Information Technology

Made Simple

Elsevier Information Technology: Made Simple covers the full range of information technology topics, including more traditional subjects such as programming languages, data processing, and systems analysis. The book discusses information revolution, including topics about microchips, information processing operations, analog and digital systems, information processing system, and systems analysis. The text also describes computers, computer hardware, microprocessors, and microcomputers. The peripheral devices connected to the central processing unit; the main types of system software; application software; and graphics and multimedia are also considered. The book tackles equipment, software, and procedures involved in computer communications; available telecommunications services; and data and transaction processing. The text also presents topics about computer-integrated manufacturing; the technology of information processing and its business applications; and the impact of this technology on society in

general. Students taking computer and information technology courses will find the book useful.

Techno Press3000

Rosicrucian Principles for the Home and Business

2013 Reprint of 1935 Edition. Exact facsimile of the original edition, not reproduced with Optical Recognition Software. Learn to use practical Rosicrucian principles to help solve your everyday problem both at home and in business dealings. This book gives you specific examples of how to attain health, happiness, and success. Avoid the delays and disappointments that stand between you and your goals by recognizing the right and wrong ways to use metaphysical and mystical principles. Spencer was a founder of the Ancient and Mystic Order Rosae Crucis (AMORC), a modern revival Rosicrucian order headquartered at San Jose, California. Lewis was born in Frenchtown, New Jersey, November 25, 1883, of Welsh ancestry. In 1904 Lewis founded and served as president of the New York Institute for Psychical Research. The institute specialized in occult studies with emphasis on Rosicrucian teachings. The AMORC was organized in several stages over the next years, and by 1917 held its first national convention in Pittsburgh, at which Lewis established his plan to develop correspondence courses. AMORC taught philosophical and mystical practices in order to develop the latent faculties of man, and it sold literature by mail order. Lewis himself authored the basic set of correspondence lessons and a number of the books published by AMORC.

Destination Dissertation

A Traveler's Guide to a Done Dissertation

Rowman & Littlefield Your dissertation is not a hurdle to jump or a battle to fight; as this handbook makes clear, your dissertation is the first of many destinations on the path of your professional career. Destination Dissertation guides you to the successful completion of your dissertation by framing the process as a stimulating and exciting trip—one that can be completed in fewer than nine months and by following twenty-nine specific steps. Sonja Foss and William Waters—your guides on this trip—explain concrete and efficient processes for completing the parts of the dissertation that tend to cause the most delays: conceptualizing a topic, developing a pre-proposal, writing a literature review, writing a proposal, collecting and analyzing data, and writing the last chapter. This guidebook is crafted for use by students in all disciplines and for both quantitative and qualitative dissertations, and incorporates a wealth of real-life examples from every step of the journey.

Internet Denial of Service

Attack and Defense Mechanisms

Pearson Education Suddenly your Web server becomes unavailable. When you investigate, you realize that a flood of packets is surging into your network. You have just become one of the hundreds of thousands of victims of a denial-of-service attack, a pervasive and growing threat to the Internet. What do you do? Internet Denial of Service sheds light on a complex and fascinating form of computer attack that impacts the confidentiality, integrity, and availability of millions of computers worldwide. It tells the network administrator, corporate CTO, incident responder, and student how DDoS attacks are prepared and executed, how to think about DDoS, and how to arrange computer and network defenses. It also provides a suite of actions that can be taken before, during, and after an attack. Inside, you'll find comprehensive information on the following topics How denial-of-service attacks are waged How to improve your network's resilience to denial-of-service attacks What to do when you are involved in a denial-of-service attack The laws that apply to these attacks and their implications How often denial-of-service attacks occur, how strong they are, and the kinds of damage they can cause Real examples of denial-of-service attacks as experienced by the attacker, victim, and unwitting accomplices

The authors' extensive experience in handling denial-of-service attacks and researching defense approaches is laid out clearly in practical, detailed terms.

Grow the Core

How to Focus on your Core Business for Brand Success

John Wiley & Sons *Grow the Core* stands conventional wisdom about business growth on its head and provides a proven formula for growing your business in recessionary times. These days, it's a common belief among business leaders across industry sectors that the best way to grow their businesses is to expand into new markets. In reality, virtually all top-performing companies achieve superior results through a leading position in their core business. Unfortunately, there's very little in the way of practical advice on how to do this. *Grow the Core* shows you how to focus on your core business for brand success, with a program of eight workouts road-tested by the author's consultancy, the brandgym. The book provides inspiration, practical advice and proven tools for building and strengthening your core business. It is packed with case studies from brandgym clients, including Mars, Friesland Campina, SAB Miller and Danone. The book features exclusive brandgym research, in addition to front-line experience on over one hundred brand coaching projects.

Pathwise Estimation and Inference for Diffusion Market Models

CRC Press *Pathwise estimation and inference for diffusion market models* discusses contemporary techniques for inferring, from options and bond prices, the market participants' aggregate view on important financial parameters such as implied volatility, discount rate, future interest rate, and their uncertainty thereof. The focus is on the pathwise inference methods that are applicable to a sole path of the observed prices and do not require the observation of an ensemble of such paths. This book is pitched at the level of senior undergraduate students undertaking research at honors year, and postgraduate candidates undertaking Master's or PhD degree by research. From a research perspective, this book reaches out to academic researchers from backgrounds as diverse as mathematics and probability, econometrics and statistics, and computational mathematics and optimization whose interest lie in analysis and modelling of financial market data from a multi-disciplinary approach. Additionally, this book is also aimed at financial market practitioners participating in capital market facing businesses who seek to keep abreast with and draw inspiration from novel approaches in market data analysis. The first two chapters of the book contains introductory material on stochastic analysis and the classical diffusion stock market models. The remaining chapters discuss more special stock and bond market models and special methods of pathwise inference for market parameter for different models. The final chapter describes applications of numerical methods of inference of bond market parameters to forecasting of short rate. Nikolai Dokuchaev is an associate professor in Mathematics and Statistics at Curtin University. His research interests include mathematical and statistical finance, stochastic analysis, PDEs, control, and signal processing. Lin Yee Hin is a practitioner in the capital market facing industry. His research interests include econometrics, non-parametric regression, and scientific computing.

