TECHNOLOGY COMPUTER AIDED DESIGN

SIMULATION FOR VLSI MOSFET

CRC Press Responding to recent developments and a growing VLSI circuit manufacturing market, **Technology Computer Aided Design: Simulation for VLSI MOSFET** examines advanced MOSFET processes and devices through TCAD numerical simulations. The book provides a balanced summary of TCAD and MOSFET basic concepts, equations, physics, and new technologies related to TCAD and MOSFET. A firm grasp of these concepts allows for the design of better models, thus streamlining the design process, saving time and money. This book places emphasis on the importance of modeling and simulations of VLSI MOS transistors and TCAD software. Providing background concepts involved in the TCAD simulation of MOSFET devices, it presents concepts in a simplified manner, frequently using comparisons to everyday-life experiences. The book then explains concepts in depth, with required mathematics and program code. This book also details the classical semiconductor physics for understanding the principle of operations for VLSI MOS transistors, illustrates recent developments in the area of MOSFET and other electronic devices, and analyzes the evolution of the role of modeling and simulation of MOSFET. It also provides exposure to the two most commercially popular TCAD simulation tools Silvaco and Sentaurus. • Emphasizes the need for TCAD simulation to be included within VLSI design flow for nano-scale integrated circuits • Introduces the advantages of TCAD simulations for device and process technology characterization • Presents the fundamental physics and mathematics incorporated in the TCAD tools • Includes popular commercial TCAD simulation tools (Silvaco and Sentaurus) • Provides characterization of performances of VLSI MOSFETs through TCAD tools •

Offers familiarization to compact modeling for VLSI circuit simulation R&D cost and time for electronic product development is drastically reduced by taking advantage of TCAD tools, making it indispensable for modern VLSI device technologies. They provide a means to characterize the MOS transistors and improve the VLSI circuit simulation procedure. The comprehensive information and systematic approach to design, characterization, fabrication, and computation of VLSI MOS transistor through TCAD tools presented in this book provides a thorough foundation for the development of models that simplify the design verification process and make it cost effective.

THE STRANGE HOURS TRAVELERS KEEP

POEMS

Farrar, Straus and Giroux Those aren't stars, darling That's your nervous system Nanna didn't take you to planetariums like this --from "Hyper-Berceuse: 3 A.M." August Kleinzahler's new poems stretch and go places he has never gone before: they have his signature high color and rhythmic jump, but they take on a breadth of voice and achieve registers that his earlier work only hinted at. Ranging from Vegas and Mayfair to the Asian steppes and contemporary Berlin, these poems touch down at will in tableaux where Liberace unceremoniously meets with St. Kevin and Attila with Zsa Zsa Gabor. Surprise after surprise, nothing seems to lie outside Kleinzahler's purview. This is the strongest collection to date from a poet with "the vision and confident skill to make American poetry new" (Clive Wilmer, The Times [London]).

AFTERTIME

Harlequin Awakening in a bleak landscape, Cass Dollar vaguely recalls enduring something terrible. Having no idea how many days—or weeks—have passed, she slowly realizes the horrifying truth: her daughter, Ruthie, has vanished. And with her, nearly all of civilization. Instead of winding through the once-lush hills, the roads today see only cannibalistic Beaters—people turned hungry for human flesh by a government experiment gone wrong. In a broken, barren California, Cass will undergo a harrowing quest to get Ruthie back. Few people trust an outsider—much less one who bears the telltale scars of a Beater attack—but she finds safety with an enigmatic outlaw, Smoke. And she'll need him more than ever when his ragged band of survivors learn that she and Ruthie have become the most feared, and desired, weapons in a brave new world....

