BETWEEN COURT AND CONFSSIONAL

THE POLITICS OF SPANISH INQUISITORS

[Cambridge University Press](#) **Between Court and Confessional** explores the lives of Spanish inquisitors, closely examining the careers and writings of five sixteenth- and seventeenth-century inquisitors. Kimberly Lynn considers what shaped particular inquisitors, what kinds of official experience each accumulated, and to what ends each directed his acquired knowledge and experience. The case studies examine the complex interplay of careerism and ideological commitments evident in inquisitorial activities. Whereas many studies of the Spanish Inquisition tend to depict inquisitors as faceless and interchangeable, Lynn probes the lives of individual inquisitors to show how inquisitors' operations in their social, political, religious and intellectual worlds set the Inquisition in motion. By focusing on specific individuals, this study explains how the theory and regulations of the Inquisition were rooted in local conditions, particular disputes and individual experiences.

WORK STRESS AND HEALTH IN A GLOBALIZED ECONOMY

THE MODEL OF EFFORT-REWARD IMBALANCE

[Springer](#) **This book provides a comprehensive, updated summary of research evidence on the effects of stressful working and employment conditions on workers' health, as based on one of the worldwide leading theoretical models, effort-reward imbalance.** It offers three innovative features that are appealing for research as well as for policy. Firstly, it presents and discusses comparable research findings from different continents, in particular from Japan, China, and Latin America. Secondly, it extends the conceptual framework of research on this topic by analysing associations of work stress with health in a life course perspective, and by linking these associations to the macro-level of national labour and social policies. Thirdly, the book helps to strengthen programs and policies that aim at promoting healthy work locally, nationally, and internationally, by providing solid facts on which such programs can be based.

CLINICAL TRIALS IN LATIN AMERICA: WHERE ETHICS AND BUSINESS CLASH

[Springer Science & Business Media](#) The outsourcing of clinical trials to Latin America by the transnational innovative pharmaceutical industry began about twenty years ago. Using archival information and field work in Argentina, Brazil, Costa Rica, Mexico and Peru, the authors discuss the regulatory contexts and the ethical dimensions of human experimentation in the region. More than 80% of all clinical trials in the region take place in these countries, and the European Medicines Agency has defined them as priority countries in Latin America. The authors raise questions about the quality of data obtained from the trials and the violation of human rights during their implementation. Their findings are presented in this volume, the first in-depth analysis of clinical trials in the region.

PUBLIC HEALTH ETHICS: CASES SPANNING THE GLOBE

[Springer](#) This Open Access book highlights the ethical issues and dilemmas that arise in the practice of public health. It is also a tool to support instruction, debate, and dialogue regarding public health ethics. Although the practice of public health has always included consideration of ethical issues, the field of public health ethics as a discipline is a relatively new and emerging area. There are few practical training resources for public health practitioners, especially resources which include discussion of realistic cases which are likely to arise in the practice of public health. This work discusses these issues on a case to case basis and helps create awareness and understanding of the ethics of public health care. The main audience for the casebook is public health practitioners, including front-line workers, field epidemiology trainers and trainees, managers, planners, and decision makers who have an interest in learning about how to integrate ethical analysis into their day to day public health practice. The casebook is also useful to schools of public health and public health students as well as to academic ethicists who can use the book to teach public health ethics and distinguish it from clinical and research ethics.

REPOSITIONING PEDAGOGICAL CONTENT KNOWLEDGE IN TEACHERS' KNOWLEDGE FOR TEACHING SCIENCE

[Springer](#) This book enhances readers' understanding of science teachers' professional knowledge, and illustrates how the Pedagogical Content Knowledge research agenda can make a difference in teachers' practices and how students learn science. Importantly, it offers an updated international perspective on the evolving nature of Pedagogical Content Knowledge and how it is shaping research and teacher education agendas for science teaching. The first few chapters background and introduce a new model known as the Refined Consensus Model (RCM) of Pedagogical Content Knowledge (PCK) in science education, and clarify and demonstrate its use in research and teacher education and practice. Subsequent chapters show how this new consensus model of PCK in science education is strongly connected with empirical data of varying nature, contains a tailored language to describe the nature of PCK in science education, and can be used as a framework for illuminating past studies and informing the design of future PCK studies in science education. By presenting and discussing the RCM of PCK within a variety of science education contexts, the book makes the model significantly more applicable to teachers' work.

STAGING DOUBT

SKEPTICISM IN EARLY MODERN EUROPEAN DRAMA

Walter de Gruyter GmbH & Co KG This volume considers the influential revival of ancient philosophical skepticism in the 16th and early 17th centuries and investigates, from a comparative perspective, its reception in early modern English, Spanish and French drama, dedicating detailed readings to plays by Shakespeare, Calderón, Lope de Vega, Rotrou, Desfontaines, and Cervantes. While all the plays employ similar dramatic devices for "putting skepticism on stage", the study explores how these dramas, however, give different "answers" to the challenges posed by skepticism in relation to their respective historico-cultural and "ideological" contexts.

THE APOCALYPTIC YEAR 1000

RELIGIOUS EXPECTATION AND SOCIAL CHANGE, 950-1050

Oxford University Press on Demand The essays in this book challenge prevailing views on the way in which apocalyptic concerns contributed to larger processes of social change at the first millennium. Several basic questions unify the essays: What chronological and theological assumptions underlay apocalyptic and millennial speculations around the Year 1000? How broadly disseminated were those speculations? Can we speak of a mentality of apocalyptic hopes and anxieties on the eve of the millennium? If so, how did authorities respond to or even contribute to the formation of this mentality? What were the social ramifications of apocalyptic hopes and anxieties, and of any efforts to suppress or redirect the more radical impulses that bred them? How did contemporaries conceptualize and then historicize the passing of the millennial date of 1000? Including the work of British, French, German, Dutch, and American scholars, this book will be the definitive resource on this fascinating topic, and should at the same time provoke new interest in and debate on the nature and causes of social change in early medieval Europe.

Managers of different types of libraries, researchers and educators from five continents shared their experiences with research methods, data collection, evaluation, performance measurement, best practice strategies and policies. This book contains their presentations in the form of full length articles.

RE-EXAMINING PEDAGOGICAL CONTENT KNOWLEDGE IN SCIENCE EDUCATION

Routledge Pedagogical Content Knowledge (PCK) has been adapted, adopted, and taken up in a diversity of ways in science education since the concept was introduced in the mid-1980s. Now that it is so well embedded within the language of teaching and learning, research and knowledge about the construct needs to be more useable and applicable to the work of science teachers, especially so in these times when standards and other measures are being used to define their knowledge, skills, and abilities. Re-examining Pedagogical Content Knowledge in Science Education is organized around three themes: Re-examining PCK: Issues, ideas and development; Research developments and trajectories; Emerging themes in PCK research. Featuring the most up-to-date work from leading PCK scholars in science education across the globe, this volume maps where PCK has been, where it is going, and how it now informs and enhances knowledge of science teachers' professional knowledge. It illustrates how the PCK research agenda has developed and can make a difference to teachers' practice and students' learning of science.
