# Cost, Effectiveness, and Deployment of Fuel Economy Technologies for Light-Duty Vehicles

**National Academies Press** *The light-duty vehicle fleet is expected to undergo substantial technological changes over the next several decades. New powertrain designs, alternative fuels, advanced materials and significant changes to the vehicle body are being driven by increasingly stringent fuel economy and greenhouse gas emission standards. By the end of the next decade, cars and light-duty trucks will be more fuel efficient, weigh less, emit less air pollutants, have more safety features, and will be more expensive to purchase relative to current vehicles. Though the gasoline-powered spark ignition engine will continue to be the dominant powertrain configuration even through 2030, such vehicles will be equipped with advanced technologies, materials, electronics and controls, and aerodynamics. And by 2030, the deployment of alternative methods to propel and fuel vehicles and alternative modes of transportation, including autonomous vehicles, will be well underway. What are these new technologies - how will they work, and will some technologies be more effective than others? Written to inform The United States Department of Transportation's National Highway Traffic Safety Administration (NHTSA) and Environmental Protection Agency (EPA) Corporate Average Fuel Economy (CAFE) and greenhouse gas (GHG) emission standards, this new report from the National Research Council is a technical evaluation of costs, benefits, and implementation issues of fuel reduction technologies for next-generation light-duty vehicles. Cost, Effectiveness, and Deployment of Fuel Economy Technologies for Light-Duty Vehicles estimates the cost, potential efficiency improvements, and barriers to commercial deployment of technologies that might be employed from 2020 to 2030. This report describes these promising technologies and makes recommendations for their inclusion on the list of technologies applicable for the 2017-2025 CAFE standards.*

## Adventure Capitalist

### The Ultimate Road Trip

**Random House** Drive . . . and grow rich! The bestselling author of *Investment Biker* is back from the ultimate road trip: a three-year drive around the world that would ultimately set the Guinness record for the longest continuous car journey. In *Adventure Capitalist*, legendary investor Jim Rogers, dubbed "the Indiana Jones of finance" by *Time* magazine, proves that the best way to profit from the global situation is to see the world mile by mile. "While I have never patronized a prostitute," he writes, "I know that one can learn more about a country from speaking to the madam of a brothel or a black marketeer than from meeting a foreign minister." Behind the wheel of a sunburst-yellow, custom-built convertible Mercedes, Rogers and his fiancée, Paige Parker, began their "Millennium Adventure" on January 1, 1999, from Iceland. They traveled through 116 countries, including many where most have rarely ventured, such as Saudi Arabia, Myanmar, Angola, Sudan, Congo, Colombia, and East Timor. They drove through war zones, deserts, jungles, epidemics, and blizzards. They had many narrow escapes. They camped with nomads and camels in the western Sahara. They ate silkworms, iguanas, snakes, termites, guinea pigs, porcupines, crocodiles, and grasshoppers. Best of all, they saw the real world from the ground up—the only vantage point from which it

can be truly understood—economically, politically, and socially. Here are just a few of the author's conclusions: • The new commodity bull market has started. • The twenty-first century will belong to China. • There is a dramatic shortage of women developing in Asia. • Pakistan is on the verge of disintegrating. • India, like many other large nations, will break into several countries. • The Euro is doomed to fail. • There are fortunes to be made in Angola. • Nongovernmental organizations (NGOs) are a scam. • Bolivia is a comer after decades of instability, thanks to gigantic amounts of natural gas. *Adventure Capitalist* is the most opinionated, sprawling, adventurous journey you're likely to take within the pages of a book—the perfect read for armchair adventurers, global investors, car enthusiasts, and anyone interested in seeing the world and understanding it as it really is.