CONFESSIONS OF A TOXIC BACHELOR

Hyperion The Los Angeles Times bestseller, now in paperback -- tales of the notorious New York dating scene, told from the other side of the bed. Rick Marin offers himself up for an in-depth look at man's superficial nature. At 28, a brief, doomed first marriage thrusts Marin back into Bachelor Hell. A journalist as eager to make it in Manhattan as with its female population, our emotionally myopic hero can never seem to tell if the woman in front of him is too crazy or too sane, until she gets too close. Falling out of love as often as he falls in, he vows more than once to clean up his act, only to relapse into another bender of beauties, blow-offs, and bad behavior -- all in desperate pursuit of the woman who can redeem him. In this rollicking, frequently insensitive and ultimately poignant memoir, Marin proves a master of the light touch even in his darkest hours. It is one man's story, but many men will read it as their own. And for any woman who has ever wondered, "What was he thinking" This is what he was thinking.

THE COMPLETE IDIOT'S GUIDE TO FRAUDS, SCAMS, AND CONS

Penguin -- The main target for scams are those 50 years of age or older. -- This book will expose all the latest scams, frauds, and cons -- and can be updated yearly, if necessary, to expose all the latest schemes. Fraud -- credit card fraud, telemarketing scares, Internet scares, identity theft and hundreds of other items that are geared to separate you from your money - - is a multi-billion dollar business, both in the U.S. and worldwide. From a simple three-card monte game on a street corner to sophisticated banking and Wall Street swindles, cons, frauds and scams are destined to strike one in ten Americans this year. Check kiting, ATM scares, bankruptcy fraud, real estate scams, Nigerian money offers, and even slave reparation scams -- there are hundreds, maybe thousands, of ways to get suckered by telemarketers or just plain fast-talking swindlers. Scary stuff, right? This

book identifies the myriad of scams, cons, and frauds perpetrated every minute of every day in this country, and gives cutting-edge, up-to-date advice on how you can protect yourself from unscrupulous cons of every conceivable stripe. There will also be an entertaining section on con artists through history, from the infamous grifters of the Great Depression to the masterminds of the recent Enron collapse -- perhaps one of the greatest scams in America's history.

CALCULUS: EARLY TRANSCENDENTALS

Cengage Learning Known for accuracy, precision, and rigor, Soo Tan now brings those same qualities to the Calculus course. With his clear, concise writing style, and use of relevant, real world examples, Tan introduces abstract mathematical concepts with his intuitive approach that captures student interest without compromising mathematical rigor. In keeping with this emphasis on conceptual understanding, each exercise set begins with concept questions and each end-of-chapter review section includes fill-in-the-blank questions which help students master the definitions and theorems in each chapter. Additionally, many questions asking for the interpretation of graphical, numerical, and algebraic results are included among both the examples and the exercise sets. ACOUSTICAL ENGINEERING

NUEVO CALIFORNIA

Broadway Play Publishing A fabulist comedy-drama of a future city-state made up of Tijuana and San Diego after a great California earthquake. The world greets the first Mexican Pope who leads the region back into recovery. "The year is 2028. A massive earthquake has reconfigured Southern California, wiping out Los Angeles and Orange County. The whole region has to be reconceived. In a controversial move, a new city-state has been proposed, combining San Diego and Tijuana into one cross-cultural community known as Nuevo California. This imaginary world is at the center of a new play premiering at the San Diego Repertory Theater. So the wall is coming down and there's a Mexican-American pope who comes to the region to bless its demolition. What follows is a wild mix of fantasy and reality - chaos and crisis, murder, mystery and a budding bicultural romance - all played out by Mexicans, Anglos, Asians, blacks, Jews, Muslims and Kumi Indians." -Robert Siegel, All Things Considered, N P R News

TEN POEMS TO OPEN YOUR HEART

Harmony Ten Poems to Open Your Heart is a book devoted to love: to the intimacy of personal love and lovemaking, to a loving compassion for others, and to the love that embraces both this world and the next. This new volume from Roger Housden features a few of the same poets as his extraordinarily moving Ten Poems to Change Your Life, such as Mary Oliver and Pablo Neruda, along with contributions from Sharon Olds, Wislawa Szymborska, Czeslaw Milosz, Denise Levertov, and others. Any one of the ten poems and, indeed, any one of Housden's reflections on them, can open, gladden, or pierce your heart. Through the voices of these ten inspiring poets, and through illustrations from his own life, Housden expresses the tenderness, beauty, joys, and sorrows of love, the presence of which, more than anything else, gives human existence its meaning. As Housden says in his eloquent introduction, "Great poetry happens when the mind is looking the other way and words fall from the sky to shape a moment that would normally be untranslatable. . . . When the heart opens, we forget ourselves and the world pours in: this world, and also the invisible world of meaning that sustains everything that was and ever shall be." From the Hardcover edition.

