Spies for Hire

The Secret World of Intelligence
Outsourcing

Simon and Schuster Reveals the formidable organization of intelligence outsourcing that has developed between the U.S. government and private companies since 9/11, in a report that reveals how approximately seventy percent of the nation's funding for top-secret tasks is now being funneled

to higher-cost third-party contractors. 35,000 first printing.

Encyclopedia of Biometrics

I - Z.

Springer Science & Business Media **With an A-Z format, this encyclopedia provides easy access to relevant information on all aspects of biometrics. It features approximately 250 overview entries and 800 definitional entries. Each entry includes a definition, key words, list of synonyms, list of related entries, illustration(s), applications, and a bibliography. Most entries include useful literature references providing the reader with a portal to more detailed information.**

Advances in Computational Science and Engineering

Second International Conference,

FGCN 2008, Workshops and Symposia, Sanya, Hainan Island, China, December 13-15, 2008. Revised Selected Papers

Springer Science & Business Media As communication and networking (CN) become specialized and fragmented, it is easy to lose sight that many topics in CN have common threads and because of this, advances in one sub-discipline may transmit to another. The presentation of results between different sub-disciplines of CN encourages this interchange for the advancement of CN as a whole. Of particular interest is the hybrid approach of combining ideas from one discipline with those of another to achieve a result that is more significant than the sum of the individual parts. Through this hybrid philosophy, a new or common principle can be discovered which has the propensity to propagate throughout this multifaceted discipline. This volume comprises the selection of extended versions of papers that were presented in their shortened form at the 2008 International Conference on Future Generation Communication and Networking (<http://www.sersc.org/FGCN2008/>), International Conference on Bio-Science and Bio-Technology (<http://www.sersc.org/BSBT2008/>), International Symposium on u- and e- Service, Science and Technology (<http://www.sersc.org/UNESST2008/>), International Symposium on Database Theory and Application (<http://www.sersc.org/DTA2008/>), International Symposium on Control and Automation (<http://www.sersc.org/CA2008/>), International Symposium on Signal Processing, Image Processing and Pattern Recognition (<http://www.sersc.org/SIP2008/>), International Symposium on Grid and Distributed Computing (<http://www.sersc.org/GDC2008/>), International Symposium on Smart Home (<http://www.sersc.org/SH2008/>), and 2009 Advanced Science and Technology (<http://www.sersc.org/AST2009/>).

Biometrics in Identity Management Concepts to Applications

Artech House In today's digital infrastructure we have to interact with an increasing number of systems, both in the physical and virtual world. Identity management (IdM) -- the process of identifying an individual and controlling access to resources based on their associated privileges -- is becoming progressively complex. This has brought the spotlight on the importance of effective and efficient means of ascertaining an individual's identity. Biometric technologies like fingerprint recognition, face recognition, iris recognition etc. have a long history of use in law enforcement applications and are now transitioning towards commercial applications like password replacements, ATM authentication and others. This unique book provides you with comprehensive coverage of commercially available biometric technologies, their underlying principles, operational challenges and benefits, and deployment considerations. It also offers a look at the future direction these technologies are taking. By focusing on factors that drive the practical implementation of biometric technologies, this book serves to bridge the gap between academic researchers and industry practitioners. This book focuses on design, development, and deployment issues related to biometric technologies, including operational challenges, integration strategies, technical evaluations of biometric systems, standardization and privacy preserving principles, and several open questions which need to be answered for successful deployments."

Springer **A casebook that discusses all the mega mergers and acquisitions in terms of value, that have happened in different industry sectors such as pharmacy, technology, telecommunications, media and entertainment, electrical and electronics, energy, finance, consumer goods, metals, and automobile and airlines.**

Financial Statement Analysis Workbook

A Practitioner's Guide

John Wiley & Sons **All too often, financial statements conceal more than they reveal. Even after the recent economic crisis, those analyzing financial statements face serious new concerns and challenges. The Fourth Edition of Financial Statement Analysis skillfully puts this discipline in perspective, and now, with this companion Workbook, you can hone your skills and test the knowledge you've gained from the actual text, before putting them to work in real-world situations. Question-and-answer sections within this Workbook correspond to each chapter of Financial Statement Analysis, Fourth Edition. Part One (Questions) provides chapter-by-chapter fill-in-the-blank questions, as well as financial statement and computational exercises. They are designed to be thought-provoking and require analysis and synthesis of the concepts covered in the book. The answers to all questions, which can be found in Part Two, are provided in boldfaced italic type in order to facilitate the checking of answers and comprehension of material. By enhancing your understanding of financial statement analysis, you can begin to undertake genuine, goal-oriented analysis and prepare for the practical challenges of contemporary business. This reliable resource will help you achieve such a difficult goal and allow you to make more informed decisions—whether you're reevaluating a company's stock price or determining valuations for a merger or**

acquisition.

RoboCup 2011: Robot Soccer World

Cup XV

Springer This book includes the thoroughly refereed post-conference proceedings of the 15th Annual RoboCup International Symposium, held in Istanbul, Turkey, in July 2011. The 12 revised papers and 32 poster presentation presented were carefully reviewed and selected from 97 submissions. The papers are organized on topical sections on robot hardware and software, perception and action, robotic cognition and learning, multi-robot systems, human-robot interaction, education and edutainment and applications.

Image Analysis and Recognition

8th International Conference, ICIAR 2011, Burnaby, BC, Canada, June 22-24, 2011. Proceedings, Part II

Springer The two-volume set LNCS 6753/6754 constitutes the refereed proceedings of the 8th International Conference on Image and Recognition, ICIAR 2011, held in Burnaby, Canada, in June 2011. The 84 revised full papers presented were carefully reviewed and selected from 147 submissions. The papers are organized in topical sections on image and video processing; feature extraction and pattern recognition; computer vision; color, texture, motion and shape; tracking; biomedical image analysis; biometrics; face recognition; image coding, compression and encryption; and applications.

Value Creation in International Business

Volume 1: An MNC Perspective

Springer This edited collection brings into focus the meanings, interpretations and the process of value creation in international business. Exploring value creation in the context of emerging and developed economies, Volume 1 takes the perspective of multinational firms and examines various modes of foreign market servicing varying from exporting to joint venture, mergers and acquisition and strategic alliances. Providing theoretical and practical insights, the authors open an intellectual debate into what value is, and how it is created through the

internationalization activities of firms. **Value Creation in International Business** is a pioneering two volume work intended to provoke theoretical and empirical development in International Business research. Moreover, it is intended as a bridge between concepts derived from general business firm-level research agendas such as value creation and business model, and internationalization approaches and activities of firms.

Immigration and American

Democracy

Subverting the Rule of Law

Routledge While the idea of immigration embodies America's rhetorical commitment to democracy, recent immigration control policies also showcase abysmal failures in democratic practice. *Immigration and American Democracy* examines these failures in terms of state sovereignty, neoliberalism, and surveillance-based techniques of social control. The ideological argument for privatization is not new. But immigration has provided a laboratory for replicating on American soil the sorts of outsourcing travesties that have occurred in America's war in Iraq. As an outcome, abusive executive powers—many delegated to state and local governments and private actors—are manifested every day in data collection, spying, detention, and deportation hearings, and in many cases bypassing the Constitution. The practice of privatization extends this leviathan immigration state by clamping down on civil liberties without having to oblige the courts. Ultimately, Koulisch examines the contested terrain between democratic and undemocratic forces in the immigration policy domain and concludes with recommendations for how democratic

forces might well still win out.
