The *Annals* strive each year to synthesize a vast array of primary research, recognizing past principal contributions while illuminating potential future avenues of inquiry. Volume 1 of the *Annals* explores a wide spectrum of research: corporate control; nonstandard employment; critical management; physical work environments; public administration team learning; emotions in organizations; leadership and health care; creativity at work; business and the environment; and bias in performance appraisals. Ultimately, academic scholars in management and allied fields (e.g., sociology of organizations and organizational psychology) will see *The Academy of Management Annals* as a valuable resource to turn to for comprehensive, up-to-date information—published in a single volume every year by the preeminent association for management research. **Peer Review and Manuscript Management in Scientific Journals Guidelines for Good Practice** Wiley-Blackwell This comprehensive yet concise book provides a thorough and complete guide to every aspect of managing the peer review process for scientific journals. Their choices reflect the history of each discipline or profession, taking into account rivalries between universities, professional societies, for-profit and not-for-profit publishers, and even nation-states and international ideologies, in each journal's quest for reputational dominance. Each journal was judged using criteria such as longevity of publication, foresight in carving out its niche, ability to attract & sustain professional or academic affiliations, opinion leadership or agenda-setting power, and ongoing criticality to the study or practice of their field. The book presents wholly independent reviewers; none are in the employ of any publisher, but each is fully credentialed and well published, and many are award-winners. The authors guide college and professional school librarians on limited budgets via an exposition of their analytical and critical winnowing process in determining the classic resources for their faculty, students, and working professional clientele. **Jack Downing's Letters Strategic Management: Text and Cases** McGraw-Hill Education *Strategic Management: Text and Cases*, sixth Edition, by the prestigious authors Dess/Lumpkin/Eisner and new co-author Gerry McNamara provide solid treatment of traditional topics in strategic management as well as thorough coverage of contemporary topics such as intellectual assets, entrepreneurship, innovation, knowledge management, Internet strategies, crowdsourcing, environmental sustainability, businesses' use of blogs and social networking sites and more. The idea of work emphasizes the ways in which people and groups engage in purposeful, reflexive efforts rooted in an awareness of organizational life as constructed in human interaction and changeable through human effort. Studies of these efforts have identified new forms of work including emotion work, identity work, boundary work, strategy work, institutional work, and a host of others. Missing in these conversations, however, is a recognition that these forms of work are all part of a broader phenomenon driven by historical shifts that began with modernity and dramatically accelerated through the twentieth century. This book introduces the social-symbolic work perspective, which addresses this broader phenomenon. The social-symbolic work perspective integrates diverse streams of research to examine how people purposefully and reflexively work to construct organizational life, including the identities, technologies, boundaries, and strategies that constitute their organizations. In this book, the authors define social-symbolic work and introduce three forms - self work, organization work, and institutional work. Social-symbolic work highlights people's efforts to construct the social world, and focuses attention on the motivations, practices, resources, and effects of those efforts. This book explores eight distinct streams of social-symbolic work research, drawing on a broad range of examples from the worlds of business, politics, sports, social

movements, and many others. It provides researchers, students, and practitioners with an integrative theoretical framework useful in understanding social-symbolic work, a survey of the main forms of social-symbolic work, a rich set of theoretical opportunities to inspire new studies, and practical methodological guidance for empirical research on social-symbolic work. **Managerial Guide for Handling Cyber-terrorism and Information Warfare** IGI Global "This book presents IT managers with what cyberterrorism and information warfare is and how to handle the problems associated with them"--Provided by publisher. **Management Dynamics in Strategic Alliances** JAP Management Dynamics in Strategic Alliances is a volume in the book series Research in Strategic Alliances that will focus on providing a robust and comprehensive forum for new scholarship in the field of strategic alliances.