HIDDEN

Harper Collins Fans of Maggie Stiefvater and Colleen Houck will love this epic tale of forbidden romance and nail-biting action from New York Times bestselling author Sophie Jordan. In the climactic finale to the steamy Firelight trilogy, Jacinda must fight to save her life, her love, and all of her

kind. If Jacinda were to follow the wishes of her community, she'd happily settle down with Cassian, the prince of her pride. But she just can't. She's in love with Will, a human boy who comes from a family of hunters. Their relationship breaks the most sacred rule and endangers everyone she cares about. Now Jacinda, Will, and Cassian fight back against the hunters and their shadowy allies who would destroy them all. . . .

DISCONTINUITY AND COMPLEXITY IN NONLINEAR PHYSICAL SYSTEMS

Springer Science & Business Media *Discontinuity in Nonlinear Physical Systems* explores recent developments in experimental research in this broad field, organized in four distinct sections. Part I introduces the reader to the fractional dynamics and Lie group analysis for nonlinear partial differential equations. Part II covers chaos and complexity in nonlinear Hamiltonian systems, important to understand the resonance interactions in nonlinear dynamical systems, such as Tsunami waves and wildfire propagations; as well as Lev flights in chaotic trajectories, dynamical system synchronization and DNA information complexity analysis. Part III examines chaos and periodic motions in discontinuous dynamical systems, extensively present in a range of systems, including piecewise linear systems, vibro-impact systems and drilling systems in engineering. And in Part IV, engineering and financial nonlinearity are discussed. The mechanism of shock wave with saddle-node bifurcation and rotating disk stability will be presented, and the financial nonlinear models will be discussed.

THE ONLY GUIDE TO ALTERNATIVE INVESTMENTS YOU'LL EVER NEED

THE GOOD, THE FLAWED, THE BAD, AND THE UGLY

John Wiley and Sons The rewards of carefully chosen alternative investments can be great. But many investors don't know enough about unfamiliar investments to make wise choices. For that reason, financial advisers Larry Swedroe and Jared Kizer designed this book to bring investors up to speed on the twenty most popular alternative investments: Real estate, Inflation-protected securities, Commodities, International

equities, Fixed annuities, Stable-value funds, High-yield (junk) bonds, Private equity (venture capital), Covered calls, Socially responsible mutual funds, Precious metals equities, Preferred stocks, Convertible bonds, Emerging market bonds, Hedge funds, Leveraged buyouts, Variable annuities, Equity-indexed annuities, Structured investment products, Leveraged funds The authors describe how the investments work, the pros and cons of each, which to consider, which to avoid, and how to get started. Swedroe and Kizer evaluate each investment in terms of: Expected returns Volatility Distribution of returns Diversification potential Fees Trading and operating expenses Liquidity Tax efficiency Account location Role in an asset-allocation program Any investor who is considering or just curious about investment opportunities outside the traditional world of stocks, bonds, and bank certificates of deposit would be well-advised to read this book.

CELEBRATING AMERICA'S PASTIMES: BASEBALL, HOT DOGS, APPLE PIE AND MARKETING?

