There are various circumstances in which a presentation is made: teaching a class, introducing a product to sell, explaining an organizational structure, etc. There are two main kinds of presentations you can deliver: before an audience or not. The preparation and the actual delivery of each are quite different. Before getting into the details of each, we will first take a look at the software and analyze what it has to offer. The way that you start PowerPoint is dependent on the operating system you're running on your computer. For example: ■ In Windows 10, you can start from the Start menu, the All Apps menu, the Start screen, or the taskbar search box. ■ In Windows 8, you can start from the Apps screen or Start screen search results. ■ In Windows 7, you can start from the Start menu, All Programs menu, or Start menu search results. You might also have a shortcut to PowerPoint on your desktop or on the Windows taskbar. When you start PowerPoint without opening a specific presentation, the Start screen appears. The Start screen is a hybrid of the Open and New pages of the Backstage view. It displays links to recent files in the left pane, and new file templates in the right pane. In this book he shares them, detailing his award-winning PowerPoint process and guiding you through three phases of presentation development—discover, design, and deliver. What's more, Parkinson is a Microsoft PowerPoint MVP—most valuable professional—an honorific bestowed by Microsoft on those with “very deep knowledge of Microsoft products and services.” He shares not only his tips and best practices for presentation success, but also those from several of his fellow MVPs.
