Dare to Live

A Naturopathic Doctor's Complete
Guide to the Prevention and
Treatment of Coronary Artery
Disease

iUniverse **Atherosclerosis is responsible for the majority of heart attacks and is the root of coronary heart disease. Plaque buildup in the arteries causes atherosclerosis; luckily, however, through knowledge of our bodies and making small and large changes in the way we live, this deadly condition can be stopped and even reversed. Dare to Live, by author and naturopathic doctor Stephen W. Parcell, brings to the forefront natural, preventive, and medically proven strategies for combating coronary artery disease and its effect on our lives. This is not a diet book or an attempt to push a new fad; Dare to Live is a first-of-its-kind look at atherosclerosis from the naturopathic medical standpoint. Rather than just telling us what to do, Parcell presents in language accessible to everyone the causes of the disease, the rationale behind assessing risk for it, the purpose of the various tests he recommends, and the scientific evidence behind his recommendations. Understanding what our bodies are trying to tell us is the first big step in preventing heart disease, and the next big step acting on our knowledge can teach us more than we might believe possible. By pursuing natural, scientific methods, we can keep health close to our hearts and keep a major killer away from ourselves and our loved ones.**

A User's Guide to Capitalism and Schizophrenia

Deviations from Deleuze and Guattari

Cambridge, Mass. : MIT Press **A User's Guide to Capitalism and Schizophrenia** is a playful and emphatically practical elaboration of the major collaborative work of the French philosophers Gilles Deleuze and Félix Guattari. When read along with its rigorous textual notes, the book also becomes the richest scholarly treatment of Deleuze's entire philosophical oeuvre available in any language. Finally, the dozens of explicit examples that Brian Massumi furnishes from contemporary artistic, scientific, and popular urban culture make the book an important, perhaps even central text within current debates on postmodern culture and politics. **Capitalism and Schizophrenia** is the general title for two books published a decade apart. The first, *Anti-Oedipus*, was a reaction to the events of May/June 1968; it is a critique of "state-happy" Marxism and "school-building" strains of psychoanalysis. The second, *A Thousand Plateaus*, is an attempt at a positive statement of the sort of nomad philosophy Deleuze and Guattari propose as an alternative to state philosophy. Brian Massumi is Professor of Comparative Literature at McGill University.
