Pre-Incident Indicators of Terrorist Incidents

The Identification of Behavioral, Geographic and Temporal Patterns of Preparatory Conduct

DIANE Publishing This is a print on demand edition of a hard to find publication. Explores whether sufficient data exists to examine the temporal and spatial relationships that existed in terrorist group planning, and if so, could patterns of preparatory conduct be identified? About one-half of the terrorists resided, planned, and prepared for terrorism relatively close to their eventual target. The terrorist groups existed for 1,205 days from the first planning meeting to the date of the actual/planned terrorist incident. The planning process for specific acts began 2-3 months prior to the terrorist incident. This study examined selected terrorist groups/incidents in the U.S. from 1980-2002. It provides for the potential to identify patterns of conduct that might lead to intervention prior to the commission of the actual terrorist incidents. Illustrations.

## 1969 Chevrolet Camaro SS

*CarTech Inc* In 1969, the Camaro with the SS package took Chevy Camaro performance and styling to another level. First, the Camaro carried updated sheet metal for an aggressive and eye-catching appearance, and the ultra-high-performance 427 big-block engines were available for the first time. As history proved, 1969 was the pinnacle of performance and styling for the first-generation Chevy Camaro. Author and muscle car expert Robert Kimbrough provides a comprehensive examination of the all-time classic 1969 Camaro SS in Volume No. 4 of CarTech's In Detail series. He delves into the design, manufacturing, and equipment of Chevrolet's premier pony car. For the first time in its history, the 1969 Camaro SS had a full slate of high-performance small-blocks as well as big-blocks to conquer the competition on the street and track. The engines included the 350, 375-hp 396, and 425-hp COPO 427 Camaros. The Camaro SS made such an impression, that it became the Indy 500 Pace Car once again in 1969. All In Detail Series books include an introduction and historical overview, an explanation of the design and concepts involved in creating the car, a look at marketing and promotion, and an in-depth study of all hardware and available options, as well as an examination of where the car is on the market today. Also included is an appendix of paint and option codes, VIN and build-tag decoders, as well as production numbers.

## Selling the American Muscle Car

### Marketing Detroit Iron in the 60s and 70s

*CarTech Inc* As the muscle car wars developed in the early 1960s, auto manufacturers scrambled to find catchy marketing campaigns to entice the buying public into their dealerships. General Motors, Ford, and Chrysler, with all their divisions, as well as AMC and Studebaker, inevitably sank billions of dollars into one-upmanship in an effort to vie for the consumer's last dollar. Automotive writer Diego Rosenberg examines the tactics and components used by manufacturers in waging war against one another in the muscle car era. Manufacturers poured millions into racing programs, operating under the principle of "Win on Sunday, Sell on Monday." Cars were given catchy nicknames, such as The GTO Judge, Plymouth Roadrunner, Cobra, and Dodge Super Bee. Entire manufacturer lines were given catchy marketing campaigns, such as Dodge's Scat Pack, AMC's Go Package, and Ford's Total Performance. From racing to commercials to print ads, from dealer showrooms to national auto shows, each manufacturer had its own approach in vying for the buyer's attention, and gimmicks and tactics ranged from comical to dead serious. Selling the American Muscle Car: Marketing Detroit Iron in the 60s and 70s takes you back to an era when options were plentiful and performance was cheap. You will relive or be introduced to some of the cleverest marketing campaigns created during a time when America was changing every day.