PROCEEDINGS OF THE 2015 ACADEMY OF MARKETING SCIENCE (AMS) ANNUAL CONFERENCE

Springer This book contains the full proceedings of the 2015 Academy of Marketing Science Annual Conference held in Denver, Colorado. Marketing has become ubiquitous: it doesn't matter who you are, where you are or what you are doing, you cannot escape it. In these times of instantaneous news, information and entertainment, everyone is exposed to messages from the moment they awake until the minute they drift off to sleep. America spends the most money in the world on advertising and other marketing communication. So, it could be said that marketing is America's pastime, as much so as the classics: baseball, hot dogs, and apple pie. Under the theme of "Celebrating America's Pastimes: Baseball, Hot Dogs, Apple Pie and Marketing", this volume discusses all of the good things that marketing can do. Showcasing research from academics, scholars and practitioners from around the world, this volume provides insight and strategies that will help marketers move forward and focus on the positive that marketing can provide to consumers, stakeholders and society. Founded in 1971, the Academy of Marketing Science is an international organization dedicated to promoting timely explorations of phenomena related to the science of marketing in theory, research, and practice. Among its services to members and the community at large, the Academy offers conferences, congresses and symposia that attract delegates from around the world. Presentations from these events are published in this Proceedings series, which offers a comprehensive archive of volumes reflecting the evolution of the field. Volumes deliver cutting-edge research and insights, complimenting the Academy's flagship journals, Journal of the Academy of Marketing Science (JAMS) and AMS Review. Volumes are edited by leading scholars and practitioners across a wide range of subject areas

in marketing science.

GET TOUGH!

HOW TO WIN IN HAND TO HAND FIGHTING

Independently Published This book, by the man who taught them, shows how the British Commandos fought in the Second World War in unarmed hand-to hand combat. It shows how they won their fights - even against enemies who were bigger, stronger, and armed. Brute strength is not required. This book shows you how to put a thug out of action with your bare hands, so fast he won't know what's hit him. Get Tough is filled with clear, graphic line drawings which, with the easy-to-follow directions, demonstrate the Fairbairn System. The author, Major W. E. Fairbairn, was a tough Police officer who spent 30 years with the Shanghai Municipal Police, where he learned ju-jitsu (Judo), Chinese boxing and other martial arts. He was senior instructor to British Special Forces during the war, and was the co-inventor of the legendary Sykes-Fairbairn Commando knife. While in China he became the first foreigner, living outside Japan, ever admitted to Kodokan Jiu-Jitsu University in Tokyo where he was awarded the black belt, second degree. Combining all the knowledge thus acquired he developed a system that stopped the Shanghai terrorists in their tracks, demoralized the Nazis, and probably proved a decisive factor in the success of Allied Special forces in World War Two. This is a must book for the armed forces, civilian defense groups, police, security guards, and indeed anyone whose life may be threatened. The method of hand-to-hand fighting described in this book is the approved standard instruction for all members of His Majesty's forces. The Commandos, and parachute troops, harrying the invasion coasts of Europe, have been thoroughly trained in its use. Britain's two-million Home Guard are daily being instructed in its simple but terrible effectiveness. The units of the United States Marine Corps who were stationed in China between 1927 and 1940 learned these methods at my own hands when I was Assistant Commissioner of the Shanghai Municipal Police. There will be some who will be shocked by the methods advocated here. To them I say "In war you cannot afford the luxury of squeamishness. Either you kill or capture, or you will be captured or killed. We've got to be tough to win, and we've got to be ruthless - tougher and more ruthless than our enemies."

DEEP IN A DREAM

THE LONG NIGHT OF CHET BAKER

Chicago Review Press From his emergence in the 1950s as an uncannily beautiful young Oklahoman who became the prince of "cool" jazz seemingly overnight to his violent, drug-related death in Amsterdam in 1988, Chet Baker lived a life that has become an American myth. Drawing on hundreds of interviews and previously untapped sources, this first major biography

of one of the most romanticized icons in jazz gives a thrilling account of the trumpeter's dark journey. Author James Gavin delves deeply into Baker's tormented childhood, the origins of his melancholic trumpet playing, and even reveals the long-unsolved riddle of Baker's demise. Baker's otherworldly personal aura struck a note of menace and mystery that catapulted him to fame in the staid 1950s but as time wore on, his romance with drugs became highly publicized. Gavin narrates the harrowing spiral of dependency down which Baker tumbled and illustrates how those who dared to get close were dragged down with him. This is the portrait of a musician whose singular artistry and mystique has never lost the power to enchant and seduce.

