Marine Diesel Engines

Maintenance, Troubleshooting and Repair

Adlard Coles Nigel Calder, a diesel mechanic for more than 25 years, is also a boatbuilder, cabinetmaker, and machinist. He and his wife built their own cruising sailboat, Nada, a project they completed in 1984. Calder is author of numerous articles for Yachting Monthly and many other magazines worldwide, as well as the bestselling Boatowner's Practical and Technical Cruising Manual and Boatowner's Mechanical and Electrical Manual, both published by Adlard Coles Nautical. Here, in this goldmine of a book, is everything the reader needs to keep their diesel engine running cleanly and efficiently. It explains how diesel engines work, defines new terms, and lifts the veil of mystery that surrounds such engines. Clear and logical, this extensively illustrated guide will enable the reader to be their own diesel mechanic. As Nigel Calder says: 'there is no reason for a boatowner not to have a troublefree relationship with a diesel engine. All one needs is to set the engine up correctly in the first place, to pay attention to routine maintenance, to have the knowledge to spot early warning signs of impending trouble, and to have the ability to correct small ones before they become large ones.'

Diesel Engine Maintenance Training Manual

BoD - Books on Demand Very complete and comprehensive manual for the service and repair of all large Marine Diesel Engines. Reprint of the original book from 1946.

Marine Engine Technician Apprenticeship Training Standards

This training manual was developed by the Program Development and Standards Unit of the Ministry of Training, Colleges and Universities, in partnership with the industry committees and in consultation with representatives from the industry. This document is intended to be used by trainee, trainers/instructors and companies as a "blueprint" for training or as a prerequisite for completion and certification. A marine engine technician is defined as a person who possesses the skills and knowledge to diagnose, repair, and maintain marine craft and marine craft engine systems, including electrical/electronic systems, gasoline engine fuel management systems, steering systems, hydraulic systems and drive, and propulsion systems.--Document.

Occupational Outlook Handbook

Describes 250 occupations which cover approximately 107 million jobs.
