A Life of Will Rogers

UP.

William Barton Rogers and the Idea of MIT

Winner, 2009 Outstanding Book Award, History of Education Society Winner, 2009 Richard Slatten Prize for Excellence in Virginia Biography, Virginia Historical Society Conceptual founder of the Massachusetts Institute of Technology, William Barton Rogers was a

highly influential scientific mind and educational reformer of the nineteenth century. A. J. Angulo recounts the largely unknown story of one man's ideas and how they gave way to the creation of one of America's premier institutions of higher learning. MIT's long tradition of teaching, research, and technological innovation for real-world applications is inexorably linked to Rogers' educational philosophy. Emphasizing the "useful arts"—a curriculum of specialized scientific study stressing theory and practice, innovation and functionality—Rogers sought to revolutionize standard educational practices of the day. Controversial in an era typified by a generalist approach to teaching the sciences, Rogers' model is now widely emulated by institutions throughout the world. Exploring the intersection of Rogers' educational philosophy and the rise of technical institutes in America, this biography offers a long-overdue account of the man behind MIT.

## Will Rogers, Performer

### An Illustrated Biography with a Filmography

McFarland Publishing *While Will Rogers was definitely a man of his times, he remains to many a man for all times. His political and social commentary continue to be as relevant today as they were in the 1920s and 1930s. Many have forgotten, however, that Rogers was first and foremost a performer. Long before Rogers uttered his first memorable speech or penned his first famous phrase, he earned a handsome living as a vaudevillian and as a performer in the Ziegfeld Follies. He successfully made the transition to the movies, debuting in the silent film *Laughing Bill Hyde* in 1918. He followed his dozens of silent movies with 21 'squawkies', as he liked to call them. By 1934 he was voted the top box office draw in America, out-polling such stars as Shirley Temple. This heavily illustrated work provides a detailed look at all aspects of Will Rogers performing career, with particular emphasis on his movie work. A complete filmography is included.*

### American Geologist

*University Alabama Press Henry Darwin Rogers was one of the first professional geologists in the United States. He directed two of the earliest state geological surveys--New Jersey and Pennsylvania--in the mid-1830s. His major interest was Pennsylvania, with its Appalachian Mountains, which Rogers saw as great folds of sedimentary rock. He believed that an interpretation of these folds would lead to an understanding of the dynamic processes that had shaped the earth. From Rogers' efforts to explain these Pennsylvania folds came the first uniquely American theory of mountain elevation, a theory that Rogers personally considered his most significant achievement.*

### Essays on Pope

*Cambridge University Press Leading literary historian and eighteenth-century specialist Pat Rogers has long been recognized as an authority on the poet Alexander Pope. This volume addresses the many facets of Pope's world and work, and represents Rogers's important contribution over the years to Pope studies. ## The American Way of Death Revisited

*Vintage Only the scathing wit and searching intelligence of Jessica Mitford could turn an exposé of the American funeral industry into a book that is at once deadly serious and side-splittingly funny. When first published in 1963, this landmark of investigative journalism became a runaway bestseller and resulted in legislation to protect grieving families from the unscrupulous sales practices of those in "the dismal trade." Just before her death in 1996, Mitford thoroughly revised and updated her classic study. The American Way of Death Revisited confronts new trends, including the success of the profession's lobbyists in Washington, inflated cremation costs, the telemarketing of pay-in-advance graves, and the effects of monopolies in a death-care industry now dominated by multinational corporations. With its hard-nosed consumer activism and a satiric vision out of Evelyn Waugh's novel The Loved One, The American*

### James Gamble Rogers and the Architecture of Pragmatism

*Mit Press foreword by Paul Goldberger Only recently has the period between the two World Wars emerged as pivotal in the redefinition of American taste. The work of James Gamble Rogers (1867-1947) represents a built expression of the country's cultural elite during these years and comprises a significant chapter in American architectural history. Aaron Betsky covers the entire span of Rogers's career, paying particular attention to his more important buildings. These include the Harkness mansion, the Yale Club, and the buildings of Columbia-Presbyterian in New York; the downtown campus, library, stadium, dormitories and other assorted buildings of Northwestern University; and the Harkness Memorial Quadrangle, residential colleges, Graduate School, Law School, and Sterling Memorial Library at Yale, which with their blending of English medieval and renaissance motifs and their historical associations are perhaps the fullest expression of the neo-Gothic style in America. Aaron Betsky investigates the central issues of American architecture through Rogers' private house commissions for wealthy clients seeking to define their lives and livelihoods through temples of taste, his corporate structures notable for both lucid organization and symbolic ornamentation, and his designs for universities and hospitals which integrated historical and social metaphors into redefinitions of institutional function. *NYU Press New Orleans was a peculiarly segregated city in the 1950s and 1960s. Yet, despite its complicated racial and ethnic identity and heated desegregation battles, New Orleans, unlike other Southern cities such as Birmingham, did not explode. In this moving, evocative work, Kim Rogers tells the stories - in their own words - of the New Orleans civil rights workers who fought to deter the racial terrorism that scarred much of the South in the 1950s and 1960s. *Artist Statement (color work) Domestic Vacations: "The Dutch proverb "a Jan Steen household" originated in the 17th century and is used today to refer to a home in disarray, full of rowdy children and boisterous family gatherings. The paintings of Steen, along with those of other Dutch and Flemish genre painters, helped inspire this body of work. I am the oldest of nine children and now the mother of three. As Steen's personal narratives of family life depicted nearly 400 yrs. ago, the conflation of art and life is an area I have explored in photographing the everyday life of my family and the lives of my sisters and their families at home. These images are both fictional and auto-biographical, and reflect not only our lives today and as children growing up in a large family, but also move beyond the documentary to explore the fantastic elements of our everyday lives, both imagined and real."*