ONE-MINUTE ANSWERS TO SKEPTICS

CONCISE RESPONSES TO THE TOP 40 QUESTIONS

Harvest House Publishers Speaking all over the United States about apologetics issues, Charlie Campbell has heard just about every question skeptics have to offer. In this concise, reader-friendly handbook, he provides brief responses to the top-40 questions that keep people from the faith, such as... What evidence do you have that God exists? How do you know the Bible is actually true? What about those who have never heard of Jesus? Will they be condemned to hell? If God is so loving, why does He allow evil and suffering? How can you say Jesus is the only way to heaven? Don't all religions basically teach the same thing? Aren't a lot of churchgoers hypocrites? With a gracious introductory note to skeptical readers and a generous sprinkling of inspiring quotes throughout, this handy resource is an enjoyable read as well as a powerful evangelistic tool.

OF GODS AND MONSTERS

A CRITICAL GUIDE TO UNIVERSAL STUDIOS' SCIENCE FICTION, HORROR AND MYSTERY FILMS, 1929-1939

McFarland While Universal's Dracula and Frankenstein (both 1931) have received the most coverage of any of the studio's genre releases, it is the lesser known films that have long fascinated fans and historians alike. Starting with The Last Warning, a 1929 movie released as both a silent and a talkie, Universal provided a decade of films that entertained audiences and sometimes frustrated critics. Each of Universal's horror, science fiction and "twisted mystery" films receives an in-depth essay for each film. The focus is first on the background to the making of the movie and its place in the Universal catalog. A detailed plot synopsis with critical commentary follows. Filmographic data for the film conclude the entry. Universal's The Shadow short film series is covered in an appendix. Many rare illustrations and movie posters are also included.

REFURBISHMENT MANUAL

MAINTENANCE, CONVERSIONS, EXTENSIONS

Walter de Gruyter Planning tasks involving existing structures are currently among the most common types of contract, and almost every structure makes different demands and raises individual problems. Reflecting this state of affairs, there are a dizzying number of publications on the market, most of which are quite specialized. The Refurbishment Manual cuts through this jungle of publications. It defines terms and concepts, combines the narrowly focused perspectives of the specialists, and offers concrete approaches to this wide-ranging topic. The Refurbishment Manual closes the gap between basic constructional literature and one-sided, highly specialized technical literature. It constitutes a practical planning aid on the subject of refurbishment, providing a basic introduction to the relevant aspects of building physics, fire protection, sustainability and energy, hazardous materials, construction materials for interior and façade, historic preservation, and technical building equipment. It offers concrete tips on planning steps, methods of building analysis, and cost benchmarks, as well as clear constructional solutions with built projects as examples. A unique feature of the volume is the specially developed timeline, which allows the planner

to quickly grasp, categorize, and evaluate a concrete building task and thus obtain an efficient planning overview. Planungsaufgaben im Bestand gehören derzeit zu den häufigsten Auftragsarten und nahezu jedes Bauwerk stellt andere Anforderungen und weist individuelle Probleme auf. Analog dazu gibt es auf dem Markt eine fast unüberschaubare Anzahl Publikationen in meist sehr spezialisierter Form. Der Sanierungsatlas möchte Licht in diesen Publikationsdschungel bringen: Er definiert Begrifflichkeiten, vereint die fokussierenden Betrachtungsweisen der Fachleute und vermittelt konkrete Herangehensweisen an diese weit gefächerte Thematik. Der Sanierungsatlas schließt die Lücke zwischen grundlegender Baukonstruktions- und sehr einseitig spezialisierter Fachliteratur. Das Buch stellt eine praktische Planungshilfe zum Thema Sanierung dar - und zwar in Form von relevanter Grundlagenvermittlung zu Bauphysik, Brandschutz, Nachhaltigkeits- und energetischen Aspekten, Schadstoffen, Baustoffen im Innenraum und an der Fassade, zu Aspekten der Denkmalpflege ebenso wie zur technischen Gebäudeausstattung. Er liefert konkrete Hinweise zu Planungsschritten, Methoden der Bauanalyse und Kostenkennwerten sowie anschauliche Konstruktionslösungen am Beispiel gebauter Projekte. Einzigartig ist die speziell entwickelte Zeitschiene, mit deren Hilfe eine konkrete Bauaufgabe schnell erfasst, kategorisiert und bewertet werden kann - und die dem Planer somit einen effizienten Planungsüberblick verschafft.

