PHOTOGRAPHER'S GUIDE TO THE PANASONIC LUMIX LX5

GETTING THE MOST FROM PANASONIC'S ADVANCED DIGITAL CAMERA

White Knight Press Photographer's Guide to the Panasonic Lumix LX5: Getting the Most from Panasonic's Advanced Digital Camera is the third book in a series by Alexander S. White. His previous guides to the Leica D-Lux 4 and Panasonic Lumix LX3 were extremely well received by enthusiasts searching for comprehensive books that explain the features and operation of some of the most sophisticated compact digital cameras being sold today. The current book is a detailed resource, illustrated by more than 150 color photographs, that covers all operations, menus, and controls of the Panasonic Lumix LX5, the newest in a line of highly sophisticated, yet very portable cameras that are equipped with full manual controls as well as advanced digital technology. The book provides detailed guidance to beginning, intermediate, and more experienced photographers in plain English. The photographs illustrate the camera's menus and controls, and provide examples of many of the camera's shooting modes and special effects. For those who find the documentation provided by the camera's manufacturer to be hard to read and difficult to understand, this book fills an information gap and serves as a single source of information to let the photographer derive the maximum benefit from his or her Panasonic Lumix LX5 camera.

PHOTOGRAPHER'S GUIDE TO THE PANASONIC LUMIX LX3

GETTING THE MOST FROM PANASONIC'S VERSATILE DIGITAL CAMERA

White Knight Press Photographer's Guide to the Panasonic Lumix LX3: Getting the Most from Panasonic's Versatile Digital Camera is a follow-up to the author's well-received guide to a very similar camera, the Leica D-Lux 4. This new guidebook covers all features and operations of the LX3, one of the most highly esteemed compact digital cameras of recent years. In 232 pages, with numerous color photographs and illustrations, the book explains in plain language how to achieve

the best possible results taking pictures with the automatic or manual controls of the LX3. Although much of the information in this book is similar to that in the earlier book about the Leica D-Lux 4 camera, this new volume is updated to include several new features that were added to both cameras when their internal firmware (operating system) was upgraded to version 2.0. These new features include white balance bracketing, 1:1 aspect ratio, lens resume, and several others. Therefore, the book will be useful to users of the latest versions of both the Panasonic Lumix LX3 and the Leica D-Lux 4.

STRUCTURE FROM MOTION IN THE GEOSCIENCES

John Wiley & Sons Structure from Motion with Multi View Stereo provides hyperscale landform models using images acquired from standard compact cameras and a network of ground control points. The technique is not limited in temporal frequency and can provide point cloud data comparable in density and accuracy to those generated by terrestrial and airborne laser scanning at a fraction of the cost. It therefore offers exciting opportunities to characterise surface topography in unprecedented detail and, with multi-temporal data, to detect elevation, position and volumetric changes that are symptomatic of earth surface processes. This book firstly places Structure from Motion in the context of other digital surveying methods and details the Structure from Motion workflow including available software packages and assessments of uncertainty and accuracy. It then critically reviews current usage of Structure from Motion in the geosciences, provides a synthesis of recent validation studies and looks to the future by highlighting opportunities arising from developments in allied disciplines. This book will appeal to academics, students and industry professionals because it balances technical knowledge of the Structure from Motion workflow with practical guidelines for image acquisition, image processing and data quality assessment and includes case studies that have been contributed by experts from around the world.

BRITISH JOURNAL OF PHOTOGRAPHY

A STARGAZING PROGRAM FOR BEGINNERS

A POCKET FIELD GUIDE

Springer Sets out a simple month-by-month program to reveal all of the night sky's biggest and most beautiful secrets in just one year – and with only a few hours of stargazing each month. By investing just an hour a week and \$50 in binoculars, it's possible to learn a few simple techniques and quickly gain a real insight into the night sky's ever-changing patterns – and what they tell us about Earth, the seasons and ourselves. Searching more for a learned appreciation of nature and our exact place within the cosmos than academic scientific knowledge, science and travel writer Jamie Carter takes the reader on a 12 month tour of the night sky's incredible annual rhythms that say so much about Earth. During the journey he learns about the celestial mechanics at work in the skies above that are – to the beginner – almost beyond belief. As well as the vital constellations and clusters, and the weird and wonderful nebulas, he searches out “dark sky destinations” across the globe that help increase knowledge and give a new perspective on familiar night sky sights. On the journey he witnesses a solar eclipse and grapples with star-charts, binoculars, smartphone apps, telescopes, spots satellites and attempts basic astro-photography. By year's end, the reader will be able to glance at the night sky from anywhere on the planet and tell what direction he or she is facing, what time it is, where all the planets are and even where the Galactic Center Point is.

PSYCHOVERTICAL

Mountaineers Books [CLICK HERE](#) to download the first chapter from Psychovertical. Psychovertical is the story of what happens to a nice lower-class kid with dyslexia who gains control over his circumstances by clinging to giant stone faces, thousands of feet in the air, for days at a time. In this case, Kirkpatrick uses his 12-day solo climb of the Reticent Wall on California's El Capitan as the experience that helps him understand how growing up poor and struggling with dyslexia and low self-confidence set him on a path of extreme adventure. Kirkpatrick's writing is gripping and highly entertaining -- even non-climbers will enjoy his raw intensity, gallows humor, and honest, self-deprecating storytelling style. This book is a Boardman-Tasker Prize winner, which is recognition given for outstanding mountaineering literature. From the judges' remarks: "The book is very cleverly structured....The cuts from scene to scene and climb to climb work wonderfully well -- a sort of mountaineering Day of The Jackal -- as Kirkpatrick comes closer and closer to his nemesis on Reticent Wall. And it is this climb, the running narrative of the book, that grips the most: 14 pitches of aid climbing, unrelieved by conversation with a partner

other than himself, should by rights be boring. But it grips the heart further and further.”
