**Newsweek Strategies to Combat Homelessness** [UN-HABITAT Radar Instruction Manual](#) Since 1958 the Maritime Administration has continuously conducted instructions in use of collision avoidance radar for qualified U.S. seafaring personnel and representatives of interested Federal and State Agencies. Beginning in 1963, to facilitate the expansion of training capabilities and at the same time to provide the most modern techniques in training methods, radar simulators were installed in Maritime Administration's three region schools. It soon became apparent that to properly instruct the trainees, even with the advanced equipment, a standardize up-to-date instruction manual was needed. The first manual was later revised to serve both as a classroom textbook and as an onboard reference handbook. This newly updated manual, the fourth revision, in keeping with Maritime Administration policy, has been restructured to include improved and more effective methods of plotting techniques for use in Ocean, Great Lakes, Coastwise and Inland Waters navigation. Robert J. Blackwell Assistant Secretary for Maritime Affairs **BE RICH AND HAPPY. Aircraft Electricity for the Mechanic Dinosaurs & A Dirigible** [Baen Publishing Enterprises](#) Henry Vickers's job is to keep clients safe from the dinosaurs they're hunting. That's the easy part. The hard part is to keep the clients safe from themselves and each other. Men with enough money to go into the past to hunt the largest land animals of all time are powerful and self-willed. Some make an effort to act like decent human beings, but more are selfish, stupid, sadistic--or all three together. The few women are likely to be worse. Vickers doesn't expect rich people to understand the dangers of where they are and what they're doing; he doesn't expect them to be competent with the powerful rifles they carry; and he particularly doesn't expect them to be reasonable. He treats his clients' behavior as he does the rain and the baking heat--the cost of having a life he loves and which he couldn't afford in any other way. But no matter how detached Vickers tries to be, eventually there are moral questions that he can't ignore. And when Henry Vickers starts to behave like a human being instead of a hunting guide, things get really dangerous. And in a complete change of pace: "Travellers." An airship is crossing the United States in 1897 in search of the weird and the wonderful. The two teenagers aboard know that the airship's captain is a great scientist and inventor--but they don't know how much more he is also. All five of David Drake's time travel stories collected for the first time. At the publisher's request, this title is sold without DRM (Digital Rights Management). **iPhone for Seniors Quickly Start Working with the iPhone with iOS7** [Visual Steps B V](#) Provides information for seniors on how to use the phone to make and receive calls, send text messages, browse the Web, download and manage applications, take photographs and videos, and purchase music. **Modern Project Management: Software Multinational Finance Evaluating the Opportunities, Costs, and Risks of Multinational Operations** [John Wiley & Sons](#) Deep coverage and rigorous examination of international corporate finance Multinational Finance offers an advanced exploration of international corporate finance concepts and operations. But what if choice is fake? Americans are fixated on the idea of choice. Our political theory is based on the consent of the governed. Our legal system is built upon the argument that people freely make choices and bear responsibility for them. And what slogan could better express the heart of our consumer culture than "Have it your way"? In this provocative book, Kent Greenfield poses unsettling questions about the choices we make. What if they are more constrained and limited than we like to think? If we have less free will than we realize, what are the implications for us as individuals and for our society? To uncover the answers, Greenfield taps into scholarship on topics ranging from brain science to economics, political theory to sociology. His discoveries--told through an entertaining array of news events, personal anecdotes, crime stories, and legal decisions--confirm that many factors, conscious and unconscious, limit our free will. Worse, by failing to perceive them we leave ourselves open to manipulation. But Greenfield offers useful suggestions to help us become better decision makers as individuals, and to ensure that in our laws and public policy we acknowledge the complexity of

choice. **Deep Learning for Image Processing Applications** [IOS Press](#) Deep learning and image processing are two areas of great interest to academics and industry professionals alike. She's Britney Spears shaving her head, Whitney Houston saying "crack is whack," and Amy Winehouse, dying in front of millions. But the trainwreck is also as old (and as meaningful) as feminism itself. From Mary Wollstonecraft—who, for decades after her death, was more famous for her illegitimate child and suicide attempts than for A Vindication of the Rights of Woman—to Charlotte Brontë, Billie Holiday, Sylvia Plath, and even Hillary Clinton, Sady Doyle's Trainwreck dissects a centuries-old phenomenon and asks what it means now, in a time when we have unprecedented access to celebrities and civilians alike, and when women are pushing harder than ever against the boundaries of what it means to "behave." Where did these women come from? What are their crimes? And what does it mean for the rest of us? For an age when any form of self-expression can be the one that ends you, Doyle's book is as fierce and intelligent as it is funny and compassionate—an essential, timely, feminist anatomy of the female trainwreck. **Manual for Spiritual Warfare** [TAN Books](#) A fierce war rages for your soul.
