PAGAN SPAIN

Univ. Press of Mississippi As Pagan Spain portrays midcentury Spain as a country of tragic beauty, political oppression, and contradictions, Wright amalgamates at once polemic, travel narrative, history, and journalistic essay. He combines, as well, first-person narrative, eyewitness reporting, commentary, anecdotes, vignettes, and dramatic monologue. Pagan Spain, less a journalistic account of a people and an exotic locale than it is a sociological critique of a corrupt system of government, is a daring portrait of a country in turmoil.

INFORMACIÓN BIBLIOGRÁFICA

THE RECEPTION OF DARWINISM IN THE IBERIAN WORLD

SPAIN, SPANISH AMERICA AND BRAZIL

Springer Science & Business Media | Twenty-five years ago, at the Conference on the Comparative Reception of Darwinism held at the University of Texas in 1972, only two countries of the Iberian world-Spain and Mexico-were represented.' At the time, it was apparent that the topic had attracted interest only as regarded the "mainstream" science countries of Western Europe, plus the United States. The Eurocentric bias of professional history of science was a fact. The sea change that subsequently occurred in the historiography of science makes 1972 appear something like the antediluvian era. Still, we would like to think that that meeting was prescient in looking beyond the mainstream science countries-as then perceived-in order to test the variation that ideas undergo as they pass from center to periphery. One thing that the comparative study of the reception of ideas makes abundantly clear, however, is the weakness of the center/periphery dichotomy from the perspective of the diffusion of scientific ideas. Catholics in

mainstream countries, for example, did not handle evolution much better than did their corre1igionaries on the fringes. Conversely, Darwinians in Latin America were frequently better placed to advance Darwin's ideas in a social and political sense than were their fellow evolutionists on the Continent. The Texas meeting was also a marker in the comparative reception of scientific ideas, Darwinism aside. Although, by 1972, scientific institutions had been studied comparatively, there was no antecedent for the comparative history of scientific ideas.

THE TRANSHUMANIST WAGER

Philosopher, entrepreneur, and former National Geographic and New York Times correspondent Zoltan Istvan presents his visionary novel, *The Transhumanist Wager*, as a seminal statement of our times. Scorned by over 500 publishers and literary agents around the world, his philosophical thriller has been called "revolutionary" and "socially dangerous" by readers, scholars, and religious authorities. The novel debuts a challenging original philosophy, which rebuffs modern civilization by inviting the end of the human species-and declaring the onset of something greater. Set in the present day, the novel tells the story of transhumanist Jethro Knights and his unwavering quest for immortality via science and technology. Fighting against him are fanatical religious groups, economically depressed governments, and mystic Zoe Bach: a dazzling trauma surgeon and the love of his life, whose belief in spirituality and the afterlife is absolute. Exiled from America and reeling from personal tragedy, Knights forges a new nation of willing scientists on the world's largest seasteading project, Transhumania. When the world declares war against the floating city, demanding an end to its renegade and godless transhuman experiments and ambitions, Knights strikes back, leaving the planet forever changed.

PLANNING ABU DHABI

AN URBAN HISTORY

Routledge Abu Dhabi's urban development path contrasts sharply with its exuberant neighbour, Dubai. As Alamira Reem puts it, Abu Dhabi, capital of the United Arab Emirates since 1971, 'has been quietly devising its own plans ... to manifest its role and stature as a capital city'. Alamira Reem, a native Abu Dhabian and urban planner and researcher who has studied the emirate's development for more than a decade, is uniquely placed to write its urban history.

Following the introduction and description of Abu Dhabi's early modern history, she focuses on three distinct periods dating from the discovery of oil in 1960, and coinciding with periods in power of the three rulers since then: Sheikh Shakhbut bin Sultan Al Nahyan (1960-1966), Sheikh Zayed bin Sultan Al Nahyan (1966-2004), and Sheikh Khalifa bin Zayed Al Nahyan (2004-). Based on archival research, key interviews and spatial mapping, she analyses the different approaches of each ruler to development; investigates the role of planning consultants, architects, developers, construction companies and government agencies; examines the emergence of comprehensive development plans and the policies underlying them; and assesses the effects of these many and varied influences on Abu Dhabi's development. She concludes that, while much still needs to be done, Abu Dhabi's progress towards becoming a global, sustainable city provides lessons for cities elsewhere.

INTERNAL COMBUSTION ENGINES

PERFORMANCE, FUEL ECONOMY AND EMISSIONS

Woodhead Publishing This book presents the papers from the Internal Combustion Engines: Performance, fuel economy and emissions held in London, UK. This popular international conference from the Institution of Mechanical Engineers provides a forum for IC engine experts looking closely at developments for personal transport applications, though many of the drivers of change apply to light and heavy duty, on and off highway, transport and other sectors. These are exciting times to be working in the IC engine field. With the move towards downsizing, advances in FIE and alternative fuels, new engine architectures and the introduction of Euro 6 in 2014, there are plenty of challenges. The aim remains to reduce both CO2 emissions and the dependence on oil-derivate fossil fuels whilst meeting the future, more stringent constraints on gaseous and particulate material emissions as set by EU, North American and Japanese regulations. How will technology developments enhance performance and shape the next generation of designs? The book introduces compression and internal combustion engines' applications, followed by chapters on the challenges faced by alternative fuels and fuel delivery. The remaining chapters explore current improvements in combustion, pollution prevention strategies and data comparisons. presents the latest requirements and challenges for personal transport applications gives an insight into the technical advances and research going on in the IC Engines field provides the latest developments in compression and spark ignition engines for light and heavy-duty applications, automotive and other markets