RECONSTRUCTING THE NATIVE SOUTH

AMERICAN INDIAN LITERATURE AND THE LOST CAUSE

University of Georgia Press In *Reconstructing the Native South*, Melanie Benson Taylor examines the diverse body of Native American literature in the contemporary U.S. South—literature written by the descendants of tribes who evaded Removal and have maintained ties with their southeastern homelands. In so doing Taylor advances a provocative, even counterintuitive claim: that the U.S. South and its Native American survivors have far more in common than mere geographical proximity. Both cultures have long been haunted by separate histories of loss and nostalgia, Taylor contends, and the moments when those experiences converge in explicit and startling ways have yet to be investigated by scholars. These convergences often bear the scars of protracted colonial antagonism, appropriation, and segregation, and they share preoccupations with land, sovereignty, tradition, dispossession, subjugation, purity, and violence. Taylor poses difficult questions in this work. In the aftermath of Removal and colonial devastation, what

remains—for Native and non-Native southerners—to be recovered? Is it acceptable to identify an Indian “lost cause”? Is a deep sense of hybridity and intercultural affiliation the only coherent way forward, both for the New South and for its oldest inhabitants? And in these newly entangled, postcolonial environments, has global capitalism emerged as the new enemy for the twenty-first century? Reconstructing the Native South is a compellingly original work that contributes to conversations in Native American, southern, and transnational American studies.

INFORMATION TECHNOLOGY FOR MANAGEMENT

ADVANCING SUSTAINABLE, PROFITABLE BUSINESS GROWTH

Wiley This text is an unbound, binder-ready edition. **Information Technology for Management** by Turban, Volonino Over the years, this leading IT textbook had distinguished itself with an emphasis on illustrating the use of cutting edge business technologies for achieving managerial goals and objectives. The 9th ed continues this tradition with coverage of emerging trends in Mobile Computing and Commerce, IT virtualization, Social Media, Cloud Computing and the Management and Analysis of Big Data along with advances in more established areas of Information Technology. The book prepares students for professional careers in a rapidly changing and competitive environment by demonstrating the connection between IT concepts and practice more clearly than any other textbook on the market today. Each chapter contains numerous case studies and real world examples illustrating how businesses increase productivity, improve efficiency, enhance communication and collaboration, and gain competitive advantages through the use of Information Technologies.

PROGRAMMING AND SCHEDULING TECHNIQUES

Routledge Planning is an important management function and its effective execution is crucial to ensure the success of any project. This second edition of Thomas Uher’s and Adam Zantis’ textbook maintains its focus on operational rather than strategic aspects of programming and scheduling of projects, providing the reader with the practical planning skills needed to be successful. Unlike most other textbooks that largely focus on the critical path method, **Programming and Scheduling Techniques** includes a comprehensive review of a range of practices used around the world. Topics covered in this thoroughly revised edition include: deterministic scheduling techniques including the bar chart, the critical path method, the critical chain method, the multiple activity chart and the line of balance a comparison of the critical path and critical chain scheduling techniques options for computer-based scheduling stochastic scheduling techniques including the critical path method based on Monte Carlo simulation and the Program Evaluation and Review Technique (PERT) risk in scheduling work

study. By covering a broad range of scheduling techniques this book is suitable for those planning projects in any industry, particularly in interdisciplinary or international contexts. Written for students studying undergraduate and postgraduate architecture, building, construction/project management, quantity surveying, property development and civil engineering programs.
