Financial Accounting

The Basis for Business Decisions

Financial Accounting

Managerial Accounting (16th Edition)

Guan Li Kuai Ji (Ying Wen Ban Yuan Shu Di 16 Ban)

Investigation of the National Defense Program

Hearings Before a Special Committee Investigating the National Defense Program, United States Senate, Seventy-Seventh Congress, First Session--Eightieth Congress, First Session

Investigation of the National Defense Program: Aircraft contracts (Hughes Aircraft Co. and Kaiser-Hughes Corp.), July 28-31, Aug. 1, 2, 4-9, 11, 1947

Part 41, focuses on Navy fuel purchase contracts for Saudi Arabian oil and businesses' use of institutional advertising for tax exemptions during and after the war.

Managerial Strategies and Solutions for Business Success in Asia

IGI Global Globalization, sustainable development, and technological applications all affect the current state of the business sector in Asia. This complex industry plays a vital part in the overall economic, social, and political aspects of this region, as well as on a larger international scale. Managerial Strategies and Solutions for Business Success in Asia is an authoritative reference source for the latest collection of research perspectives on the development and optimization of various business sectors across the Asian region and examines their role in the globalized economy. Highlighting pertinent topics across an interdisciplinary scale, such as e-commerce, small and medium enterprises, and tourism management, this book is ideally designed for academics, professionals, graduate students, policy makers, and practitioners interested in emerging business and management practices in Asia.

Foreclosure Problems and Solutions

Federal, State, and Local Efforts to Address the Foreclosure Crisis in Ohio : Field Hearing Before the Subcommittee on Housing and Community Opportunity of the Committee on Financial Services, U.S. House of Representatives, One Hundred Tenth Congress, Second Session, June 16, 2008

History of operations research in the United States Army Problems and Solutions in Structural Geology and Tectonics

Elsevier Problems and Solutions in Structural Geology and Tectonics, Volume 5, in the series Developments in Structural Geology and Tectonics, presents students, researchers and practitioners with an all-new set of problems and solutions that structural geologists and tectonics researchers commonly face. Topics covered include ductile deformation (such as strain analyses), brittle deformation (such as rock fracturing), brittle-ductile deformation, collisional and shortening tectonics, thrust-related exercises, rift and extensional tectonics, strike slip tectonics, and cross-section balancing exercises. The book provides a how-to guide for students of structural geology and geologists working in the oil, gas and mining industries. Provides practical solutions to industry-related issues, such as well bore stability Allows for self-study and includes background information and explanation of research and industry jargon Includes full color diagrams to explain 3D issues

Problem Solving with Cases and Simulations

World Assn for Case Method This volume produced by WACRA (World Association for Case Method Research & Application) presents papers on "Problem Solving with Cases & Simulations" in a Teaching-Learning Environment. Contributions from around the world (Europe, North & South America, Africa, Asia, Australia) explore & discuss the latest developments in design, production, implementation, research, evaluation, & pedagogical innovations using cases, simulations & games. Disciplines represented include Business, Communication, Education, Engineering, Industrial (Professional) Training, Medicine, Psychology, Strategic Policy Planning, Sociology, Social Sciences. Among others, Romiszovski (USA) proposes a structural communication methodology to assist students in dealing with unstructured problems, while Klabbers (Netherlands) suggests that games & simulations are appropriate means to tackle complex problems. Barnes (Harvard) responds to "How do concepts - concepts or theories of leadership - influence design, & teaching, of a course. Is there any relationship between Case Method Leadership & the leadership concept we try to transfer into our course designs?" Dutch Educational Centers introduce a case course concept based on different learning theories. On-going research reports, applications, case (simulation) development & writing & practical information about Case Method Organizations, Publications & Clearing Houses, worldwide, are also included. (1989 & 1988 volumes: ISBN 1-877868-01-9; 1-877868-00-0)

The British National Bibliography

Silent Killer: Grant's Logistical Requirements

Pickle Partners Publishing This monograph examines Grant's campaign of 1864-1865 from a logistics perspective. It answers the following questions: 1. Did logistical systems change for the emerging operational level of war? 2. Did Civil War field logistics form

today's concepts at the operational level? 3. Were logistics planning factors derived from Napoleon? It concludes with a discussion of how Grant's systems impacted on 1992 logistics systems. The monograph examines the history and formulation of operational requirements for the logistician. Discussed in detail is the necessity for theater base support, visibility and distribution, and the requirement for logistical planning factors. The conclusion is that each of these elements allows the commander to phase his operations, reduce risks and complete a campaign without creating operational pauses or logistical culmination. Finally, the paper compares 1864 principles with principles utilized during Desert Shield/Desert Storm.

