This book is about Heritage Building Information Modelling (HBIM), which necessarily differs from the commonplace applications of BIM to new construction. Where BIM is being used, the focus is still very much on design and construction. However, its use as an operational and management tool for existing buildings, particularly heritage buildings, is lagging behind. The first of its kind, this book aims to clearly define the scope for HBIM and present cutting-edge research findings alongside international case studies, before outlining challenges for the future of HBIM research and practice. After an extensive introduction to HBIM, the core themes of the book are arranged into four parts: Restoration philosophies in practice Data capture and visualisation for maintenance and repair Building performance Stakeholder engagement This book will be a key reference for built environment practitioners, researchers, academics and students engaged in BIM, HBIM, building energy modelling, building surveying, facilities management and heritage conservation more widely. **Art Kane. Millionaire by Thirty The Quickest Path to Early Financial Independence Business Plus Most people know that there are 70 million Baby Boomers in America today....but what is less known is that there are approximately 100 million people in America between the ages of 16 and 30. This generation has just entered, or will soon be entering the work force. And they have no idea how to invest, save, or handle their money. Young people today come out of school having had little or no formal education on the basics of money management. Many have large debts from student loans looming over their heads. And many feel confused and powerless when their pricey educations don't translate into high paying jobs. They feel that their \$30,000-\$40,000 salary is too meager to bother with investing, and they constantly fear that there will be "too much month left at the end of their money." Douglas R. Andrew has shown the parents of this generation a different pathway to financial freedom. Now Doug and his sons, Emron and Aaron - both of whom are in their mid-20s - show the under-30 crowd how they can break from traditional 401k investment plans and instead can find a better way by investing in real estate, budgeting effectively, avoiding unnecessary taxes and using life insurance to create tax-free income. With the principles outlined in *Millionaire by Thirty*, recent graduates will be earning enough interest on their savings to meet their basic living expenses by the time they're 30. And by the time they're 35, their investments will be earning more money than they are, guaranteeing them a happy, wealthy future.

Hence, this is not merely a book of rebuke and anti-Semitic or anti-Masonic polemic: rather it directly or indirectly offers the reader many cues to develop a positive, constructive, or re-constructive orientation focused on the essential rather than the accessory, and devoid of any attenuation." - Julius Evola, from the Introduction The original edition of this book was published in French in Paris in 1936. The Italian traditionalist philosopher Julius Evola translated the book into Italian, and published it 1939, adding his own Introduction and an additional chapter after an agreement with de Poncins. This translation is based on both editions, including Evola's Introduction and chapter as well. Evola also made a number of interesting alterations to the text, occasionally adding, removing, or rewriting small parts of the French original. We have noted these changes in the footnotes, as they offer an insight into the different ways in which de Poncins and Evola approached the same issues. Included in this edition is also two appendices: Evola's essay 'Considerations on the Occult War', which is a 1938 essay on this topic; and a review of the French edition of the book that was published by the first traditionalist philosopher, Rene Guenon, in 1936." **Canon EOS Rebel T2i/550D Digital Field Guide** [John Wiley & Sons](#) Featuring an 18.0 megapixel CMOS sensor and DIGIC 4 image processor for high image quality and speed, ISO 100-6400 for shooting from bright to dim light, and many more great features, the Canon EOS Rebel T2i brings professional features into an entry-level digital SLR.