EUROPE

A CULTURAL HISTORY

Routledge Fully revised, updated and extended to include the momentous developments of 2020, this fourth edition of Peter Rietbergen's highly acclaimed *Europe: A Cultural History* is a major and original contribution to the study of Europe. The book examines the structures of culture in this part of Eurasia from the beginnings of human settlement on to the genesis of agricultural society, of greater polities, of urban systems, and the slow transitions that resulted in a (post-)industrial society and the individualistic mass culture of the present. Using both economic and socio-political analytical concepts, the volume outlines cultural continuity and change in Europe through the lenses of literature, the arts, science, technology and music, to show the continent's ever-changing identities. In a highly readable style, it expertly contextualizes such diverse and wide-ranging topics as Celtic society, the Roman legal system, the oppositions between 'elite' and 'popular' culture in pre-industrial Europe, Michelangelo's world-view, the interaction between the Enlightenment and Romanticism, the growth of a society of time and money, the appeal of fascism and other totalitarian ideologies, and the ways the songs of Sting express late twentieth-century thinking. Structured both chronologically and thematically, the text is distinctive in the attention consistently paid to the many ways Europe has been formed through its contacts with non-European cultures, especially those of Asia and the Americas. This edition concludes with an epilogue that discusses the ways Europe's recent past - including the long-term efforts at further unification, and the various forms of opposition against it - has been both interpreted and misinterpreted; the importance of globalization; and the major challenges facing Europe in the present, amongst which are the consequences of the pandemic of 2020. With a wide selection of illustrations, maps, excerpts from primary sources and even lyrics from contemporary songs to support its arguments, the text remains the definitive cultural history of Europe for both the general reader and students of European history and culture.

TOWARD AN ARCHITECTURE OF ENJOYMENT

U of Minnesota Press *Toward an Architecture of Enjoyment* is the first publication in any language of the only book devoted to architecture by Henri Lefebvre. Written in 1973 but only recently discovered in a private archive, this work extends Lefebvre's influential theory of urban space to the question of architecture. Taking the practices and perspective of habitation as his starting place, Lefebvre redefines architecture as a mode of imagination rather than a specialized process or a collection of monuments. He calls for an architecture of *jouissance*—of pleasure or enjoyment—centered on the body and its rhythms and based on the possibilities of the senses. Examining architectural examples from the Renaissance to the postwar period, Lefebvre investigates the bodily pleasures of moving in and around buildings and monuments, urban spaces, and gardens and landscapes. He argues that areas dedicated to enjoyment, sensuality, and desire are important sites for a society passing beyond industrial modernization. Lefebvre's theories on space and urbanization fundamentally reshaped the way we understand cities. *Toward an Architecture of Enjoyment* promises a similar impact on how we think about, and live within, architecture.

GREEK AND ROMAN TEXTILES AND DRESS

AN INTERDISCIPLINARY ANTHOLOGY

Oxbow Books Twenty chapters present the range of current research into the study of textiles and dress in classical antiquity, stressing the need for cross and inter-disciplinary study in order to gain the fullest picture of surviving material. Issues addressed include: the importance of studying textiles to understand economy and landscape in the past; different types of embellishments of dress from weaving techniques to the (late introduction) of embroidery; the close links between the language of ancient mathematics and weaving; the relationships of iconography to the realities of clothed bodies including a paper on the ground breaking research on the polychromy of ancient statuary; dye recipes and methods of analysis; case studies of garments in Spanish, Viennese and Greek collections which discuss methods of analysis and conservation; analyses of textile tools from across the Mediterranean; discussions of trade and ethnicity to the workshop relations in Roman fulleries. Multiple aspects of the production of textiles and the social meaning of dress are included here to offer the reader an up-to-date account of the state of current research.

The volume opens up the range of questions that can now be answered when looking at fragments of textiles and examining written and iconographic images of dressed individuals in a range of media. The volume is part of a pair together with Prehistoric, Ancient Near Eastern and Aegean Textiles and Dress: an interdisciplinary anthology edited by Mary Harlow, Cécile Michel and Marie-Louise Nosch

HOW TO WIN EVERY ARGUMENT

THE USE AND ABUSE OF LOGIC

Bloomsbury Publishing In the second edition of this witty and infectious book, Madsen Pirie builds upon his guide to using - and indeed abusing - logic in order to win arguments. By including new chapters on how to win arguments in writing, in the pub, with a friend, on Facebook and in 140 characters (on Twitter), Pirie provides the complete guide to triumphing in altercations ranging from the everyday to the downright serious. He identifies with devastating examples all the most common fallacies popularly used in argument. We all like to think of ourselves as clear-headed and logical - but all readers will find in this book fallacies of which they themselves are guilty. The author shows you how to simultaneously strengthen your own thinking and identify the weaknesses in other people arguments. And, more mischievously, Pirie also shows how to be deliberately illogical - and get away with it. This book will make you maddeningly smart: your family, friends and opponents will all wish that you had never read it. Publisher's warning: In the wrong hands this book is dangerous. We recommend that you arm yourself with it whilst keeping out of the hands of others. Only buy this book as a gift if you are sure that you can trust the recipient.