Death Without Dignity

AuthorHouse Tyler Davidson has just discovered his colleague, Hugh Disner, dead in the men's room of the building in which they both have offices at a second-tier state university. Tyler immediately becomes a suspect since he has a known history of disdain for Disner and is hounded throughout by a no-nonsense detective named Smockley. He complicates matters by starting a relationship with Disner's widow, Breda. Meanwhile, Tyler fears that he himself might be the next murder victim. What develops is the unraveling of the mystery surrounding Disner's death, along with a study in paranoia, one which colors everything Tyler does, from teaching classes, to grading papers in his office or home, to attending committee meetings, and to promoting his novel called DAVIDSON'S HELL (a modernized version of Dante's "Inferno"). Interlaced is a humorous treatment of academia, including pretentious professors, feckless administrators, inept students, and silly traditions. DEATH WITHOUT DIGNITY is sure to keep you laughing while you feel all of Tyler's fear and suspense.

Managerial Accounting for Managers

Public Policies in Media and Information Literacy in Europe

Cross-Country Comparisons

Taylor & Francis Public Policies in Media and Information Literacy in Europe explores the current tensions in European countries as they attempt to tackle the transition to the digital age, providing a comparative and cross-cultural analysis of Media and Information Literacy (MIL) across Europe. This book takes a long-term perspective over the development of media education in Europe, and includes an appraisal of media, information, computer and digital literacies as they coalesce and diverge in the public debate over twenty-first-century skills. The contributors assess the various definitions of media and information literacy as a composite notion whose evolution as a cross-cultural phenomenon reveals various trends and influences in Europe. Throughout, this volume offers an in-depth coverage of MIL with all the different dimensions of policy-making, from legal frameworks to training, funding, evaluation and good practices. The authors propose modeling current MIL governance trends in Europe and conclude with a call for alternative and collective frames of research that they hope will influence policy-makers and other stakeholders, especially in terms of MIL governance. This collection is ideal for students and researchers of MIL, as well as policy makers, educators and associations interested in MIL in the digital age.

Purchase and Distribution of Products of Fishing Industry and Fishery Educational Service

Hearings Before the Committee on Merchant Marine and Fisheries, House of Representatives, Seventy-sixth

Congress, First Session, on H.R. 4985, a Bill to Provide for a Fishery Educational Service in the Bureau of Fisheries; H.R. 5025, a Bill to Authorize the Purchase and Distribution of Products of the Fishing Industry; and H.R. 5681, a Bill to Authorize the Federal Surplus Commodities Corporation to Purchase and Distribute Surplus Products of the Fishing Industry. Cesarean Section

An American History of Risk, Technology, and Consequence

JHU Press Between 1965 and 1987, the cesarean section rate in the United States rose precipitously—from 4.5 percent to 25 percent of births. By 2009, one in three births was by cesarean, a far higher number than the 5-10% rate that the World Health Organization suggests is optimal. While physicians largely avoided cesareans through the mid-twentieth century, by the early twenty-first century, cesarean section was the most commonly performed surgery in the country. Although the procedure can be life-saving, how—and why—did it become so ubiquitous? Cesarean Section is the first book to chronicle this history. In exploring the creation of the complex social, cultural, economic, and medical factors leading to the surgery's increase, Jacqueline H. Wolf describes obstetricians' reliance on assorted medical technologies that weakened the skills they had traditionally employed to foster vaginal birth. She also reflects on an unsettling malpractice climate—prompted in part by a raft of dubious diagnoses—that helped to legitimize "defensive medicine," and a health care system that ensured cesarean birth would be more lucrative than vaginal birth. In exaggerating the risks of vaginal birth, doctors and patients alike came to view cesareans as normal and, increasingly, as essential. Sweeping change in women's lives beginning in the 1970s cemented this markedly different approach to childbirth. Wolf examines the public health effects of a high cesarean rate and explains how the language of reproductive choice has been used to discourage debate about cesareans and the risks associated with the surgery. Drawing on data from nineteenth- and early twentieth-century obstetric logs to better represent the experience of cesarean surgery for women of all classes and races, as well as interviews with obstetricians who have performed cesareans and women who have given birth by cesarean, Cesarean Section is the definitive history of the use of this surgical procedure and its effects on women's and children's health in the United States.

Problems of Cell Permeability

International Series of Monographs in Pure and Applied Biology: Modern Trends in Physiological Sciences

Elsevier Modern Trends in Physiological Science, Volume 26: Problem of Cell Permeability covers expounded sorptional theory of cell permeability. The problem of cell permeability deals with the questions connected with the laws of the entrance of substances from the surrounding medium into cells and the excretion from the latter of the products of intracellular metabolism. This book is composed of 12 chapters and begins with an overview of the chemical composition and structure of cell membrane, as well as the membrane theory of cell permeability. The next chapters treat the issues of cell's osmometric activity and the physico-chemical properties of protoplasm as a system of coacervates. Considerable chapters are devoted to cell permeability for various substrates, such as non-electrolytes, organic acids, vital dyes, and mineral substances. The concluding chapters discuss the relationship between metabolism and cell permeability; the bioelectric properties of cell; and the protective action of non-electrolytes against live matter damage caused by dilute saline media. This book will be of value to cell biologists, biochemists, and research workers in cell permeability.
