Involve Me

...and I Will Understand

For someone to truly learn a subject, they must be interested and inspired. In the East, Confucius is noted as having said, "Tell me, and I will forget; Show me, and I may remember; Involve me, and I will understand" in ancient China. In the West, Mentor was a trusted and wise advisor in ancient Greece. Both represent a simple and effective teaching technique, yet it is not used enough in the modern world. In business, in school, all too often policy, tools, or presentation limit learning for both teachers and students, or trainers do not invest the time and passion they should with their students. **Involve Me** is teaching with a difference. More than ever before we are learning new things every day in a world full of information, but it is rarely effective either in professional business or at school. Why aren't courses effective? Why don't students retain information easily? How can you engage the class? This book gives tips and techniques for engaging students and gaining their interest. Relationships, student investment, structure, delivery, flexibility and focus are all critical to helping students understand quickly and easily - and remember what they have learned. It looks at why teaching is the best way to learn, why being informal works better, why presentation is key, why a curriculum should not be rigid... and much more. **Involve Me** also takes a deeper look at why these techniques get results, and gives examples taken from real world training that can be applied to any teaching situation effectively - with students from many different cultures and countries. Whether you train intensively in IT, or teach in a school, you can benefit from using these techniques to help people become interested and invested in any subject. Mentor students in a relaxed and intuitive fashion, work with them, inspire them, and involve them... and they will understand.

How Asia Works

Success and Failure In the World's Most Dynamic Region

Open Road + Grove/Atlantic “A good read for anyone who wants to understand what actually determines whether a developing economy will succeed” (Bill Gates, “Top 5 Books of the Year”). An Economist Best Book of the Year from a reporter who has spent two decades in the region, and who The Financial Times said “should be named chief myth-buster for Asian business.” In *How Asia Works*, Joe Studwell distills his extensive research into the economies of nine countries—Japan, South Korea, Taiwan, Indonesia, Malaysia, Thailand, the Philippines, Vietnam, and China—into an accessible, readable narrative that debunks Western misconceptions, shows what really happened in Asia and why, and for once makes clear why some countries have boomed while others have languished. Studwell’s in-depth analysis focuses on three main areas: land policy, manufacturing, and finance. Land reform has been essential to the success of Asian economies, giving a kick-start to development by utilizing a large workforce and providing capital for growth. With manufacturing, industrial development alone is not sufficient, Studwell argues. Instead, countries need “export discipline,” a government that forces companies to compete on the global scale. And in finance, effective regulation is essential for fostering, and sustaining growth. To explore all of these subjects, Studwell journeys far and wide, drawing on fascinating examples from a Philippine sugar baron’s stifling of reform to the explosive growth at a Korean steel mill. “Provocative . . . *How Asia Works* is a striking and enlightening book . . . A lively mix of scholarship, reporting and polemic.” —The Economist
