions and countries. The book offers policymakers, scholars and researchers a unique perspective, and serves as a comprehensive guide for formulating policies vital for national

industrial development and integration into the world economy. It will help those concerned with policy formulation in developing and transitional countries take informed decisions and better cope with the challenges and opportunities of the global economy.

A GUIDE TO ASIAN INFLUENCE ON AMERICAN CULTURE FROM ASTRO BOY TO ZEN BUDDHISM

Mariner Books For anyone who's ever wondered how to order Korean barbecue and Chinese dim sum, what "good feng xui" is and how to make sure you have it, and which is the deadliest martial art, here is the long-awaited guide to all things Asian: the key concepts, events, people, trends, and products that have been imported from Asia to America and have become a part of life. Photos & drawings.

MATERIALS FOR ADVANCED BATTERIES

Springer Science & Business Media The idea of a NATO Science Committee Institute on "Materials for Advanced Batteries" was suggested to JB and DWM by Dr. A. G. Chynoweth. His idea was to bring together experts in the field over the entire spectrum of pure research to applied research in order to familiarize everyone with potentially interesting new systems and the problems involved in their development. Dr. M. C. B. Hotz and Professor M. N. Ozdas were instrumental in helping organize this meeting as a NATO Advanced Science Institute. An organizing committee consisting of the three of us along with W. A. Adams, U. v Alpen, J. Casey and J. Rouxel organized the program. The program consisted of plenary talks and poster papers which are included in this volume. Nearly half the time of the

conference was spent in study groups. The aim of these groups was to assess the status of several key aspects of batteries and prospects for research opportunities in each. The study groups and their chairmen were: Current status and new systems J. Broadhead High temperature systems W. A. Adams Interface problems B. C. H. Steele Electrolytes U. v Alpen Electrode materials J. Rouxel These discussions are summarized in this volume. We and all the conference participants are most grateful to Professor J. Rouxel for suggesting the Aussois conference site, and to both he and Dr. M. Armand for handling local arrangements.

SOIL DYNAMICS AND FOUNDATION MODELING

OFFSHORE AND EARTHQUAKE ENGINEERING

Springer This book presents a comprehensive topical overview on soil dynamics and foundation modeling in offshore and earthquake engineering. The spectrum of topics include, but is not limited to, soil behavior, soil dynamics, earthquake site response analysis, soil liquefactions, as well as the modeling and assessment of shallow and deep foundations. The author provides the reader with both theory and practical applications, and thoroughly links the methodological approaches with engineering applications. The book also contains cutting-edge developments in offshore foundation engineering such as anchor piles, suction piles, pile torsion modeling, soil ageing effects and scour estimation. The target audience primarily comprises research experts and practitioners in the field of offshore engineering, but the book may also be beneficial for graduate students.

OXIDATIVE PHOSPHORYLATION IN HEALTH AND DISEASE

Springer Science & Business Media Mitochondrial diseases are often hard to diagnose. From the time they were first researched without animal models, patients of mitochondrial diseases were of equal interest to both clinical and basic scientists. With the new research done, this book includes updates on the normal structure, function, and molecular biology of the mitochondrial respiratory chain, information on traditional diagnostical methodologies, and an overview of the diagnostic promise of new technologies. The hypermetabolism of Luft disease, although only seen twice, is also studied. There are critical reviews of symptoms and signs associated with syndromes, as well as updates on the genetic defects of either the mitochondrial or the nuclear genome responsible for many disorders.