Compound Semiconductor Integrated Circuits

World Scientific This is the book version of a special issue of the *International Journal of High Speed Electronics and Systems*, reviewing recent work in the field of compound semiconductor integrated circuits. There are fourteen invited papers covering a wide range of applications, frequencies and materials. These papers deal with digital, analog, microwave and millimeter-wave technologies, devices and integrated circuits for wireline fiber-optic lightwave transmissions, and wireless radio-frequency microwave and millimeter-wave communications. In each case, the market is young and experiencing rapid growth for both commercial and military applications. Many new semiconductor technologies compete for these new markets, leading to an alphabet soup of semiconductor materials described in these papers. Contents: Present and Future of High-Speed Compound Semiconductor IC's (T Otsuji); Transforming MMIC (E J Martinez); Distributed Amplifier for Fiber-Optic Communication Systems (H Shigematsu et al.); Microwave GaN-Based Power Transistors on Large-Scale Silicon Wafers (S Manohar et al.); Radiation Effects in High Speed III-V Integrated Circuits (T R Weatherford); Radiation Effects in III-V Semiconductor Electronics (B D Weaver et al.); Reliability and Radiation Hardness of Compound

Semiconductors (S A Kayali & A H Johnston); and other papers. Readership: Engineers, scientists and graduate students working on high speed electronics and systems, and in the area of compound semiconductor integrated circuits.

Secrets of the Wolves

Simon and Schuster Set at the end of the Ice Age in what is now Southern Europe, Secrets of the Wolves follows the wolves and humans of the Wide Valley as they take tentative steps to learn to live alongside one another without fighting. With the help of the humans with whom they bonded in Promise of the Wolves, the visionary she-wolf Kaala and her companions from the Swift River pack infiltrate the human tribe and slowly win them over. Then, suddenly and without explanation, their prey begins to leave the valley. Disaster threatens, for when resources are scarce, conflict inevitably follows. How long before wolf and man are once again sworn enemies, and the killing begins? Meticulously researched and thrillingly brought to life, this is a magical journey into the mind of the wolf.

Knuckleheads in the News

*YOU CAN'T MAKE THIS STUFF UP! Here is a hilarious collection that catches real-life knuckleheads in outrageous acts of brazen stupidity, giving new meaning to that famous four-letter word: "DUH"! * The Oregon resident who was waxing his 1984 Pontiac--and somehow managed to shove the antenna up his nose . . . GRANDMOTHER OF EIGHT MAKES HOLE IN ONE * The Atlanta Braves pitcher who was treated for five-inch-long welts after he tried to iron his polo shirt while wearing it . . . MINERS REFUSE TO WORK AFTER DEATH * The inmate at a Chesapeake Correctional Facility who filed a five million dollar lawsuit against himself . . . DRUNK GETS NINE MONTHS IN VIOLIN CASE * The woman who couldn't stand the discomfort of having a callus on her right foot, so she blew off her big toe with a shotgun . . . Radio personality John "Kato" Machay's lively compilation of news stories, headlines, and courtroom gaffes proves hands down that truth is dumber than fiction! REMEMBER: To err may be human, but to laugh out loud is divine.*

Mathematical Thinking

Math Classics For one/two-term courses in Transition to Advanced Mathematics or Introduction to Proofs. Also suitable for courses in Analysis or Discrete Math. This title is part of the Pearson Modern Classics series. Pearson Modern Classics are acclaimed titles at a value price. Please visit www.pearsonhighered.com/math-classics-series for a complete list of titles. This text is designed to prepare students thoroughly in the logical thinking skills necessary to understand and communicate fundamental ideas and proofs in mathematics-skills vital for success throughout the upperclass mathematics curriculum. The text offers both discrete and continuous mathematics, allowing instructors to emphasize one or to present the fundamentals of both. It begins by discussing mathematical

language and proof techniques (including induction), applies them to easily-understood questions in elementary number theory and counting, and then develops additional techniques of proof via important topics in discrete and continuous mathematics. The stimulating exercises are acclaimed for their exceptional quality.

McLaren M23

1973 onwards (all marks)

Haynes Publishing UK The McLaren M23 first appeared in 1973, and became McLaren's first World Championship winner when Emerson Fittipaldi took the title in 1974. As depicted in the new feature film Rush, James Hunt gloriously repeated the feat in 1976 after a mighty season-long battle with Niki Lauda. Here, in this new Haynes Manual, is unique perspective on what it takes to restore, maintain and race a McLaren M23, as well as an insight into the design, engineering and development of this landmark Formula 1 car.

Chemistry

"Steven and Susan Zumdahl's CHEMISTRY 8e brings together the solid pedagogy, easy-to-use media, and interactive exercises that today's instructors need for their general chemistry course. Rather than rote memorization, CHEMISTRY emphasizes a thoughtful approach built on problem-solving. For the Eighth Edition, the authors have extended this approach by emphasizing problem-solving strategies within the Examples and throughout the text narrative. The text speaks directly to the student about how to approach and solve chemical problems--to learn to think like a chemist--so that they can apply the process of problem-solving to all aspects of their lives. Students are provided with the tools to become critical thinkers: to ask questions, to apply rules and develop models, and to evaluate the outcome."--pub. desc.
